Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.

Rover V8 – the Story of the Engine tells the fascinating story of the engine that created a legend in its own lifetime. Starting life as a General Motors design in 1961, but withdrawn three years later in favour of cheaper technology, it reached Rover by chance in the mid-1960s. Few other British companies then had V8 engines in production, and Rover immediately gained a special status when the

V8 entered UK production during 1967. This was an extraordinarily compact design and also extraordinarily light, thanks to its all-aluminium alloy construction. It was not a temperamental high-performance engine, but had a well-proven and simple architecture that made it both reliable and easy to work on. Small wonder, then, that the Rover V8 was bought by sports car makers who needed a light, compact and powerful engine. Small wonder that Rover kept it in production for so long, developing multiple different sizes and versions. Small wonder that the engine is still revered by Rover and Land Rover enthusiasts today, or that its popularity as an aftermarket conversion has ensured that it remains in small-volume production, half a century after entering production in the UK.
