Maftu was afraid of the sea. It had taken his mother when he was a baby, and it seemed to him that the sea gods sought vengeance at having been cheated of Mafatu. So, though he was the son of the Great Chief of Hikueru, a race of Polynesians who worshipped courage, and he was named Stout Heart, he feared and avoided the sea, till everyone branded him a coward. When he could no longer bear their taunts and jibes, he determined to conquer that fear or be conquered-- so he went off in his canoe, alone except for his little dog and pet albatross. A storm gave him his first challenge. Then days on a desert island found him resourceful beyond his own expectation. This is the story of how his courage grew and how he finally returned home. This is a legend. It happened many years ago, but even today the people of Hikueru sing this story and tell it over their evening fires.

A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's *The Great American Read* Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. A riveting family saga, *The Story of Edgar Sawtelle* explores the deep and ancient alliance between humans and dogs, and the power of fate through one boy's epic journey into the wild. Born mute, speaking only in sign, Edgar Sawtelle leads an idyllic life with his parents on their farm in remote northern Wisconsin. For generations, the Sawtelles have raised and trained a fictional breed of dog whose thoughtful companionship is epitomized by Almondine, Edgar's lifelong companion. But with the unexpected return of Claude, Edgar's uncle, turmoil

consumes the Sawtelle's once-peaceful home. When Edgar's father dies suddenly, Claude insinuates himself into the life of the farm – and into Edgar's mother's affections. Grief-stricken and bewildered, Edgar tries to prove Claude played a role in his father's death, but his plan backfires, spectacularly. Edgar flees into the vast wilderness lying beyond the farm. He comes of age in the wild, fighting for his survival and that of the three yearling dogs who follow him. But his need to face his father's murderer, and his devotion to the Sawtelle dogs, turn Edgar ever homeward. Wroblewski is a master storyteller, and his breathtaking scenes – the elemental north woods, the sweep of seasons, an iconic American barn, a ghost made of falling rain – create a family saga that is at once a brilliantly inventive retelling of Hamlet, an exploration of the limits of language, and a compulsively readable modern classic.

Communication is crucial in any relationship - especially when one of you happens to be a dog. Drawing on substantial research in animal behaviour, Stanley Coren demonstrates that the average house dog can distinguish at least 140 words and can interact at a level approaching that of a human two-year-old. While actual conversation of the sort Lassie seemed capable of in Hollywood myth-making remains in the realm of fantasy, this book shows us that a great deal of real communication is possible between humans and dogs beyond the simple giving and obeying of commands. How to Speak Dog not only explains the sounds, words, actions and movements which will help owners to communicate most effectively with their dogs; it also deciphers the signs and signals our dogs are giving to us. With easy-to-follow tips on how humans can mimic the language dogs use to talk to one another, original drawings illustrating the subtleties of canine body language and a handy visual glossary, How to Speak Dog gives dog lovers a whole new range of essential skills with which to improve their relationship with their dogs.

From his appearances on The Oprah Winfrey Show to his roster of celebrity clients to his reality television series, Cesar Millan is America's most sought-after dog-behavior expert. But Cesar is not a trainer in the traditional sense—his expertise lies in his unique ability to comprehend dog psychology. Tracing his own amazing journey from a clay-walled farm in Mexico to the celebrity palaces of Los Angeles, Cesar recounts how he learned what makes dogs tick. In *Cesar's Way*, he shares this wisdom, laying the groundwork for you to have stronger, more satisfying relationships with your canine companions. Cesar's formula for a contented and balanced dog seems impossibly simple: exercise, discipline, and affection, in that order. Taking readers through the basics of dog psychology and behavior, Cesar shares the inside details of some of his most fascinating cases, using them to illustrate how common behavior issues develop and, more important, how they can be corrected. You'll learn:

- What your dog really needs may not be what you're giving him
- Why a dog's natural pack instincts are the key to your happy relationship
- How to relate to your dog on a canine level
- There are no "problem breeds," just problem owners
- How to choose a dog who's right for you and your family
- The difference between discipline and punishment

"Change loves me, defines and stalks me like a laser-guided smart bomb. It comes at me in all forms, suddenly and with enormous impact, from making shifts in work to having and raising a kid to buying a cabin on a distant mountaintop. Sometimes, change comes on four legs." In his popular and widely praised *Running to the Mountain*, Jon Katz wrote of the strength and support he found in the massive forms of his two yellow Labrador retrievers, Julius and Stanley. When

the Labs were six and seven, a breeder who'd read his book contacted Katz to say she had a dog that was meant for him—a two-year-old border collie named Devon, well bred but high-strung and homeless. Katz already had a full canine complement, but instinct overruled reason, and soon thereafter he brought Devon home. *A Dog Year: Twelve Months, Four Dogs, and Me* is the story of how Devon and Jon—and Julius and Stanley—came to terms with each other. It shows how a man discovered a lot about himself through one dog (and then another) whose temperament seemed as different from his own as day is from night. It is a story of trust and understanding, of life and death, of continuity and change. It is by turns insightful, hilarious, and deeply moving. **BONUS:** This edition contains an excerpt from Jon Katz's *Going Home*. Presents information to determine if a dog is friendly and if friendly, how to approach it. Designed to help kids be safe around dogs.

A collection of illustrated anecdotes about dogs by forty-two well-known children's book illustrators, including Seymour Chwast, Alice Provensen, and Trina Schart Hyman.

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or

together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella “spoke” her first word, and the other breakthroughs they’ve had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word “it” is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In *Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.

Problem Dog? You Can't Train Your Dog If You Don't Speak Dog! Amy Morford is a dog whisperer. She's been training dogs for more than two decades and understands what makes your dog tick. *How to Speak Dog* provides a general overview of dog behavior before specifically focusing in on training solutions for six of the most common dog misbehaviors: aggression, digging, nuisance barking, fear biting, submissive urination, and separation anxiety. Morford understands that not everyone understands “dog talk” so she kicks off by introducing basic obedience training methods. She explains each training situation by breaking it down into chronological micro-steps. *How to Speak Dog* is as close as one gets to hiring a dog trainer without actually hiring one. Morford has made the process as simple as possible, with six chapters written in “plain English” to eliminate ambiguity so the training process is easy and less stressful for both the teacher and the student. In addition to covering basic training and the elimination of problem behavior patterns, Morford also discusses clicker training, crate training methods, and the use of positive reinforcement. If you've been struggling to resolve problem dog behaviors or just adopted a new dog and want to be sure that your new household member is well-behaved and well-trained, you've got to learn “dog talk.” This “how-to” dog training guide will ease the way to optimum

communication with your canine best friend. Details About This Book - Instructs dog owners on how to resolve the most common "problem" behaviors - Includes step-by-step basic dog training tips - Provides in-depth analysis of a variety of common training methods - Includes a chapter especially tailored to training specific dog breeds - Written by an experienced dog trainer with more than 20 years of experience working with all types of dogs.

#1 New York Times bestseller and USA Today bestseller The more we know about the animals in our world and the better we care for them, the better our lives will be. Through hundreds of charming illustrations, a few homemade projects, and her humorous, knowledgeable voice, Stewart provides insight into the secret lives of animals and the kindest ways to live with and alongside them. At home, she shows readers how to speak "dog-ese" and "cat-ese" and how to "virtually adopt" an animal.
