? Stop Gambling, start trading! Learn how to start using the fundamentals of options trading that bring success in the most volatile market. Are you planning to start trading options to make a living? Or you are already in the game but can't find your way due to overwhelming terms and details. Don't worry, we have all been there - and the good news is there is a way out. All you need is to learn how to use the required "basics" to trade - and not gamble - your way to financial success. ? Learn to get better Every knowledge, mistakes, wins, and failures count. Some of us have learned from our mistakes and wins. So, for budding traders not to fall into the same ditch like us, you should learn. Until you start learning the technicalities and secret strategies of options trading, you may record failures more than success. ? Why did many fail to succeed in options trading? Now, you want to learn from other people's mistakes, right? Don't worry, you'll find out - and even more. However, here is a brief: Most unsuccessful traders hit the options market without prior knowledge. As for the others, they merely "assume" that they are ready. Most people only read the tips and tricks of learning; they have not "learned options trading." Emotion never helps make an informed decision in options trading. Sadly, it is a fact many people that fail in options trading never knew from the start. Those who consider options trading as a "get rich quick" scheme have already failed before starting. Many jumped into options trading without a clear goal - and left with zero. ? Who can become a successful trader? If I can become a successful trader, so do you. As a matter of fact, anybody can

trade options successfully. But it comes with a price. So, let me share the price that I paid with you. Like any budding and serious trader who is willing to succeed, I tried every possible lead. From studying the markets, watching the news on options trading, reading books, and listening to the professional, trust me, I tried everything. Yet, things kept falling apart. After a few years, I decided to unlearn, learn, and relearn. First off, I start focusing on becoming a trader, rather than earning money. From there, I carefully looked at my previous mistakes, try different strategies, and test-run many techniques. Gradually, everything starts to check out. Before long, I begin managing trades successfully. I thought it's a stroke of luck until I used my know-how for my family, friends, and acquaintances, and it worked again like magic. Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.
