Between 1946 and 1962, 4,423 Centurions were built in 13 basic marks and numerous variants, with the chassis also adapted for several other AFV roles. A small number of the Beach Armoured Recovery Version (BARV) served with the British forces during the Iraq War of 2003, some 58 years after the Centurion first entered service! The Centurion has seen extensive combat in the Korean War (Britain), Vietnam (Australia), the Middle East (Israel) in the 1967 Six Day War, 1973 Yom Kippur War, and during the 1978 and 1982 invasions of Lebanon, and in the Indo-Pakistan War (India) in 1965 where it fought against US-supplied M47 and M48 Patton tanks.

The old masters of chess dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.
