She's seen slave dungeons in Ghana. Genocide in Rwanda. Systemic sexual abuse in Brazil. Child abuse and domestic violence in the U.S. After forty years of counseling abuse survivors around the world, Dr. Diane Langberg, a world renowned trauma expert, remains certain that what trauma destroys, Christ can and does restore. This book will convince you, too, of the healing heart of God. But it's not a fast process, instead much patience is required from family, friends, and counselors as they wisely and respectfully help victims unpack their traumatic suffering through talking, tears, and time. And it's not a process that can be separated from the work of God in both a counselor and counselee. Dr. Langberg calls all of those who wish to help sufferers to model Jesus's sacrificial love and care in how they listen, love, and guide. The heart of God is revealed to sufferers as they grow to understand the cross of Christ and how their God came to this earth and experienced such severe suffering that he too is "well-acquainted with grief." The cross of Christ is the lens that transforms and redeems traumatic suffering and its aftermath, not only for the sufferer, but it also transforms those who walk with the suffering. This book will be a great help to anyone who loves, listens to, and seeks to help someone impacted by trauma and abuse. There is no quick fix, but there is the hope for healing through the love of God in Christ.

What's a woman to do if her life is not taking shape the way that she thought that it would? What happens when she looks at herself in the mirror, lingering just a little longer than usual and realizes that she no longer recognizes the person staring back at her? What does she do when she sees that, somehow, her life has drifted away from all her original hopes, dreams, or plans? Speaker, blogger and writer Chrystal Evans Hurst wrote this book because she was that woman. One day she realized that she had somehow wandered away from the life that she had purposed to live a long time ago. Chrystal since discovered that this moment of awareness happens to lots of women at different seasons of their lives. Poor decisions, a lack of intentionality or planning, or a long-term denial of deep hopes and dreams can leave a woman, old or young, reeling from the realization that she is lost, disappointed, or simply numb. And she just needs encouragement. This woman simply needs someone to hold her hand, to cheer her on, and to believe with her that she is capable of still being the person she intended to be or discovering the girl she never knew was there in the first place. Chrystal uses her poignant story of an early and unexpected pregnancy, as well as other raw and vulnerable moments in her life, to let readers know she understands what it's like to try and find your way after some missteps or decisions you didn't plan on. In *She's Still There* Chrystal emphasizes the importance of the personal process and the beauty of that path as it is shared authentically from one girlfriend to another. It's a book of "me toos", reminders of the hoped for, and challenges for the path ahead - to find direction, purpose, and true satisfaction.

There has been an exponential increase in the amount of information available on the pathophysiology and management of heart diseases. Meanwhile, understanding of the underlying pathology and physiology has deepened and broadened with new methodologies to monitor cardiac structure and function. These developments have led to an overwhelming amount of information available to students, trainees, and physicians. What is in short supply is a comprehensive yet concise and clear description of the important cardiac conditions and disorders, an approach to their management, and an easily consulted and well-indexed summary to be used at the bedside or in the clinic. This book addresses that need.

"In 1986 'Comrade September', a charismatic ANC operative and popular MK commander, was abducted from Swaziland by the apartheid security police and taken across the border. After torture and interrogation, September was 'turned' and before long the police had extracted enough information to hunt down and kill some of his former comrades. September underwent changes that marked him for the rest of his life: from resister to collaborator, insurgent to counter-insurgent, revolutionary to counter-revolutionary and, to his former comrades, hero to traitor. Askari is the story of these changes in an individual's life and of the larger, neglected history of betrayal and collaboration in the struggle against apartheid. It seeks to understand why September made the choices he did - collaborating with his captors, turning against the ANC, and then hunting down his comrades - without excusing those choices. It looks beyond the black-and-white that still dominates South Africa's political canvas, to examine the grey zones in which South Africans - combatants and non-combatants - lived." -- Publisher.

Ten-year-old Kenny (Kenji in Japanese) worships his older brother, Mickey (Mitsuo), a baseball hero whose outstanding performance on the Asahi baseball team has given him fame and popularity. Despite Kenny's suspected heart condition, he is determined to practice secretly with Mickey so he, too, can one day try out for the Asahi. But world events soon overtake life in this quiet community. When Japan attacks Pearl Harbor in 1941, everything for Kenny and his family spirals out of control: schools are closed, businesses are confiscated, fathers are arrested and sent to work camps in the BC interior and mothers and children are relocated to internment camps. When Mickey is arrested for a small act of violence, Kenny manages to keep his family's spirits up, despite the deplorable conditions in camp. Coming across a "vacant" field covered with scrap wood, broken shakes and torn tar paper, Kenny gets permission to clear it and convert it into a baseball field. One by one, the boys in the camp pitch in, and the work gives purpose to their long days. Kenny's persistence, hard work and big dreams shape the teen he is to become in this story of happiness found despite all odds. "Multilayered narratives come together as an exploration of femininity, identity, mortality, and folklore's wondrous powers." —Booklist

According to Slavic myth, Baba Yaga is a witch who lives in a house built on chicken legs and kidnaps small children. In *Baba Yaga Laid an Egg*, internationally acclaimed writer Dubravka Ugresic takes the timeless legend and spins it into a fresh and distinctly modern tale of femininity, aging, identity, and love. With barbed wisdom and razor-sharp wit, Ugresic weaves together the stories of four women in contemporary Eastern Europe: a writer who grants her dying mother's final wish by traveling to her hometown in Bulgaria, an elderly woman who wakes up every day hoping to die, a buxom blonde hospital worker who's given up on love, and a serial widow who harbors a secret talent for writing. Through the women's fears and desires, and their struggles against invisibility, Ugresic presents a brilliantly postmodern retelling of an ancient myth that is infused with humanity and the joy of storytelling. "Ugresic's postmodern take on myth, femininity, and aging provides a beautifully written window into Slavic literature." —Publishers Weekly

Incandescent and celebratory paintings of cherry blossoms from Damien Hirst, in a glorious oversize volume With 107 new works, *Cherry Blossoms* marks a new chapter in Damien Hirst's career-long exploration of the physical relationship between artist and canvas that began with his *Spot Paintings* in 1986. Hirst describes his cherry blossoms as garish and messy and fragile"; the series signals a shift in Hirst's career away from minimalism and "the imagined mechanical painter" toward a painting that delights in the potential haphazardness of the medium, as well as the artist's own fallibility as a creator. Rich in color and striking in number, Hirst's *Cherry Blossoms* are both an appropriation and a tribute to the pictorial art of the 19th and 20th centuries. Damien Hirst (born 1965) rose to prominence in the 1990s as one of the Young British Artists, garnering attention for his controversial site-specific pieces. A 1989 graduate of Goldsmiths College, Hirst was awarded the Turner Prize in 1995. Now one of the contemporary art world's most famous figures, Hirst continues to surprise audiences with a staggering diversity of work, ranging from sculpture and painting to installation and performance art. In 2012, a retrospective of his nearly 30-year career was staged at Tate Modern. Hirst is represented by Gagosian.
