**The Works of Irving Fisher Vol 13** William J Barber,James Tobin,Robert W Dimand,Kevin Foster,2024-08-07 This 14-volume edition contains the key works and commentary by leading Fisher scholars, allowing modern readers access to the major issues in Fisherian economic thought.

**Ardeen - Volume 3** Sigrid Kraft,2018-09-20 Raiden finally finds a way into the Nimrod - with Eryn's help. And instead of finding answers to their many questions, everything just gets more complicated. The Nimrod turns out to be a great retreat for magical beings of all kinds. From the bloodthirsty monster to the first species, everyone is there... but no true allies. And yet help is promised, as an exchange for the key. Also the mysterious Voice in Eryn's head speaks again, sending them to the Six Places of Power... so that Eryn's fate can finally be fulfilled. Well, if that's not a trap... (The Dragon of Science)

*Computational Intelligence in Data Mining - Volume 3* Lakhmi C. Jain,Himansu Sekhar Behera,Jyotsna Kumar Mandal,Durga Prasad Mohapatra,2014-12-11 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science, i.e., computational intelligence and data mining. Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: (a) knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision-making; (b) the large volume of data managed by organizations makes it impossible to carry out a manual analysis. The book addresses different methods and techniques of integration for enhancing the overall goal of data mining. The book helps to disseminate the knowledge about some innovative, active research directions in the field of data mining, machine and computational intelligence, along with some current issues and applications of related topics.

*Charles Darwin's Natural Selection* Charles Darwin,1987-11-26 Charles Darwin's *On the Origin of Species* is unquestionably one of the chief landmarks in biology. The Origin (as it is widely known) was literally only an abstract of the manuscript Darwin had originally intended to complete and publish as the formal presentation of his views on evolution. Compared with the Origin, his original long manuscript work on Natural Selection, which is presented here and made available for the first time in printed form, has more abundant examples and illustrations of Darwin's argument, plus an

extensive citation of sources.

**Current Developments in Anthropological Genetics** Michael Crawford, 2012-12-06 While the previous two volumes in this series were based upon methodology, theory, and the relationship between ecology and population structure, this book can be viewed as an in-depth case study. The population genetics of a multitude of diverse groups geographically distributed throughout the world was examined in the first two volumes. In contrast, this volume focuses upon a single ethnic group, the Black Caribs (Garifuna) of Central America and St. Vincent Island, and explores the interrelationships among the ethnohistory, sociocultural characteristics, demography, morphology, and genetic structure of the group. This volume offers a broad and intensive treatment of the Black Caribs and their interactions with surrounding populations. My interest in the genetics of the Black Caribs was sparked by an accidental meeting in Amsterdam, Holland, in March 1975. A conversation with Nancie Gonzalez at the Applied Anthropology Meetings revealed the truth-is-stranger-than-fiction history of the Black Carib peoples of the Caribbean. This was a population with a small-sized founding group and a unique biological success story. Nancie Gonzalez was particularly interested in estimating the Carib Indian admixture in the contemporary Garifuna population. Given my previous experience in estimating Spanish and African admixture in the Tlaxcaltecan population (whose gene pool consisted predominantly of Indian alleles), a group that appeared to be primarily African with some Indian admixture was of great interest. Aside from the ethnohistorical interest, I believe that such a population may add considerably to our understanding of the inheritance of complex morphological traits.

**Homi Bhabha: An Introduction and Critique, Volume 3: Political Theory and Practice** Andrew McLaverty-Robinson, 2020-01-31 Homi Bhabha: An Introduction and Critique is a pathbreaking three-volume study of the celebrated postcolonial scholar's work. McLaverty-Robinson's careful reading renders Bhabha's theories in plain English, without losing their meaning. In addition, McLaverty-Robinson's incisive critique cuts through the theoretical aura of Bhabha's work and explores whether his theories work in practice - either empirically or politically. This third and final volume explores the political content and implications of Bhabha's work. It explores Bhabha's political proposals, such as the ideas of a community of suffering and a right to narrate. It also explores Bhabha's relationship to neoliberalism and to the Eurocommunist current in the 1980s, and his critical engagements with liberalism, communitarianism, Marxism, critical race theory, Deleuze and Guattari, and Frantz Fanon. This volume also includes an entire chapter providing a background on neoliberalism, and a comprehensive index covering all three volumes.

**Elastomer-Based Composite Materials** Nikolay Dishovsky, Mihail Mihaylov, 2018-05-15 *Elastomer-Based Composite Materials: Mechanical, Dynamic, and Microwave Properties and Engineering Applications* is focused on elastomer-based composite materials comprising different types of reinforcing fillers. The book provides an informative examination of the

possibilities for broadening the engineering applications of elastomer composites through using various types of hybrid fillers, ferrites, and ceramics, and also examines their synthesis and characterization. It discusses new hybrid fillers that have been synthesized by different techniques, e.g. impregnation of different substrates (carbon black, conductive carbon black, activated carbons, etc.) with silica or magnetite. These new fillers have been thoroughly characterized by standard techniques and by up-to-date methods, such as energy dispersive X-ray spectroscopy in scanning transmission electron microscopy (STEM-EDX), atomic absorption spectroscopy (AAS), and inductively coupled plasma-optical emission spectroscopy (ICP-OES). The effect of those fillers upon the curing properties, mechanical and dynamic parameters, electrical conductivity, and dielectric and microwave characteristics of elastomer-based composites is discussed in detail in this volume. The book also covers the influence of various types of ceramics (SiC, B<sub>4</sub>C, and TiB<sub>2</sub>) and barium and strontium hexaferrites upon the aforementioned properties of rubber composites in conjunction with a view toward solutions for environmental problems caused by waste tires. The book shows that pyrolysis-cum-water vapor is a suitable and environmentally friendly method for the conversion of the waste green tires into useful carbon-silica hybrid fillers. The properties of elastomer-based composites comprising different types of nanostructures (fullerenes, carbon nanotubes, graphene nanoplatelets), modified activated carbons, and calcined kaolin are also discussed. Special attention is paid to composites with lower levels of zinc oxide. The volume provides an abundance of knowledge on the detailed characterization of these fillers and on the curing, mechanical, dynamic mechanical, and dielectric and microwave properties of the elastomeric composites. The book surveys the most recent research activities of the authors, which will make it a vital reference source for scientists in both the academic and industrial sectors, as well as for individuals who are interested in rubber materials. It will be very useful for students, especially PhD students, scientists, lecturers, and engineers working or doing research in the field of polymer materials science, elastomer-based composites and nanocomposites and their engineering applications in the production of microwave absorbers and electromagnetic waves shielding materials, materials for electronics devices and telecommunications.

*Woman of Color, Daughter of Privilege* Kent Anderson Leslie,2010-04-15 This fascinating story of Amanda America Dickson, born the privileged daughter of a white planter and an unconsenting slave in antebellum Georgia, shows how strong-willed individuals defied racial strictures for the sake of family. Kent Anderson Leslie uses the events of Dickson's life to explore the forces driving southern race and gender relations from the days of King Cotton through the Civil War, Reconstruction, and New South eras. Although legally a slave herself well into her adolescence, Dickson was much favored by her father and lived comfortably in his house, receiving a genteel upbringing and education. After her father died in 1885 Dickson inherited most of his half-million dollar estate, sparking off two years of legal battles with white relatives. When the Georgia Supreme Court upheld the will, Dickson became the largest landowner in Hancock County, Georgia, and the wealthiest black woman in the post-Civil War South. Kent Anderson Leslie's portrayal of Dickson is enhanced by a wealth of details about plantation life; the elaborate codes of behavior for men and women, blacks and whites in the South; and the equally complicated circumstances under which racial transgressions were sometimes ignored, tolerated, or even accepted.

*The Works of Charles Darwin, Volume 20* Charles Darwin,2010-02-15 Charles Robert Darwin (1809–1882) has been widely recognized since his own time as one of the most influential writers in the history of Western thought. His books were widely read by specialists and the general public, and his influence had been extended by almost continuous public debate over the past 150 years. New York University Press's new paperback edition makes it possible to review Darwin's public literary output as a whole, plus his scientific journal articles, his private notebooks, and his correspondence. This complete edition contains all of Darwin's published books, featuring definitive texts recording original pagination with Darwin's indexes retained. The set also features a general introduction and index, and introductions to each volume.

**Molecular Biology of Woody Plants** S.M. Jain,S.C. Minocha,2013-04-17 This two-volume book gives a broad coverage of various aspects of plant molecular biology relevant to the improvement of woody plants. The authors provide background information on genetic engineering and molecular marker techniques, and specific examples of species in which sufficient progress has been made.

Handbook of Avian Hybrids of the World Eugene M. McCarthy,2006-02-16 With more than 5,000 works cited, Handbook of Avian Hybrids of the World is the greatest compendium of information ever published on hybridization in birds. Worldwide in scope, it provides information on all reported avian crosses, not only those occurring in captivity, but also in a natural setting (approximately 4,000 crosses are covered). This book is a basic reference, intended both for the serious birder and the professional biologist. McCarthy's work fills a need for reference material that takes into account the last half century of data. It will be of interest to workers in a wide variety of fields, ranging from animal behavior to genetics, ecology, zoology, and systematics. In fact, it will make fascinating reading for anyone interested in birds and the natural world.
