After a significant loss, many people rush to get back a sense of normalcy without allowing themselves time to heal and learn from that loss. Our loving and compassionate God longs to walk with individuals on a transformational journey through loss toward becoming more emotionally and spiritually whole. This book shows readers that God offers an "on ramp" to the process of tending to their pain. What Loss Can Teach Us provides readers with stepping-stones for getting through loss and pain while discovering the lessons they can learn through that process. Including her own story of loss, the author guides us in spiritual practices that helped her heal. While nothing changes its reality, loss can lead to an important juncture where readers will decide if they can trust God to take them through the hard process of growth and healing by allowing themselves to be shaped by the lessons they learn through their recovery. What Loss Can Teach Us can serve as a road map for that transformational journey.

Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to

understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Saundra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory. I am going to do something most authors would not want. As this isn't your usual book, I am therefore encouraging you to read the last chapter (Book 10) first! I know we all want to know the conclusion -- what happens at the end. So do it! Do it because doing so may well give you the context for helping you understand the rest of the book from Book 1 through Book 9! And then read Book 10 again. I didn't write this series of books to say once more what thousands of others have already written... and gotten wrong! This is a narrative of a manager, struggling to do his job and to work effectively with his team/group, tossed out all he had been told and learned... and together, with those who worked with and for him, made some just pretty simple, common-sense changes that turned things around -- seemingly like MAGIC! And because what we did was just part of our daily work, the amazing changes felt like they happened overnight!. Whether you're an experienced manager, a supervisor, team leader, a division head, an administrator/executive -- a CEO or a president - whether you're an employee or someone just starting out, there are thoughts and practices in this book that might just answer some questions you've had and help you be astoundingly successful! I know that latter statement can come across as perhaps over-the-top, but I and those who worked with and for me were able to make things happen that lots of people have talked about, but somehow remained out of reach. And, amazingly, it all happened as just part of the work we did every day -- and not through some special program. Some different ways of doing things and looking at issues/challenges that we ordinarily don't consider led to our turning things around and becoming highly productive where we worked together/collaborated so well. And what was probably most remarkable was that what took place seemed like it happened overnight! Written as a fascinating personal narrative that any manager, supervisor, employee, or executive anyone can identify with... This book is like flipping a switch!! And in telling this compelling story of how a manager, struggling to do his job and work with those in

his group, BAM! HAD THAT BIG, GLARING LIGHT BULB GO ON -- SOMETIMES IT FELT MORE LIKE A HUGE LIGHTNING BOLT! and in making some simple changes which all of us can do, and do as part of the work we do every day -- CREATED A REMARKABLE PLACE OF HEART, CONNECTION, COMMITMENT, AND ASTOUNDING RESULTS! "Teach Your Job" and Watch It Happen Every Day!

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. How Stella Learned to Talk is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, How Stella Learned to Talk will be the indispensable dog book for the new decade. The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on

everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

And the key to success, as with any relationship, is communication. In *Dear Client*, award-winning graphic designer Bonnie Siegler offers an invaluable step-by-step guide to how to talk so creatives will listen, and how to listen when creatives talk. Written as a series of honest, friendly lessons—"Know What You Like," "Decide Who Will Decide," "Focus Groups Suck," "Don't Say 'Make It Yellow,' Say 'Make It Sunny,'" "Serve Lunch During Lunchtime Meetings"—it shows exactly how to deal with the subjectivity, emotional pitfalls, and occasional chaos of a creative partnership. Here's how to articulate your visual goals and set a clear, consistent direction. How to give feedback that works and avoid words that inhibit creative thinking. How to be open to something you didn't imagine. And most of all, how to have fun, save money, and get the results you want.
