In the twenty-first century, as traditional divides are redefined, bargaining over corporate responsibilities has increasingly centred around corporate reputation and the question of whether businesses are part of society's problems or part of their solution. This ground-breaking book treats issues, strategies and societal interaction in a homogenous manner and analyzes the nature of the international bargaining society as it has matured. Discussing and contextualizing contemporary debates on international corporate social responsibility, globalization and the impact of reputation, this key text integrates them into a new and coherent framework: Societal Interface Management. Using this unique framework, it explores the interfaces between international corporations, governments and civil society representatives. Analytic and revealing, the text applies the framework to in-depth studies of Nike, Shell, Triumph International, GlaxoSmithKline and ExxonMobil. It

investigates the conflicts surrounding Burma, blood diamonds, child labour, oil spills, food safety, patents on HIV/AIDS medication and labour rights that have resulted in a large number of disciplining activities. An accompanying website ([www.ib-sm.org](http://www.ib-sm.org)) contains additional case studies, as well as issue dossiers on the challenges confronting international firms. Drawing on a wealth of experience both in research and teaching, the authors have developed a text that integrates reputation, responsibility, ethics and accountability. 'Navigating paradigm changes is a critical element of business leadership: analog to digital; brand to retailer to consumer; reason to emotion; West to East. Anything that illuminates these powershifts is valuable for the fast-moving decision-maker, and in this respect Asian versus Western Management Thinking is a first-rate inquiry into cultural business behaviors. Insular frameworks of thinking and action matter less by the second. I'm an And/And practitioner and my experience of bridging business between East and West, and vice versa, suggests we need to know the human distinctions that matter and the harmonies that will matter even more. Between the covers of this book by Kimio Kase and colleagues, business moves forward.' Kevin Roberts, CEO Worldwide, Saatchi & Saatchi, Lovemarks Company 'Having lived and worked my entire life in various countries around the world, I agree with the authors' premise that Asians and Westerners often approach business problems from different angles. Rather than focusing on differences, I welcome the strength that comes from diversity. As my experience at Renault and Nissan has demonstrated, the richest solutions come when ideas are challenged or questioned by people who have a different perspective. This book illustrates the value of accepting diverging ideas as a fact of life that can be used to enhance the world in which we all live and work.' Carlos

Ghosn, Chairman and Chief Executive Officer, Renault-Nissan Alliance 'A most welcome addition to the unbalanced management literature about the 'analytical' West and the 'synthetic' East. For too long the field has been dominated by comparisons of cultural value systems which paradoxically tell us precious little about how habits of mind influence management thinking and practice in different parts of the world over time. At a time when the world's economic centre of gravity is visibly shifting to Asia, this really is a most timely book.' Nigel Holden, Visiting Research Fellow at the Centre for International Business at the University of Leeds, UK It examines the context in which multi-national companies operate and how the key players interact with each other and with the external business environment. It takes an issues based approach that explores contemporary issues that impact global business activity and examines the managerial responses to those issues. An excellent course text.

The growth of the multinational enterprise (MNE) has led to an increasing interest in international business strategy from scholars, professionals, and policy makers alike. MNEs must contend with challenges in both their home and host international markets, and increasingly uncertain conditions in the international business environment demand superior firm-level capabilities for multinational firms to achieve and maintain competitive advantages in the long-run. This Handbook explores the progress made in international business strategy theory and practice in the last few decades. Written by an international team of leading experts, it captures the differences in motivations and decision-making processes between smaller and larger firms, private, family, and state owned firms, and emerging or developed market multinationals. It elaborates on the links between international strategy and the social responsibilities of the firm in its various host market contexts, including the deployment of effective and ethical human resource practices in international markets. Most importantly, it lays out how the classic principles of international competitive strategy are transformed in today's markets, in great part due to digitalization, and provides suggestions on how MNEs can develop international business strategies to respond to these transformations. The implications of these discussions for strategy and practice are becoming ever more profound. This Handbook will prove a valuable resource for both international business scholars and practitioners.
