A defining work in the burgeoning discipline of international business.

The International Baccalaureate® (IB) was founded in Geneva, Switzerland in 1968 as a non-profit educational foundation that endeavored to develop inquiring, knowledgeable and caring young people who would go on to create a better and more peaceful world through intercultural understanding and respect. What began as a single program for internationally mobile students preparing for college, has grown into a series of programs for students up to age 19. Barron's is pleased to offer a brand new review guide for the IB Mathematics Studies exam. The content of the book is based on the curriculum and covers all topics required for exams beginning in 2014. It includes: An overview of the exam, including an explanation of scoring Thorough review and explanation for all curriculum subjects Extensive review and practice for each topic, including Paper 1 and Paper 2 examples Three full-length paper 1 and 2 practice exams with solutions, and comprehensive explanations Calculator instructions for the TI-84 and TI-Nspire This all-encompassing book also serves as a valuable resource during first year college math courses.

IB Prepared resources are developed directly with the IB to provide the most up-

to-date, authentic and authoritative guidance on DP assessment. IB Prepared: Business Management combines a concise review of course content with strategic guidance, past paper material and exam-style practice opportunities, allowing learners to consolidate the knowledge and skills that are essential to success.

Everyone does research. Some just do it better than others. In this chaotic world of information and misinformation, referred to as “information fog,” university students, in particular, need to learn how to conduct research effectively. Good research is about a quest to discover more, about a burning desire to solve society’s problems and make a better world. Ultimately, research is a way forward to a resolution of life’s greatest difficulties. In this seventh edition of *Research Strategies: Finding Your Way through the Information Fog*, author William Badke walks you step by step through the entire research process—from choosing a topic, to writing the final project, and everything in between. A seasoned researcher and educator, Badke offers tried-and-true tips, tricks, and strategies to help you identify a problem, acquire pertinent information, and use that information to address the problem. Employing a host of examples and humor, *Research Strategies: Finding Your Way through the Information Fog* shows how research can be exciting and fun.

An authorised reissue of the long out of print classic textbook, *Advanced Calculus* by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention *Differential and Integral Calculus* by R Courant, *Calculus* by T Apostol, *Calculus* by M Spivak, and *Pure Mathematics* by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

A dynamic and engaging course with relevant, authentic texts accompanied by creative activities. Explore the five new themes - Identities, Experiences, Human Ingenuity, Social Organisation and Sharing the Planet - with this clearly-structured coursebook. With over 50 per cent new content, lots of text handling exercises and more than 15 audio handling exercises for listening practice, this book helps students tackle the updated English B for the IB Diploma syllabus. Sample exam material, new content for SL and HL oral assessments and references to online videos provide opportunities for students to develop their skills. Answers to coursebook questions are in the teacher's resource and audio for the listening practice is online.

This revised set of resources for Cambridge International AS and A Level Business syllabus (9609) is thoroughly updated for the latest version of the curriculum. Written by experienced authors, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; and case studies contextualise the content making it relevant to international learners. It provides thorough examination support for all papers with exam-style questions with each chapter and an extensive Paper 3 style case study with each unit. The student CD-ROM contains revision aids, further questions and activities. A Teacher's CD-ROM is also available.
