The Americanist community played a vital role in the Cold War, as well as in large part directing the cultural consumption of Soviet society and shaping perceptions of the US. To shed light onto this important, yet under-studied, academic community, Sergei Zhuk here explores the personal histories of prominent Soviet Americanists, considering the myriad cultural influences - from John Wayne's bravado in the film Stagecoach to Miles Davis - that shaped their identities, careers and academic interests. Zhuk's compelling account draws on a wide range of understudied archival documents, periodicals, letters and diaries as well as more than 100 exclusive interviews with prominent Americanists to take the reader from the post-war origins of American studies, via the extremes of the Cold War, thaw and perestroika, to Putin's Russia. Soviet Americana is a comprehensive insight into shifting attitudes towards the US throughout the twentieth century and an essential resource for all Soviet and Cold War historians.

History for the IB Diploma: The Cold War Cambridge University Press

This book focuses on the globalisation of the Cold War in the years 1975-85, highlighting the transformation from bipolar US-Soviet competition to global confrontation. Offering a detailed analysis of this fundamental shift that occurred during this period, as well as the interconnections of this process with the new industrial-technological revolution, this book demonstrates how the United States returned to a position of global economic leadership. In so doing, the book aims to challenge the traditional and misleading paradigm that interprets the gradual development of the Cold War in basic bipolar terms; in fact, most of the factors triggering superpower attitudes and interplay were linked to a complex web of relations with their allies, as well as to the political, economic, social, ideological and military factors structurally intrinsic to the 'peripheral' regions where the confrontation actually took place. Many of the essays in this volume focus on the foreign and security policies of the United States, with the aim of reassessing the Carter administration as the foundation for Reagan's final show-down with the Soviet Union. The contributors, however, go beyond the traditional patterns of foreign policy analysis, giving due attention to transnational phenomena and institutional histories that better explain the gradual transformation in the years that prepared the world for the post-Cold War globalisation era. This book will be of much interest to students of Cold War studies, international history, US foreign policy, European politics and IR in general. Max Guderzo is Professor of the History of International Relations and holds the Jean Monnet Chair of the History of European Unification at the University of Florence. Bruna Bagnato is Associate Professor of the History of International Relations at the University of Florence.

The relationship between the USA and the People's Republic of China (PRC) was the defining factor in the Cold War in Asia - the potentially explosive conflict which, as seen in the Korean War, brought the world to the brink of nuclear disaster. The PRC had not become 'Titoist' as some hoped and remained firmly within the Soviet international orbit. But how did Great Britain and the Republic of China (ROC) fit into this potentially lethal global jigsaw? Steve Tsang has illuminated the history of a seemingly obscure corner of international relations and politics but which was, to contemporaries, at the heart of global survival. He has carried out extensive research in unique Chinese- and English-language sources, both official and private.

"This book is a global history of the Interwar period, which posits a new history for the origins of the Second World War. Jonathan Haslam argues that it was not only the failures of the treaties that ended the First World War that led to the Second, as has traditionally been supposed. Rather, fear of international communism hampered the Great Powers and prevented the necessary diplomatic steps to contain the aggression of Germany and Japan to a much greater extent and much earlier in history than previous scholarship has recognized. Haslam looks at newly discovered and neglected archival materials around the world to show how communism as a social and political force shaped the politics in countries as diverse as Britain, Spain, France, as well as the U.S., China, and European colonies in the 1920s and 1930s. Both Communism and fear of communism were essential components of the period's political and class divides within Europe, the Weimar crisis, the Great Depression, and colonial conflicts around the world. These social factors formed the essential background to the grand political dramas in each country, explaining for example why France seemed timid, Britain appeased, and the U.S. self-isolated. Haslam expertly brings together domestic and international politics as well as the European and Asian theaters to shed new light on this pivotal period of history in new ways. Ultimately, he shows that international communism was much a more significant factor in the diplomatic failures that permitted Japan's increased aggression and Hitler's rise to power than was previously thought"--

First came the news that a flying saucer had landed in Iowa. Then came the announcement that the whole thing was a hoax. End of story. Case closed. Except that two agents of the most secret intelligence agency in the U.S. government were on the scene and disappeared without reporting in. And four more agents who were sent in also disappeared. So the head of the agency and his two top agents went in and managed to get out with their discovery: an invasion is underway by slug-like aliens who can touch a human and completely control his or her mind. What the humans know, they know. What the slugs want, no matter what, the human will do. And most of Iowa is already under their control. Sam Cavanaugh was one of the agents who discovered the truth. Unfortunately, that was just before he was taken over by one of the aliens and began working for the invaders, with no will of his own. And he has just learned that a high official in the Treasury Department is now under control of the aliens. Since the Treasury Department includes the Secret Service, which safeguards the President of the United States, control of the entire nation is near at hand . . . During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.
