Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert,Arno Schlueter,2016-08-15

Consuming over 40% of total primary energy, the built environment is in the centre of worldwide strategies and measures towards a more sustainable future. To provide resilient solutions, a simple optimisation of individual technologies will not be sufficient. In contrast, whole system thinking reveals and exploits connections between parts. Each system interacts with others on different scales (materials, components, buildings, cities) and domains (ecology, economy and social). Whole-system designers optimize the performance of such systems by understanding interconnections and identifying synergies. The more complete the design integration, the better the result. In this book, the reader will find the proceedings of the 2016 Sustainable Built Environment (SBE) Regional Conference in Zurich. Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment.

Joined-Up Government Vernon Bogdanor,2005-07-21 'Joined- up government' is a key theme of modern government. The Labour government, first elected in 1997, decided that intractable problems such as social exclusion, drug addiction and crime could not be resolved by any single department of government. Instead, such problems had to be made the object of a concerted attack using all the arms of government - central and local government and public agencies, as well as the private and voluntary sectors. This book seeks to analyse 'joined-up government', to consider its history, and to evaluate its consequences for British institutions such as the Cabinet, the civil service and local authorities. Is joined-up government a new idea, or merely a new label for a very old idea? What lessons can be learnt from previous attempts at joined-up government? How does it affect our traditional constitutional conceptions relating to Cabinet government, a politically neutral and non-partisan civil service, and an independent system of local government? Will it lead to the concentration of power in 10 Downing Street or is it compatible with a political system based on checks and balances? Drawing together

papers given at a conference held at the British Academy, *Joined-Up Government* provides a broad overview of one of the most significant aspects in modern government. Its contributors include not only distinguished academics, but also those who have themselves been engaged as practitioners in developing joined-up programmes. This book will be indispensable to all those who seek to understand how new developments in government are affecting our lives.

Managing Change and Innovation in Public Service Organizations Kerry Brown, Stephen P. Osborne, 2012-10-02 The context and environment of public services is becoming increasingly complex and the management of change and innovation is now a core task for the successful public manager. This text aims to provide its readers with the skills necessary to understand, manage and sustain change and innovation in public service organizations. Key features include: the use of figures, tables and boxes to highlight ideas and concepts of central importance a dedicated case study to serve as a focus for discussion and learning, and to marry theory with practice clear learning objectives for each chapter with suggestions for further reading. Providing future and current public managers with the understanding and skills required to manage change and innovation, this groundbreaking text is essential reading for all those studying public management, public administration and public policy.

Music Therapy Leslie Bunt, Brynjulf Stige, 2014-04-24 Music therapy is recognised as being applicable to a wide range of healthcare and social contexts. Since the first edition of *Music Therapy: An art beyond words*, it has extended into areas of general medicine, mainstream education and community practice. This new edition revises the historical and theoretical perspectives and recognises the growing evidence and research base in contemporary music therapy. Leslie Bunt and Brynjulf Stige document the historical evolution of music therapy and place the practice within seven current perspectives: medical, behavioural, psychoanalytical, humanistic, transpersonal, culture-centred and music-centred. No single perspective, individual or group approach is privileged, although the focus on the use of sounds and music within therapeutic relationships remains central. Four chapters relate to areas of contemporary practice across different stages of the lifespan: child health, adolescent health, adult health and older adult health. All include case narratives and detailed examples underpinned by selected theoretical and research perspectives. The final two chapters of the book reflect on the evolution of the profession as a community resource and the emergence of music therapy as an academic discipline in its own right. A concise introduction to the current practice of music therapy around the world, *Music Therapy: An art beyond words* is an invaluable resource for professionals in music therapy and music education, those working in the psychological therapies, social work and other caring professions, and students at all levels.

2020 Development Effectiveness Review Asian Development Bank,2021-04-01 This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 14th in the series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where the institution's performance needs to be strengthened.

Macroeconomic Imbalances European Commission. Directorate-General for Economic and Financial Affairs,2012 On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific in-depth reviews should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

English Medium Instruction Ernesto Macaro,2018-02-19 Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. “This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale.” Guangwei Hu, National Institute of Education, Singapore

Health in the 21st Century ,2019 This report explores how data and digital technology can help achieve policy objectives and drive positive transformation in the health sector while managing new risks such as privacy, equity and implementation costs. It examines the following topics: improving service delivery models; empowering people to take an active role in their health and their care; improving public health; managing biomedical technologies; enabling better collaboration across borders; and improving health system governance and stewardship. It also examines how health workforces should be equipped to make the most of digital technology. The report contains findings from surveys of OECD countries and shares a range of examples that illustrate the potential benefits as well as challenges of the digital transformation in the health sector. Findings and recommendations are relevant for policymakers, health care providers, payers, industry as well as patients, citizens and civil society.
