Bread, Wine, Chocolate Simran Sethi,2015-11-10 Award-winning journalist Simran Sethi explores the history and cultural importance of our most beloved tastes, paying homage to the ingredients that give us daily pleasure, while providing a thoughtful wake-up call to the homogenization that is threatening the diversity of our food supply. Food is one of the greatest pleasures of human life. Our response to sweet, salty, bitter, or sour is deeply personal, combining our individual biological characteristics, personal preferences, and emotional connections. Bread, Wine, Chocolate illuminates not only what it means to recognize the importance of the foods we love, but also what it means to lose them. Award-winning journalist Simran Sethi reveals how the foods we enjoy are endangered by genetic erosion—a slow and steady loss of diversity in what we grow and eat. In America today, food often looks and tastes the same, whether at a San Francisco farmers market or at a Midwestern potluck. Shockingly, 95% of the world's calories now come from only thirty species. Though supermarkets seem to be stocked with endless options, the differences between products are superficial, primarily in flavor and brand. Sethi draws on interviews with scientists, farmers, chefs, vintners, beer brewers, coffee roasters and others with firsthand knowledge of our food to reveal the multiple and interconnected reasons for this loss, and its consequences for our health, traditions, and culture. She travels to Ethiopian coffee forests, British yeast culture labs, and Ecuadoran cocoa plantations collecting fascinating stories that will inspire readers to eat more consciously and purposefully, better understand familiar and new foods, and learn what it takes to save the tastes that connect us with the world around us.

Sweet, Reinforced and Fortified Wines Fabio Mencarelli,Pietro Tonutti,2013-04-16 Wines from Grape Dehydration is the first of its kind in the field of grape dehydration - the controlled drying process which produces a special group of wines. These types of wine are the most ancient, made in the Mediterranean basin, and are even described in Herodotus. Until few years ago, it was thought that these wines - such as Pedro Ximenez, Tokai, Passito, and Vin Santo - were the result of simple

grape drying, because the grapes were left in the sun, or inside greenhouses that had no controls over temperature, relative humidity or ventilation. But Amarone wine, one of the most prized wines in the world, is the first wine in which the drying is a controlled process. This controlled process - grape dehydration - changes the grape at the biochemical level, and involves specialist vine management, postharvest technology and production processes, which are different from the typical wine-making procedure. After a history of grape dehydration, the book is then divided into two sections; scientific and technical. The scientific section approaches the subjects of vineyard management and dehydration technology and how they affect the biochemistry and the quality compounds of grape; as well as vinification practices to preserve primary volatiles compounds and colour of grape. The technical section is devoted to four main classes of wine: Amarone, Passito, Pedro Ximenez, and Tokai. The book then covers sweet wines not made by grape dehydration, and the analytical/sensorial characteristics of the wines. A concluding final chapter addresses the market for these special wines. This book is intended for wineries and wine makers, wine operators, postharvest specialists, vineyard managers/growers, enology/wine students, agriculture/viticulture faculties and course leaders and food processing scientists

Alexander Dumas Dictionary Of Cuisine Dumas,2014-01-21 First published in 2005. A cookery book by the author of *The Three Musketeers* and *The Count of Monte Cristo* may seem an improbability. Yet Alexandre Dumas was an expert cook-his love of food was said to be equalled only by his love of women - and his *Great Dictionary of Cuisine*, written to be read by worldly people and used by professionals and published posthumously in 1873, it is a masterpiece in its own right. This abridged version of the Dictionary is designed to be both useful and entertaining. A glance at the Index will show that there are hundreds of recipes - for sauces, soups, meat, fish, eggs, poultry and game - not all kitchen-tested with modern ingredients, but well within the scope of an experienced and imaginative cook.
