Civil society activism around issues of global justice has proliferated in Europe during the past two decades. Has such contestation and advocacy made a difference? This book examines whether and how the organizations, networks and campaigns involved have attained their policy objectives in the areas of debt relief, international trade, international taxation and corporate accountability. The analysis also considers the relationship between national and transnational activism. By comparing variations in the "activism-policy nexus" in France, Italy and the United Kingdom, it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts.

People's Tribunals are independent, peaceful, grassroots movements, created by members of civil society, to address impunity that is associated with ongoing or past atrocities. As such, they offer society an alternative history and create a space for healing and reconciliation to take place that may otherwise be stifled by political agendas and legal technicalities. Since the 1960's, People's Tribunals have grown and developed to address many kinds of situations, from genocide to environmental degradation. This book presents a balance of academic and practitioner perspectives on People's Tribunals. It explores key questions relating to their formation and roles and discusses what they can offer to victims and survivors. The volume provides an introduction to the subject, theoretically informed discussion reflecting different perspectives, and a range of contributions focusing on different types of People's Tribunals and various aspects of their operation. The authors analyse advantages and disadvantages of these movements in a variety of contexts. The impact and contribution they have in the international criminal law and international human rights context is also discussed. The book will be welcomed by those interested in international criminal law, human rights, environmental justice, transitional justice and international relations.

Italian intellectuals played an important role in the shaping of international politics during the Cold War. The visions of the world that they promulgated, their influence on public opinion and their ability to shape collective speech, whether in agreement with or in opposition to those in power, have been underestimated and understudied. This volume marks one of the first serious attempts to assess how Italian intellectuals understood and influenced Italy's place in the post-World War II world. The protagonists represent the three key post-war political cultures: Catholic, Marxist and Liberal Democratic. Together, these essays uncover the role of such intellectuals in institutional networks, their impact on the national and transnational circulation of ideas and the relationships they established with a variety of international associations and movements.

Peoples' Tribunals and International Law is the first book to analyse how civil society tribunals implement and develop international law. With contributions covering tribunals in Europe, Latin America and Asia, this edited collection provides cross-disciplinary academic and activist perspectives and unique insights into the phenomenon of peoples' tribunals. Written by academics in law, anthropology and international relations, it also incorporates the reflections of civil society activists and advocates on peoples' tribunals. The collection includes chapters ranging from the Permanent Peoples' Tribunal, successor to the Bertrand Russell Tribunal established to question the legality of the Vietnam War, to recent tribunals addressing atrocities in Soeharto's Indonesia and violations against migrants in Europe. Peoples' Tribunals and International Law offers the first sustained analysis of the different approaches to international law in tribunal proceedings. It will interest scholars of law, criminology, human rights, politics, sociology, anthropology and international relations.

Informed by critical theory, the essays in this collection examine the complex dynamics of globalization, the challenges that confront democracy, justice and rights under globalization, and new approaches that seek to contest the excesses of globalization and promote the struggle for global justice. They form a challenging and timely volume that will be essential reading for anyone interested in the normative dimensions of globalization.
