The essays collected in this volume, most previously unpublished, address a number of closely interconnected issues raised by the comparative syntax of functional heads within the Principles-and-Parameters approach. The general theory of head movement, the properties of derived structures created by incorporation, and the parameterization involved are the main theoretical foci. One major empirical area which is addressed concerns head movement in configurations involving certain kinds of operator-like elements, for example, the different manifestations of Verb Second phenomena in Wh and other constructions and the syntax of negative heads and specifiers. In addition, properties of functional heads and head movement in nominal and clausal structures and the causative construction are investigated.

'I should have written you after my first reading of *The Living Currency*; it was already breath-taking and I should have responded. After reading it a few more times, I know it is the best book of our times.' Letter to Pierre Klossowski from Michel Foucault, winter 1970. *Living Currency* is the first English translation of Klossowski's *La monnaie vivante*. It offers an analysis of economic production as a mechanism of psychic production of desires and is a key work from this often overlooked but wonderfully creative French thinker.

Argues that affirming the irreducible differences between men and women can lead to more transformative politics than the struggle for abstract equality between the sexes. In *The Symbolic Order of the Mother* Luisa Muraro identifies the bond between mother and child as ontologically fundamental to the development of culture and politics, and therefore as key to achieving truly emancipatory political change. Both corporeal development and language acquisition, which are the sources of all thinking, begin in this relationship. However, Western civilization has been defined by men, and Muraro recalls the admiration and envy she felt for the great philosophers as she strove to become one herself, as well as the desire for independence that opposed her to her

mother. This conflict between philosophy and culture on the one hand and the relationship with the mother on the other constitutes the root of patriarchy's symbolic disorder, which blocks women's (and men's) access to genuine freedom. Muraro appeals to the feminist practice of gratitude to the mother and the recognition of her authority as a model of unconditional nurture and support that must be restored. This, she argues, is the symbolic order of the mother that must overcome the disorder of patriarchy. The mediating power of the mother tongue constitutes a symbolic order that comes before all others, for both women and men.

A sincere tribute to the world renowned phenomenon of Made in Italy on the occasion of two memorable dates: the fiftieth anniversary of the first Italian fashion show (Florence, 1951) and the fortieth anniversary of the International Furniture Show (Milan, 1961). The book, devoted to fifty years of Italian fashion and design, examines the complex mosaic of Made in Italy divided into different aspects and themes: --

Growing up in the mountains of Japan, Yayoi Kusama (b. 1929) dreamed of becoming an artist. One day, she had a vision in which the world and everything in it--the plants, the people, the sky--were covered in polka dots. She began to cover her paintings, drawings, sculptures, and even her body with dots. As she grew up, she traveled all around the world, from Tokyo to Seattle, New York to Venice, and brought her dots with her. Different people saw these dots in different ways--some thought they were tiny, like cells, and others imagined them enormous, like planets. Every year, Kusama sees more of the world, covering it with dots and offering people a way to experience it the way she does. Written by Sarah Suzuki, a curator at The Museum of Modern Art, and featuring reproductions of Kusama's instantly recognizable artworks, this colorful book tells the story of an artist whose work will not be complete until her dots cover the world, from here to infinity.

Questo volume introduce alla lettura di alcuni dilemmi morali in medicina, da quelli più comuni a quelli di frontiera, commentando più di settanta film e collegandoli ad altri trecentosettanta. Di ciascuna pellicola principale, recensita in una scheda specifica, è sintetizzata la trama, evidenziato un gruppo di parole chiave ed offerta una breve analisi valutativa. I temi di bioetica, dalla clonazione ai trapianti, dalla procreazione assistita all'eutanasia, per fare alcuni esempi, sono purtroppo talvolta trattati con superficialità nei servizi di cronaca o affrontati con giudizi alquanto schematici. Il cinema può essere un valido strumento di approfondimento in quanto coinvolge direttamente lo spettatore nel cuore di situazioni complesse, disegna rappresentazioni sociali e vissuti individuali emotivamente ricchi, apre prospettive inedite nella descrizione della realtà e svolge con coerenza narrativa alcune alternative comportamentali in merito alle quali occorre prendere una decisione nella vita reale. Il cinema, come la letteratura in genere, mette inoltre alla prova le teorie morali generali e prepara, attraverso le sue finzioni, un'interpretazione più fedele del significato dei gesti, delle storie, degli atteggiamenti su cui l'etica, in un contesto pluralistico, ha il compito di esprimere valutazioni razionali fondate e comprensibili. L'autore, docente di bioetica, propone un itinerario narrativo per affrontare i dilemmi morali che segnano le storie di malattia. Grazie alla scansione per argomenti, alla chiarificazione dei concetti fondamentali, ai collegamenti fra i film, ai commenti sulle soluzioni drammatiche, il lettore potrà percepire più criticamente i valori in conflitto, mettere a tema le proprie reazioni emotive e sarà sollecitato ad elaborare ragionamenti a favore o contro una tesi etica, affinando le proprie capacità di analisi e dialogo e dialogo.

A tour de force of love and loneliness, war and art, *Killing Commendatore* is a stunning work of imagination from one of our greatest writers. When a thirty-something portrait painter is abandoned by his wife, he secludes himself in the mountain home of a world famous artist. One day, the young painter hears a noise from the attic, and upon investigation, he discovers a previously unseen painting. By unearthing this hidden work of art, he unintentionally opens a circle of mysterious circumstances; and to close it, he must undertake a perilous journey into a netherworld that only Haruki Murakami could conjure.

A darkly humorous exploration of the human body and its various functions in poetic prose, Valerio Magrelli’s *The Condominium of the Flesh*, a personal chronicle of his clinical experience, catalogues a life history of ailments without ever being pathological. Research on touch and blindness has undergone rapid transformation in recent years, with dramatic developments in technology designed to provide assistance to those who are blind, and advancements in robotics that demand haptic interfaces. *Touch and Blindness* approaches the study of the topic from the perspectives of psychological methodology and the most sophisticated, state-of-the-art techniques in neuroscience. This book, edited by well-known leaders in the field, is derived from the discussions presented by speakers at a conference held in 2002, and presents current research in the field. The book is arranged in a logical, disciplinary fashion, first discussing touch and blindness from a psychological perspective, followed by an examination from the perspective of neuroscience. Some specific topics include: *processing spatial information from touch and movement; *form, projection, and pictures for the blind; *neural substrate and visual and tactile object representations; and *the role of visual cortex in tactile processing. *Touch and Blindness* is ideal for researchers in psychology and neuroscience, medicine, and special education.

Mirror neurons are one of the most extraordinary discoveries of contemporary neuroscience. They explain, on a scientific level, why we understand other people's behavior to a deep degree. They were discovered by Professor Giacomo Rizzolatti, who wrote the preface to this book. Our aim here is to provide basic knowledge of the key concepts of this discovery through the use of clear language and many illustrations. The book also covers the effects of mirror neurons in our daily lives and in the

mechanisms that regulate social interactions, so we can learn how to handle them in a more effective way.

Tiré du site Internet de JRP/Ringier : "Matias Faldbakken (*1973) is an artist and writer living in Oslo. Son of the celebrated Norwegian author Knut Faldbakken, he has published two novels, "The Cocka Hola Company" and "Macht und Rebel" under the alias Abo Rasul. Drenched with acid humor and continuously hitting below the waist, his books immediately caused a considerable stir in Norway. If, in these publications, he underlines the differences and similarities between the so-called underground and the mainstream, and between the "independent" and the "commercial" in everyday life, these subjects are also central to his art practice. Fascinated with systems of knowledge, power, order, and exchange, he shows an interest in understanding how art and artists can be active participants in these systems. Faldbakken studied at the National Academy of Fine Arts in Bergen as well as at the Städelschule in Frankfurt am Main. He represented Norway in the Nordic Pavillion at the Venice Biennial in 2005, as well as showing his work in the Wrong Gallery at the Whitney Biennial, the Stedelijk Museum Amsterdam, the National Museum Oslo, the Sydney Biennial and the KW Institute for Contemporary Art Berlin, among others."

Journey with a young boy as he explores the full range of emotions that everyone feels.

The love of a mother for her little girl permeates a walk they take together on an autumn day. The animals of the forest have assembled to discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk or the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. *The Most Important Thing* received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable.

Olga the cloud's wonderful day comes to an end when, after being chased off the moon where she was trying to nap, she has a terrible time finding the right place to make some rain.

Shapes reshape themselves into different animals.

This book is intended to explore at an international level the works of some of the emerging artists who use the photographic medium without adopting the generic schemata of traditional photography.

Sonia Delaunay (1885-1979), painter and textile, theater, and fashion designer, made enormous contributions to the development of abstraction in the early 1910s, partly because of her son, Charles. In this new book, Delaunay and six-year-old Charles have a fantastical adventure in a world of color and form, a magical road trip in their car, modeled after her 1925 design for a Citroen convertible. They glide into a landscape of colors and shapes drawn from Delaunay's early abstract compositions--it's as if they've driven into one of her paintings. Mother and son also explore the artist's gorgeous, colorful designs for fabrics and clothing. Throughout, Delaunay helps Charles understand her artistic process and that of her husband, artist Robert Delaunay, by asking him what shapes and colors he recognizes along the way. They end up back in the real world, and Charles realizes that his mother's thoughts about art permeate every aspect of their life.

On the first night of winter, Little Miss Bear will not go to sleep. She simply refuses. "Winter is for sleeping," Mother Bear tells her. "But why, Mother?" Little Miss asks. "Because that's what bears do. All bears sleep, all winter long." All winter long is much too long for Little Miss Bear. In 1858, Cyprian Clamorgan wrote a brief but immensely readable book entitled *The Colored Aristocracy of St. Louis*. The grandson of a white voyageur and a mulatto woman, he was himself a member of the "colored aristocracy." In a setting where the vast majority of African Americans were slaves, and where those who were free generally lived in abject poverty, Clamorgan's "aristocrats" were exceptional people. Wealthy, educated, and articulate, these men and women occupied a "middle ground." Their material advantages removed them from the mass of African Americans, but their race barred them from membership in white society. *The Colored Aristocracy of St. Louis* is both a serious analysis of the social and legal disabilities under which African Americans of all classes labored and a settling of old scores. Somewhat malicious, Clamorgan enjoyed pointing out the foibles of his friends and enemies, but his book had a serious message as well. "He endeavored to convince white Americans that race was not an absolute, that the black community was not a monolith, that class, education, and especially wealth, should count for something." Despite its fascinating insights into antebellum St. Louis, Clamorgan's book has been virtually ignored since its initial publication. Using deeds, church records, court cases, and other primary sources, Winch reacquaints readers with this important book and establishes its place in the context of African American history. This annotated edition of *The Colored Aristocracy of St. Louis* includes an introductory essay on African Americans in St. Louis before the Civil War, as well as an account of the lives of the author and the members of his remarkable family—a family that was truly at the heart of the city's "colored aristocracy" for four generations. A witty and perceptive commentary on race and class, *The Colored Aristocracy of St. Louis* is a remarkable story about a largely forgotten segment of nineteenth-century society. Scholars and general readers alike will appreciate Clamorgan's insights into one of antebellum America's most important communities. "Full of fun and great for beginning readers to learn to sequence from left to right. Lift each flap in turn to discover something unexpected." --P. [4] of cover.
