In this book recent results of the GARTEUR (Group for Aeronautical Research and Technology in Europe) Action Group FM (AG11) are presented. The book focuses on analysis techniques for the flight clearance of highly augmented aircrafts, including contributions of 20 European aeronautical organisations such as National Research Centers, Aerospace Industries and Universities. The tasks and requirements of the Industrial Clearance Process for Flight Control Laws are presented as well as classical and particularly new analysis methods. The different methods are evaluated and compared and their potential application to Civil Aircraft is demonstrated.

Today's mining professionals face unparalleled challenges brought about by globalization and increased environmental awareness. The pressure is on to enhance corporate reputations, achieve higher operational efficiency, improve planning and control, gain access to mineral resources, build trust with stakeholders, attract financing, recruit and retain a quality workforce, and lower costs. Sustainable Management of Mining Operations provides a holistic, practical approach to achieving these goals. The key, say the authors, is to create a culture within the organization that recognizes the value of sustainability by effectively integrating economic, environmental, and social considerations. They explore the three management functions that are instrumental in shaping this culture: corporate strategy, human resources, and operations. Each section of this book focuses on sustainable management from a different perspective, management level, or stage of the mine life cycle. You'll benefit from real-life, practical insights from 27 internationally respected authors whose job titles have encompassed everything from CEO to master mechanic. Focusing on real-life experience and not abstract theory, you'll learn first hand from case histories written by those who "got their hands dirty." You'll see how leading-edge companies are leveraging culture, strong leadership, and organizational structure to capitalize on sustainability. Sustainable Management of Mining Operations is required reading for mining professionals with operations, human resources, external affairs, or environmental health and safety responsibilities. The book is also a powerful, forward-looking resource for faculty and students in mining studies programs.

Enrique Dussel is considered one of the founding philosophers of liberation in the Latin American tradition, an influential arm of what is now called decoloniality. While he is astoundingly prolific, relatively few of his works can be found in English translation - and none of these focus specifically on education. Founding members of the Latin American Philosophy of Education Society David I. Backer and Cecilia Diego bring to us Dussel's THE PEDAGOGICS OF LIBERATION: A Latin American Philosophy of Education, the first English translation of Dussel's thinking on education, and also the first translation of any part of his landmark multi-volume work Towards an Ethics of Latin American Liberation. Dussel's oeuvre is an impressive intellectual mosaic that uses Europeans to disrupt European thinking. This mosaic has at its center French philosopher Emmanuel Levinas, but also includes Ancient Greek philosophy, Thomist theology, modern Enlightenment philosophy, analytic philosophy of language, Marxism, psychoanalysis (Freud, Klein, evolutionary psychology, neuroscience), phenomenology (Sartre, Heidegger, Husserl, Hegel), critical theory (Frankfurt School, Habermas), and linguistics. Dussel joins these traditions to Latin American history, literature, and philosophy, specifically the work of Octavio Paz, Ivan Illich, and the philosophers of liberation whom Dussel studied with in Argentina before his exile to Mexico in the late 1970s. Drawing heavily from the ethical philosophy of Emmanuel Levinas, Dussel examines the dominating and liberating features of intimate, concrete, and observable interactions between different kinds of people who might sit down and have face-to-face encounters, specifically where there may be an inequality of knowledge

and a responsibility to guide, teach, learn, care, or study: teacher-student, politician-citizen, doctor-patient, philosopher-nonphilosopher, and so on. Those occupying the superior position of these face-to-face encounters (teachers, politicians, doctors, philosophers) have a clear choice for Dussel when it comes to their pedagogics. They are either open to hearing the voice of the Other, disrupting their sense of what is and should be by a newness beyond what they know; or, following the dominant pedagogics, they can try to communicate and instruct their sense of what is and should be to the (supposed) tabula rasas in their charge. Dussel calls that sense of what is and should be "lo Mismo." This groundbreaking translation makes possible a face-to-face encounter between an Anglo Philosophy of Education and Latin American Pedagogics. "Pedagogics" should be considered as a type of philosophical inquiry alongside ethics, economics, and politics. Dussel's pedagogics is a decolonizing pedagogics, one rooted in the philosophy of liberation he has spent his epic career articulating. With an Introduction by renowned philosopher Linda Martin Alcoff, this book adds an essential voice to our conversations about teaching, learning, and studying, as well as critical theory in general. ENRIQUE DUSSEL was born in 1934 in the town of La Paz, in the region of Mendoza, Argentina. He first came to Mexico in 1975 as a political exile and is currently a Mexican citizen, Professor in the Department of Philosophy at the Iztapalapa campus of the Universidad Autónoma Metropolitana (Autonomous Metropolitan University, UAM), and also teaches courses at the Universidad Nacional Autónoma de México (National Autonomous University of Mexico, UNAM). He has an undergraduate degree in Philosophy (from the Universidad Nacional de Cuyo/National University of Cuyo in Mendoza, Argentina), a Doctorate from the Complutense University of Madrid, a Doctorate in History from the Sorbonne in Paris, and an undergraduate degree in Theology obtained through studies in Paris and Münster.

This book is aimed at helping both newly trained and experienced mental health professionals become comfortable and adept in using hypnosis in their clinical practice. Despite dramatic evidence of the effectiveness of hypnosis and its growing acceptance, only a small percentage of psychotherapists employ their hypnotherapy training in their practices. This under-use of hypnosis is due to exaggerated misconceptions about its power and the resultant performance anxiety therapists experience after their training. This text is designed to address therapist performance anxiety surrounding the use of hypnosis by exploring the myths surrounding its power and therapeutic potential. The integration of a straightforward systematic hypnotic approach into therapeutic practice has value both in assessment and treatment. Using clinical anecdotes and personal experience, the authors of *Hypnosis in Clinical Practice* explain induction style and trance work in a way that is fundamental and highly accessible.

And here is where I fall. Mina Daaé dreams of performing on Broadway. Like her great ancestor, Christine Daaé, who sang at the prestigious Palais Garnier a hundred years before, Mina has the voice of an angel. But after graduating from Conservatoire de Paris, fortune fails her. Until the circus comes to town. Mina's close friend Toni Vollini offers her a role in his new Broadway play mixing Mozart with clowns. Known as The Harlequin, the musical is an inimitable adaptation of the opera Don Giovanni. Toni says Mina will soar, but with pathologic acrophobia, she's afraid she'll fall. And the ghost in her head says she will. Toni and a ghost vie for her love, but Mina thinks her ghost is just another hallucination. Or is her ghost a phantom of the opera? Phantom Masquerade is a contemporary adaptation of Gaston Leroux's Phantom of the Opera integrating romance and the paranormal. Book Excerpt: ...table to God. The hope of salvation, as it was the only cause of his entrance into that communion, so it can be the only reason of his stay there. For if afterwards he discover anything either erroneous in the doctrine or incongruous in the worship of that society to which he has joined himself, why should it not be as free for him to go out as it was to enter? No member of a religious society can be tied with any other bonds but what proceed from the certain expectation of eternal life. A church, then, is a society of members voluntarily uniting to that end. It follows now that we consider what is the power of this church and unto what laws it is subject. Forasmuch as no society, how

free soever, or upon whatsoever slight occasion instituted, whether of philosophers for learning, of merchants for commerce, or of men of leisure for mutual conversation and discourse, no church or company, I say, can in the least subsist and hold together, but will presently dissolve and break in pieces, unless it...

The first book to present Gilles Deleuze's philosophy in language the nonphilosopher can understand. This book is a map of the work of Gilles Deleuze—the man Michel Foucault would call the "only real philosophical intelligence in France." It is not only for professional philosophers, but for those engaged in what Deleuze called the "nonphilosophical understanding of philosophy" in other domains, such as the arts, architecture, design, urbanism, new technologies, and politics. For Deleuze's philosophy is meant to go off in many directions at once, opening up zones of unforeseen connections between disciplines. Rajchman isolates the logic at the heart of Deleuze's philosophy and the "image of thought" that it supposes. He then works out its implications for social and cultural thought, as well as for art and design—for how to do critical theory today. In this way he clarifies the aims and assumptions of a philosophy that looks constantly to invent new ways to affirm the "free differences" and the "complex repetitions" in the histories and spaces in which we find ourselves. He looks at the particular realism and empiricism that this affirmation implies and how they might be used to diagnose new forces confronting us today. In the process, he explores the many connections that Deleuze himself constructs in working out his philosophy, with the arts, political movements, even the neurosciences and artificial intelligence.

Seminar paper from the year 2018 in the subject Tourism, grade: 1,3, University of Applied Sciences Kempten, language: English, abstract: Tourismus ist ein wichtiger Wirtschaftszweig und beschäftigt Millionen von Menschen weltweit. Die Zahl der Reisenden steigt kontinuierlich an und es ist kein Ende in Sicht. Diese Entwicklung beeinflusst zunehmend die Hotellerie, denn es entwickelt sich ein starker Wettbewerb zwischen kleinen und mittelständigen Hotels. Die Aufgabe der Hotels ist es also, möglichst rentable Kundenbeziehungen aufzubauen, um weiterhin am Markt präsent zu sein. In der Vergangenheit reichte es aus, die Kunden zufrieden zu stellen, doch dies ist heutzutage längst nicht genug. Die Hotels müssen einen hervorragenden Service anbieten, um die Kundenwünsche zu übertreffen und sich dadurch einen Vorteil gegenüber der Konkurrenz zu verschaffen. Durch die technologischen Entwicklungen im Bereich Künstliche Intelligenz, gibt es immer mehr Möglichkeiten, die hierfür genutzt werden können. Der Einsatz von Maschine Learning, Natural Language Processing und Robotern bietet Hotelmanagern die nötigen Voraussetzungen. Der Dienstleistungssektor ist jedoch stark von Menschen geprägt und somit stellt sich die Frage, inwiefern Künstliche Intelligenz die Kundenzufriedenheit und das Erlebnis im Hotel verbessern kann. Diese Hausarbeit widmet sich der beschriebenen Problematik und versucht durch eine Literaturrecherche die Thematik zu erforschen.

Dave Morrison's poems are full of surprises; tenderness when you least expect it, dark humor you don't see coming, earnestness colliding with smartassery, and onion-like layers of meaning. Hailed as 'A hearty weed in the garden of American poetry' Dave Morrison's poems have been published in literary magazines and anthologies, and featured on

Writer's Almanac and Take Heart. After years of playing guitar in rock & roll bars in Boston and NYC, Dave currently resides in coastal Maine. Shake Hands with Your Heart is his tenth collection of poetry. "There is no voice quite like his. What shines in every poem is musical sound and rhythm, grittiness, reality, humor, and the rare ability to tackle serious subjects without taking himself too seriously. There is a wonderful, refreshing lack of pretentiousness and self-pity in all his poems and books." Alice Persons, Editor and Publisher, Moon Pie Press "By tapping into his tumultuous past, Morrison has created work that is not only technically sound, but viscerally engaging. His is no passive verse; it grabs you by the collar and demands your attention." John Locke's Letter Concerning Toleration (1689) is one of the most widely-read texts in the political theory of toleration, and a key text for the liberal tradition. However, Locke also defended toleration more extensively in three subsequent Letters, which he wrote in response to criticism by an Anglican cleric, Jonas Proast. This edition, which includes a new translation of the original Letter, by Michael Silverthorne, enables readers to assess John Locke's theory of toleration by studying both his classic work and essential extracts from the later Letters. An introduction by Richard Vernon sets Locke's theory in its historical context and examines the key questions for contemporary political theorists which arise from this major work in the history of political thought.
