

Improving Students Speaking Ability Through Repetition Drill

With the Common Core State Standards emphasizing listening and speaking across the curriculum, these long-neglected language arts are regaining a place in schools. For teachers, this means reexamining practices and rethinking expectations. How much do we know about teaching listening and speaking as the complex communication skills they are? How do we teach students to discuss appropriately, integrate and understand the mountains of information they receive, and express themselves clearly and effectively? In this lively and practical book, 20-year teaching veteran Erik Palmer presents an approach aligned to the six Common Core anchor standards for speaking and listening but focused on preparing students for 21st century communication inside and beyond the classroom. Here, you'll get concrete guidance for teaching and assessing * Collaborative discussion * Listening and media literacy * Questioning and reasoning * Speech presentation * Effective multimedia use * Adapting speech to different content and tasks With due respect to reading and writing, we do most of our communicating—in the classroom and in life—through listening and speaking. Filled with examples and specific activities targeted to variety of subjects and grade levels, this book is an essential resource for all teachers interested in helping students acquire core skills that cross the content areas and support long-term success.

"Drawing on wide-ranging literature from a variety of relevant disciplines, as well as their own extensive experience in teaching spoken English, the authors give a fascinating, comprehensive, and insightful account of the nature of second language speaking skills. The research and theory they survey then serves as the basis for the principles, strategies, and procedures they propose for the teaching of spoken English. This book will, therefore, provide an invaluable resource for teachers, teachers in training, and researchers, providing both a state-of-the-art survey of the field as well as a source of practical ideas for those involved in planning, teaching, and evaluating courses and materials for the teaching of spoken English"--

The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of *The Origins of Totalitarianism* Sparking a flurry of heated debate, Hannah Arendt's authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of articles in *The New Yorker* in 1963. This revised edition includes material that came to light after the trial, as well as Arendt's postscript directly addressing the controversy that arose over her account. A major journalistic triumph by an intellectual of singular influence, *Eichmann in Jerusalem* is as shocking as it is informative—an unflinching look at one of the most unsettling (and unsettled) issues of the twentieth century.

The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist*, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Since its original publication in 1968, Rivers's comprehensive and practical text has become a standard reference for both student teachers and veteran instructors. Academic Paper from the year 2021 in the subject Didactics - English - Pedagogy, Literature Studies, Misurata University, language: Arabic, abstract: This paper is done for two objectives. The first objective is to investigate the profile of students' speaking ability before the implementation of the direct method. Then, the second one is to describe whether the direct method is an effective method to improve speaking ability or not. This study took place at Shohada Abu-Rwiaya Secondary School. The sample was 26 students of the 2nd secondary year, they all were in the same level of English. The method in this study was Action Research which consisted of three cycles, the first cycle had two classes, the second and the third ones had only one class. The technique of collecting data was done through oral pretest and post tests in the form of scores. The data was

analyzed quantitatively to obtain the total mean of the both tests.

Teaching the Spoken Language is about teaching the spoken language. It presents in a highly accessible form the results of the author's important research on teaching and assessing effective spoken communication. The authors examine the nature of spoken language and how it differs from written language both in form and purpose. A large part of it is concerned with principles and techniques for teaching spoken production and listening comprehension. An important chapter deals with how to assess spoken language. The principles and techniques described apply to the teaching of English as a foreign and second language, and are also highly relevant to the teaching of the mother tongue.

In an effort to implement the curriculum, it is urgent that material development be synergized with the curriculum so as to meet its proper and applicable implementation. A number of grants have been awarded to our faculty members for designing instructional materials. Systematical arrangement of instructional materials is to minimize the gap between planned curriculum and implemented curriculum. FTTE UMM keeps striving to develop curriculum through a long-listed agenda: designing course outlines, materials, media, and evaluation instruments. Those four key components fulfill the National Standard of Higher Education. Until recently, FTTE UMM has developed instructional materials for 27 selected courses, comprising 9 pedagogy courses and 18 content specific courses. This Speaking book is the manifestation of our incessant contribution to the field of education. Not only does it contain several relevant topics, but it is equipped with various activities to accommodate students with active, meaningful, and independent learning as well. It is then specially wrapped in the form of hybrid learning materials. Finally, it is highly expected that FTTE UMM, through its continuous efforts, could achieve the standards as stipulated by the Curriculum of Higher Education, aiming for the National Standard of Higher Education in Indonesia.

One-on-one language teaching holds great potential for improving students' speaking ability. Programs such as Brigham Young University's Chinese Flagship program uses a one-on-one approach to help students learn how to use the language in respect to their desired profession. The Ohio State University uses individualized instruction as an alternative to traditional classroom-based classes. However, little to no research has compared one-on-one language teaching to traditional group classroom teaching in terms of language gains. Many studies show that one-on-one teaching can lead to language improvement, but do not attempt to compare method effectiveness. Additionally, although anxiety in language learning has been well researched, a comparison of anxiety between teaching methods has not been attempted. There are few studies that investigate anxiety between one-on-one and group methods.

Action research, explored in this book, is a seven-step process for improving teaching and learning in classrooms at all levels. Through practical examples, research tools, and easy-to-follow "implementation strategies," Richard Sagor guides readers through the process from start to finish. Learn how to uncover and use the data that already exist in your classrooms and schools to answer significant questions about your individual or collective concerns and interests. Sagor covers each step in the action research process in detail: selecting a focus, clarifying theories, identifying research questions, collecting data, analyzing data, reporting results, and taking informed action. Drawing from the experience of individual teachers, faculties, and school districts, Sagor describes how action research can enhance teachers' professional standing and efficacy while helping them succeed in settings characterized by increasingly diverse student populations and an emphasis on standards-based reform. The book also demonstrates how administrators and policymakers can use action research to bolster efforts related to accreditation, teacher supervision, and job-embedded staff development. Part how-to guide, part inspirational treatise, Guiding School Improvement with Action Research provides advice, information, and encouragement to anyone interested in reinventing schools as learning communities and restructuring teaching as the true profession it was meant to be.

For millions of individuals all over the world, speaking in a second language is a daily activity. It is therefore important that research in applied linguistics should contribute empirically to the study of second language spoken interaction. The aim of this volume is to make such a contribution by providing research-based insights into current approaches to the teaching and learning of this skill. Two key dimensions define the papers included here?their novelty and scope. First, the book provides a novel approach to the study of speaking in a second language by combining recent findings in usage-based linguistics with current issues in teaching. Second, the chapters cover a range of theoretical perspectives, including sociolinguistic and interactional competence, gestures, dynamic systems theory and code-switching. The volume offers a contemporary analysis of research in second language speaking that will be of interest to researchers, graduate students, teachers and other professionals working in the fields of communication and applied linguistics.

One of the most civilized nations in history, China has a long-standing writing tradition and many Chinese texts have become world treasures. However, the way the Chinese teach writing in various countries in contemporary times is little known to the outside world, especially in Western countries. Undoubtedly, the Chinese have had an established traditional method of writing instruction. However, recent social

and political developments have created the perception amongst both practitioners and researchers of a need for change. Whilst certain socio-political changes, both in Mainland China and in the territories, acted as agents for reform of the teaching of composition, the shape these reforms are taking has been due to many different influences, coming both from inside the countries themselves and from foreign sources. Mainland China, Hong Kong, Taiwan and Singapore have each developed their own approach to the teaching of composition.

Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting, adapting, selection, and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills, pronunciation, ESP vocabulary, and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.
