From the international bestselling Valerio Massimo Manfredi, *Wolves of Rome* is a historical thriller about two brothers and the betrayal of Teutoburg Forest that devastated the Roman Empire. This is a must read for fans of Simon Scarrow, Ben Kane and Conn Iggulden. *Bound by Blood. Divided by an Empire.* Deep in a dark, foreboding forest, the Roman Empire will face its bloodiest test. 3 BC. Two wild Germanic brothers, Armin and Wulf, are held hostage in Rome to keep their father from rebelling against the Empire. As the years pass, they are moulded into ideal soldiers: brave, disciplined, ruthless. Attributes that are to be tested when a conspiracy arises, threatening their emperor and the Empire's future . . . As serving Roman soldiers, the brothers are separated at opposite ends of the Empire, each proving their bloody might on the battlefield. But Armin begins to realize that no matter how far he travels and how many lives he takes, he has an inescapable bond to his father, mother and the tribes of Germania. His goal: to unite them all under one banner. Wulf, though, remains loyal to Rome and it soon becomes clear that both he and the might of the Roman Empire are the only obstacles standing between Armin and his dream of freedom for the Germanic

A comprehensive and thorough analysis of the place of Jesus in the Christian Faith. The author shows the continuity between the historical Jesus and the message of the post-resurrection church, and explains how this has been obscured in New Testament scholarship.

A number of genes have been identified that are associated with an increased body mass index (BMI), the standard measurement of obesity. By analyzing these genes, researchers hope to gain a better understanding of what causes obesity and develop ways to tackle the problem. The study of genes and obesity could lead to new treatments. Genes and Obesity reviews the latest developments in the field. This series provides a forum for discussion of new discoveries, approaches, and ideas Contributions from leading scholars and industry experts Reference guide for researchers involved in molecular biology and related fields

This practical text guides the reader in developing the necessary tools for teaching those patients with limited literacy skills. Nurses will learn proven strategies for evaluating comprehension and teaching patients using written materials, tapes, video, computer aided instruction, visuals, and graphics. An abundance of case studies helps to demonstrate the application of teaching/learning theory to actual practice. Readers will also explore literacy issues in health care as well as the cultural impact on comprehension.

Information on some 800 products--pesticides, herbicides, insecticides, fungicides, plant growth regulators, animal repellents, nematicides, soil penetrants, seed treatments, composting aids, micronutrients, and speciality fertilizers. All of the products listed are currently available. No bibliography. Compiled by the Centre for Law in Rural Areas, based in Aberystwyth, Wales, nine essays explore legal and political issues involved in promoting conservation in the countryside in a manner consistent with modern farming techniques. The impetus is concern over rural mid- Wales, but the perspective of the essays is British and European. Among the topics are agricultural diversification, pollution, the organization of conservation authorities, common land, and sites needing special protection. This book equips readers with the knowledge required to improve diagnosis and treatment and to implement integrated prevention programs in patients with eating and weight disorders. It does so by providing a comprehensive, up-to-date review of research findings and theoretical assumptions concerning the interface and interactions between body image and such disorders as anorexia nervosa, bulimia nervosa, binge eating disorder, other specified feeding and eating disorders, orthorexia nervosa, overweight, and obesity. After consideration of issues of definition and classification, the opening part of the book examines the concept of body image from a variety of viewpoints. A series of chapters are then devoted to the assessment of the multidimensional construct "body image", to dysmorphophobia/body

dysmorphic disorder, and to muscle dysmorphia. The third part discusses body image in people suffering from different eating disorders and/or overweight or obesity, and two final chapters focus on body image in the integrated prevention of eating disorders and obesity, and cultural differences regarding body image. The book will be of interest to all health professionals who work in the fields of psychiatry, clinical psychology, eating disorders, obesity, body image, adolescence, public health, and prevention.

This book introduces the reader to the relationship between the Italian national movement, achieved by the Risorgimento, and the Italian unification in 1860. These themes are discussed in detail and related to the broader European theatre. Covering the literary, cultural, religious and political history of the period, Beales and Biagini show Italy struggled towards nation state status on all fronts. The new edition has been thoroughly rewritten. It also contains a number of new documents. In addition, all the most up to date research of the last 20 years has been incorporated. The Risorgimento and the Unification of Italy remains the major text on nineteenth century Italy. The long introduction and useful footnotes will be of real assistance to those interested in Italian unification.

These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology

Analyses the impact of television on daily life, focusing on both the concepts and theories of the medium. This book also analyzes the way in which televised entertainment has radically altered human perceptions of place and time, multiplied opportunities for indirect social experience, and fueled the collective imagination.

The innovative characteristic of the book lies in its tackling the topic of individualism from the original point of view of a theory of passions. It underlines the importance of the problem of the passions both in forming individual identity and building the social bond. It proposes to contrast the pathological effects of egoistical passions (acquisitive passion and passion of the Self), which are dominant in modernity, with empathetic and solidaristic passions, exemplified in the phenomenon of the gift.

This didactically unrivalled textbook and timeless reference by Nobel Prize Laureate Claude Cohen-Tannoudji separates essential underlying principles of quantum mechanics from specific applications and practical examples and deals with each of them in a different section. Chapters emphasize principles; complementary sections supply applications. The book provides a qualitative introduction to quantum mechanical ideas; a systematic, complete and elaborate presentation of all the mathematical tools and postulates needed, including a discussion of their physical content and applications. The book is recommended on a regular basis by lecturers of undergraduate courses.

This is the true moving story of a young man growing up in the 1950's, of staunch Roman Catholic parents. Encouraged by family and teachers, the eleven years old holds a burning desire to become a Missionary Priest. His story unfolds against the backdrop of a Catholic Church going through massive change, yet stuck firmly in the past, with teachings and traditions going back hundreds of years. Leaving the love of his family he joins a junior seminary where he begins his progress towards becoming a priest. It describes his fears and concerns about his calling from God and his life at a boarding school. It tracks his adolescent life, desperately trying to come to terms with being a youth with normal feelings, whilst living in the unusual environment of a Monastery. It tells of his emotional turmoil and inability to make a definite decision about his future, as he becomes more and more institutionalised. It follows his time in a Scottish Monastery where he is initiated into strict Monastic ways, then moves onto a Seminary where he struggles with Monastic life, his studies and emotional relationships. Finally, illness and love are the catalysts for The Nearly Man making the decision of his lifetime.

This book introduces novel thinking and techniques to the control of robotic manipulation. In particular, the concept of teleimpedance control as an alternative method to bilateral force-reflecting teleoperation control for robotic manipulation is introduced. In teleimpedance control, a compound reference command is sent to the slave robot including both the desired motion trajectory and impedance profile, which are then realized by the remote controller. This concept forms a basis for the development of the controllers for a robotic arm, a dual-arm setup, a synergy-driven robotic hand, and a compliant exoskeleton for improved interaction

For the Galvani Bicentenary Celebrations, the University of Bologna and its Academy of Sciences singled out subnuclear physics as the field of scientific research to be associated with this important event, as it would best illustrate, for the new generation of students, the challenge inherent in fundamental sciences. Subnuclear physics has represented, ever since it was born, the new frontiers of Galilean science. In his opening lecture delivered on the first day of the new academic year, Professor Antonino Zichichi analytically reviewed the basic conceptual developments and main discoveries achieved in subnuclear physics since its birth in the 20th century. Given the importance of this field of fundamental research, Professor Zichichi was invited to expand the contents of his lecture into a book, and the outcome is this volume.

helps students understand how geography impacts their lives. The story-telling narrative and integrated visuals - combined with user-friendly teacher support and interactive tools - makes it easy to present lessons that are both current and compelling. The program keeps geography relevant through its in-depth, country-by-country coverage, and up-to-date through online current events updates. It presents key concepts through maps and visuals and prepares students for success on geography assessment.

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich; mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter I)

From the winner of the Nobel Prize for Literature Set in Australia in the 1840s, A Fringe of Leaves combines dramatic action with a finely distilled moral vision. Returning home to England from Van Diemen's land, the Bristol Maid is shipwrecked on the Queensland coast and Mrs Roxburgh is taken prisoner by a

tribe of Australian Aboriginals, along with the rest of the passengers and crew. In the course of her escape, she is torn by conflicting loyalties - to her dead husband, to her rescuer, to her own and to her adoptive class.
