This story will take you on a rollercoaster ride of adventure and heartbreak, desperation and eventual success but always with a deeper spiritual message as the common thread. This poignant and brutally honest memoir is set against a backdrop of laugh-until-you-cry humour and of emotion which touches the very core. It is a real against all odds story of the underdog, seemingly down and out for the count, face in the mud, battling for breath. But then the devilish Celtic warrior spirit rizes from the ashes as you get to glimpse into the eye of a man who has a fury in his heart and a desire to succeed no matter what is thrown at him. You get to travel from the streets of Cardiff to the sunny suburbs of Johannesburg in an enthralling story. At times it makes you smile with familiarity, on other occasions you are holding your sides with laughter. The sadder parts of the story are not to be read in public unless you have waterproof mascara or a potential excuse for hayfever. The story of Liam OConner is as varied as it is sensitive but underneath it all is still the little red haired boy, full of mischief and ambition. So if youre ready, get a cup of tea and a biscuit and go on a holiday of the mind. This is a must read.

McDougall believes that study of Kierans' career is important for two reasons: Kierans not only combined practical business and governmental experience with a coherent economic and philosophical outlook but also maintained a comprehensive and integrated approach to the major issues in Canadian politics national unity, economic independence, federal-provincial relations, regional development, resource policy, and macro-economic policy. McDougall examines Kierans' career from his appointment as president of the Montreal Stock Exchange in 1960 to his service as chairman of the Nova Scotia commission on the Charlottetown Accord during the early 1990s. He focuses on Kierans' relationship with René Lévesque in the government of Jean Lesage, his fights within the Trudeau cabinet over the reform of the post office and the development of the Anik satellite, and his criticisms of Canadian economic and resource policies in the 1970s. Using Kierans' ministerial and personal records, his publications and speeches, interviews with him and his former associates, and a variety of secondary sources, the author argues that much of what Kierans said and accomplished is unique and remains relevant to the economic and political problems of today. Kierans has demonstrated that powerful political forces often prevent good ideas and determined effort from improving public policy but he has also shown that thoughtful and responsible public service can at least raise the level of public debate.

Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors, such as companies or special interest groups, to regulate and enforce significant aspects of people's daily lives: from environmental and social protection to the areas of food safety, advertising and financial markets. This book investigates the trust vested in private actors from the perspective of European citizens. It answers the question of whether private actors live up to citizens' expectations or whether more should be done as to the safeguarding of citizens' interests. Several cross-cutting studies explore how private regulation and enforcement are embedded in EU law. The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which, unlike the national and transnational ones, has not yet been widely explored. This context merits a stand-alone analysis because of the unique normative framework of the EU, as a particular polity itself but also in relation to its Member States. With an

overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU, the book adds a missing tile to the mosaic of public–private governance studies.
