"To help teachers connect students' performance and evaluation to instruction, best-selling authors JoAnne Caldwell and Lauren Leslie outline practical intervention strategies that are aligned with any informal reading inventory. Written with the firm belief that a student's performance on any evaluation instrument should be specifically connected to instruction in the intervention sessions that follow, this book provides a clear understanding of how to connect assessment and instruction and specifically tie informal reading inventory assessment and intervention instruction together. Arguing that there is a disconnect between the assessment of reading and the design of instructional activities to improve it, the renowned authors of the Qualitative Reading Inventory (QRI), JoAnne and Lauren discuss how this disconnect stands in the way of implementing effective programs for struggling readers. Intervention strategies guide teachers to connect assessment results on an informal reading inventory with specific aspects of intervention instruction. Intervention Strategies to Follow Informal Reading Inventory Assessment is ideal for teachers seeking a systematic perspective to how intervention should be based on assessment."--publisher website.

Informal Reading Inventory: Preprimer to Twelfth GradeCengage Learning
Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and

punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In Better Than Carrots or Sticks, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to * Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills; * Develop a nonconfrontational rapport with even the most challenging students; and * Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.

Provides techniques on the assessment of critical reading ability, while allowing for student interest to be factored into the interpretation of performance.
