**Discourses of Cycling, Road Users and Sustainability** M. Cristina Caimotto, 2020-05-07 This book employs a Critical Discourse Studies (CDS) framework to examine cycling mobility, marking a new turn in ecolinguistic discourse analysis. The author focuses specifically on environment-related arguments concerning the promotion of higher levels of cycling, mainly as a means of transport, and investigates the “US vs. “THEM” narratives present in many discourses about road users. Analysing newspaper articles, institutional documents and spoken interviews, the author searches for a positive new discourse that would inspire and encourage cycling as a habitual means of transport, rather than simply exposing ecologically destructive discourse. The book will be of interest to scholars of discourse and ecolinguistics, as well as contributing to the lively debate about how to increase cycling in fields such as sustainability, sociology, transport planning and management.

Beyond Deconstruction Alberto Martinengo, 2012-08-31 The controversy over Jacques Derrida's legacy is one of the most

effective engines driving the contemporary debate, far beyond the bounds of philosophy. By now, the variety of contesting positions is so wide that it calls for a critical assessment to achieve a unified theoretical scheme. The dyad of deconstruction and reconstruction, to which the title of the volume refers, aims at composing a kind of map of this debate. The three sections of the book include essays that investigate specific aspects of Derrida's reception, from the view of 1. philosophy, 2. literary studies and 3. politics and law. These contributions study the implications of deconstruction beyond its original scope and intervene by taking stock of its most relevant aporias.

*Reward* Diana Pye, Simon Greenall, 1996 Designed to take students from their first introduction to English up to a proficient use of the language, this multi-level course offers choice and flexibility. The 70-hour core syllabus in the student's book allows swift progression with its essential grammar points, systematic vocabulary and skills development, and regular progress checks. There are two resource packs at each level - a general-English pack and a business-English pack. Each contains photocopiable communicative activities which can be used to supplement the core syllabus in the student's book, revise specific language and structures, and provide variety in class.

The Big Book of Logos 3 David E. Carter, 2004-03-30 David E. Carter's Big Book of Logos series is nothing less than an international phenomenon. For the first volume, David E. Carter chose 2,500 logos currently in use, and produced a major resource book for logo designers, an inspiring showcase of effective logo design from all over the world. The variety of styles and techniques covered the complete creative spectrum. The Big Book of Logos became one of the best-selling graphics books of all time, the first best resource to consult when devising a new logo. Soon after, came The New Big Book of Logos featuring another 2,500 designs, and, after that, The Big Book of Logos 3, which is now available here, for the first time in an affordable paperback edition. Logo designers are always looking for sources of inspiration, wanting to see what's new and this book has it all. Every logo designer should have this on the shelf for frequent use, and the new paperback format (and pricing!) will ensure that The Big Book of Logos 3 will take its place alongside the series' earlier volumes as an indispensable reference for every designer.
