Having issued the title "IT Infrastructure Risk and Vulnerability Library", which did well in identifying and consolidating most of the risk and vulnerabilities inherent in the commonly deployed IT Systems and Infrastructure in corporate organizations, it is pertinent to also discuss in details the controls that will be required in mitigating those risk/vulnerabilities in addition to audit test procedures that IT Auditors or other Assurance personnel will undertake to ensure that the controls put in place by their audit clients are adequate in minimizing if not eliminate the impact of the risk. Hence, the need to issue this title "Auditing Your Core Information Systems and IT Infrastructure (Practical Audit Programs/Checklists for Internal Auditors)". The book adopted the "risk", "controls" and "test procedure" methodology in highlighting what the Auditor needs to be testing and how they will carry out the test to ensure the effectiveness and adequacy of required controls or otherwise. Using this globally accepted method, which have been adopted by most corporations and research institutions worldwide, the title "Auditing Your Core Information Systems and IT Infrastructure" serves as a reference handbook for IT Auditors and other Assurance professionals and detailed how information systems and process controls can be tested to provide assurance on their effectiveness and adequacy. It documented series of task (audit steps) IT Auditors need to perform during their audit in the form of audit programs/checklists and can be used as a guide in performing audit reviews of the following areas.\* Data centre.\* Business continuity management and disaster recovery planning. \* Business process re-engineering (BPR) and automation function. \* IT governance and strategic planning.\* Physical/environmental security and power supply adequacy.\* Windows infrastructure, intranet and internet security.\* Electronic banking and payment channels\* UNIX operating system (AIX, Solaris and Linux infrastructure).\* Core banking application (Finacle, Flexcube, Globus, Banks, Equinos, and Phoenix).\* Payment card (debit, credit & prepaid) processes, systems and applications - PCIDSS Compliance.\* Employee Information and Systems Security.\* Perimeter Network Security.
