If you have been recently injured in a car accident, you are probably confused and worried about what to do next. I bet you are asking yourself questions like the following: "Will my car be repaired?" "Will my medical bills be paid?" "Will I ever get better?" "Will I be paid for the time I'm missing from work?" "What do I do if the other person doesn't have car insurance?" "What will the insurance company offer me for my injuries?" If you or someone you care about has any of these concerns, please keep reading this special Car Accident Victim's Guide. My name is David M. Warwick, D.C, and I've been helping injured people get fast relief from auto accident injuries in Lacey / Olympia for almost 20 years. Whiplash injury is a "very real" problem that costs communities billions in health care and disability dollars. Studies have recently shown that about 10-20% of the population suffers from neck pain, and car accidents/traumas are a big cause of this type of pain. But you've probably wondered how something as minor as a fender-bender to your bumper could be such a pain in neck..... Maybe your doctor told you "give it a couple of weeks.." "you'll be fine." But you're not fine. Your neck hurts when you work at the computer, when the dog pulls too hard on the leash... maybe sleep has become more difficult with a lot of tossing and turning, or you've become dizzy...or always tired when you used to be full of energy and pep. Maybe you've noticed how your neck moves differently since the accident. Looking over the shoulder perhaps isn't as easy as before. Does all of this sound familiar? It's quite surprising when you look at whiplash research and its global impact-the entire body is affected. You probably didn't think that headaches or fatigue were part of the whiplash bargain, but they are. Don't take my word for it.....I have included a sample of my many satisfied patients that have written testimonials. I have also included a collection of the most relevant articles I have published in my popular "In Good Hands" newsletter over the last few years. It's easy to make your first appointment with me. All you have to do is call my office today at (360) 951-4504 and schedule an evaluation to see if we can help you. We'll do everything possible to get you in the same day...even if we have to stay late or work through lunch! You're too young to suffer with terrible auto accident injuries. Let's handle them today. Ok, here's what to do right now... Call (360) 951-4504 Today!

Road traffic injuries are a neglected global pandemic. Up to 50 million people a year worldwide are injured or disabled in car accidents. The deleterious impact on the global economy is immense. Thousands of those injured die of opiate overdoses, trying to deal with chronic pain. The post-accident life of a survivor is all too often devastated by spinal or severe orthopedic injuries, depression, anxiety, PTSD, sleep disturbances, mild episodic or chronic pain, and/or a traumatic brain injury that can cause personality changes, cognitive and memory impairments, and debilitating fatigue. A substantially reduced quality of life with career changes and setbacks, broken and overstressed relationships, and financial hardships that continue for many years, often ensue. First Responders, healthcare providers, the survivors' community and to the largest degree, the survivors' family, are forced to deal with the staggering impacts. Auto accidents can dramatically alter lives, forever. Where do survivors and their families go for help? How do survivors heal and get their lives back? Everyone is desperate for hope and evidence-based solutions to manage disabling conditions and ultimately reclaim their lives. This is the first book to offer comprehensive, evidence-based information to both the survivors and their caregivers on understanding, managing, and healing physical and emotional traumas sustained in auto accidents. Based on James Zender's more than fifteen years' experience as a clinical psychologist specializing in auto-accident trauma care, *Recovering From Your Car Accident* leads survivors and their families through the extensive process of emotional and

physical recovery. With empathy and compassion, Dr. Zender explains how to conquer the multitude of challenges that often result from auto accidents, including managing pain, depression, and anxiety, addressing concerns about the future and finances, personality changes, emotional and cognitive dysfunction, post-traumatic stress, traumatic brain injury, and strained personal relationships. Through stories recounted by Dr. Zender's patients, survivors will learn that they are not alone and that there is hope for a better tomorrow. Policymakers will gain insight into accident prevention and will be inspired to implement policy improvements to better meet the needs of the auto accident community. Helpful tips throughout this book and a resource section featuring the best online and community support options will aid survivors and their families with rehabilitation. Recovering from Your Car Accident will assist survivors with rebuilding their lives and discovering new ways to thrive. Attorney Joe Miller brings his 25 years plus experience representing accident victims to bear in providing 23 secrets designed to maximize your recovery in the event you or a loved on are in a motor vehicle accident. If you or a loved one have been hurt in a car accident in Virginia or North Carolina, you need to read this book.

My name is Blake Kalkstein, D.C, and I've been helping injured people get fast relief from auto accident injuries in Baltimore. Whiplash injury is a very real type of problem that costs communities billions in health care and disability dollars. Studies have recently shown that about 10-20% of the population suffers from neck pain, and car accidents/traumas are a big cause of this type of pain. Maybe you've noticed how your neck moves differently since the accident. Looking over the shoulder perhaps isn't as easy as before. Does all of this sound familiar? It's quite surprising when you look at whiplash research and its global impact-the entire body is affected. You probably didn't think that headaches or fatigue were part of the whiplash bargain, but they are. Your Bumper Doesn't Tell the Whole Story... You can't look at a dent in the bumper and conclude that the neck wasn't injured. For instance, they're called 5 mph bumpers for a reason-designed to not be damaged in very low speed collisions. This is good for the bumper, but not necessarily for your neck! What researchers have discovered is that when collisions are of enough force, this causes the vehicle to crumple and absorb energy. Low speed collisions will often not cause the crumple zones to be engaged. If you have a rigid fixed bumper (seen on many older cars and trucks), that does not crumple-this can make the whiplash injury even more severe. For the above reasons, you might be even more injured in an accident below 20 mph than one above that speed. There are of course limits to this effect. Collisions at very high speeds (above 40 mph) will often cause the occupants to suffer severe injuries, even though the crumple zones are absorbing some of the energy. You may have heard someone profess skepticism for your whiplash injury. Maybe they thought you were gaming the system or out to make a fast buck. Where does this perception come from? Probably the insurance companies, who may have a profit-motive for denying the reality of whiplash injuries. Some physicians are simply ignorant about whiplash trauma, perform cursory spinal examinations, or offer treatments that have little or no scientific evidence to back them up. But is there really such a thing as "Whiplash?" The science says, "YES!" Whiplash-a soft tissue injury to the neck-is also called neck sprain or neck strain. It is characterized by a collection of symptoms that occur following damage to the neck, usually because of sudden extension and flexion. The disorder commonly occurs as the result of an automobile accident and may include injury to the joints of the spine, disks, and ligaments, cervical muscles, and nerve roots. Symptoms such as neck pain may be present right after the injury or may be delayed for several days... especially days 3, 4 and 5 after the accident.
