Reggae's influence can be heard in the popular music of nations in a variety of continents. In Dubwise, Klive Walker takes a fresh look at Bob Marley's global impact, specifically his legacy in the Caribbean diaspora. While considering Marley's status as an international reggae icon, Walker also discusses the vital contributions to reggae culture authored by other important Jamaican innovators such as poet Louise Bennett, hand drummer Oswald "Count Ossie" Williams, jazz saxophonist Joe Harriott, ska trombonist Don Drummond and singer Dennis Brown.

This book is about multiculturalism, broadly defined as the recognition, respect and accommodation of cultural differences. Teo proposes a framework of multicultural denizenship that includes group-specific rights and intercultural dialogue, by problematising three issues: a) the unacknowledged misrecognition of non-citizens within the scholarship of multiculturalism; b) uncritical treatment of citizens and non-citizens as binary categories and; c) problematic parcelling of group-specific rights with citizenship rights. Drawing on the case of Singapore as an illustrative example, where temporary labour migrants are culturally stereotyped, socioeconomically disenfranchised and denied access to rights accorded only to citizens, Teo argues that understandings of multiculturalism need to be expanded and adjusted to include a fluidity of identities, spectrum of rights and shared experiences of marginalisation among citizens and non-citizens. Civic Multiculturalism in Singapore will be of interest to students and scholars of multiculturalism, critical citizenship studies, migration studies, political theory and postcolonial studies.

Business schools are placing more emphasis on the role of business in society. Top business school accreditors are shifting to mandating that schools teach their students about the social impact of business, including AACSB standards to require the incorporation of business impact on society into all elements of accredited institutions. Researchers are also increasingly focused on issues related to sustainability, but in particular to business and peace as a field. A strong strain of scholarship argues that ethics is nurtured by emotions and through aesthetic quests for moral excellence. The arts (and music as shown specifically in this book) can be a resource to nudge positive emotions in the direction toward ethical behavior and, logically, then toward peace. Business provides a model for positive interactions that not only foster long-term successful business but also incrementally influences society. This book provides an opportunity for integration and recognition of how music (and other art forms) can further encourage business toward the direction of peace while business provides a platform for the dissemination and modeling of the positive capabilities of music toward the aims of peace in the world today. The primary market for this book is the academic audience. Unlike many other academic books, however, the interdisciplinary nature of the book allows for multiple academic audiences. Thus, this book reaches into schools of music, business, political science, film studies, sports and society studies, the humanities, ethics and, of course, peace studies.

"Bitten by Twilight presents us with an enlightened look into the world of vampires, werewolves, and fan culture and romance narratives. The editors and contributors to this book appreciate the significance of the stories, movies, and artifacts as a culturally gendered phenomenon and present a variety of lenses through which to appreciate this popular franchise."---Norma Pecora, Author of *The Business of Children's Entertainment*; Professor, School of Media Arts and Studies, Ohio University. --

*Justice Performed: Courtroom TV Shows and the Theaters of Popular Law* is the first study of the reality TV genre to trace its theatrical legacy, connecting the phenomenon of the daytime TV shows to a long history of theatrical trials staged to educate audiences in pedagogies of citizenship. It examines how judge TV fulfills part of law's performative function: that of providing a participatory spectacle the public can recognize as justice. Since it debuted in 1981 with *The People's Court*, which made famous its star jurist, Judge Joseph A. Wapner, dozens of judges have made the move to television. Unlike the demographics in actual courts, most TV judges are non-white men and women hailing from diverse cultural and racial backgrounds. These judges charge their decisions with personal preferences and cultural innuendos, painting a very different picture of what justice looks like. Drawing on interviews with TV judges, producers and production staff, as well as the author's experience as a studio audience member, the book scrutinizes the performativity of the genre, the needs it meets and the inherent ideological biases about race, gender and civic instruction.

Discovering a good song is like finding hidden treasures. A particular song may kindle your memory and connect you to the past. Try "Toni Braxton - Un-Break My Heart" (1996) ? Or "Bruce Springsteen - Streets of Philadelphia" (1994) ? How about "Shakespear's Sister - Stay" (1992) ? These are only a few examples. This book presents all 681 songs that reached Billboard Hot 100 Chart Top 10 positions, from 1990 to 1999. All songs come with direct links of Youtube music videos. Just 1-Click away to enjoy music! This book will be a wonderful journey. Let's travel back through time again, along with all these beautiful songs and memories. This book has two smart views - By Year view and By Artist view. By Year view lists all Top 10 hits by year. By Artist view groups the Top 10 hits by each artist. Every Song comes with detailed information such as peak position, peak date, week counts in Top 10, artist Top 10 hits info, view counts of Youtube music video (which measures the song's lasting popularity), and more.

This book explores five important areas where technology affects society, and suggests ways in which human communication can facilitate the use of that technology. Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots, which emphasize purpose and audience. As our appreciation of audience has grown beyond engineers and scientists to lay users of technology, our appreciation of the diversity of those audiences in terms of age, geography, and other factors has similarly expanded. We are also coming to grips with what Thomas Friedman calls the 'flat world,' a paradigm that influences how we communicate with members of other cultures and speakers of other languages. And because most of the flatteners are either technologies themselves or technology-driven, technical and professional communicators need to leverage these technologies to serve global audiences. Similarly, we are inundated with information about world crises involving health and safety issues. These crises are driven by the effects of terrorism, the aging population, HIV/AIDS, and both human-made and natural disasters. These issues are becoming more visible because they are literally

matters of life and death. Furthermore, they are of special concern to audiences that technical and professional communicators have little experience targeting - the shapers of public policy, seniors, adolescents, and those affected by disaster. Biotechnology is another area that has provided new roles for technical and professional communicators. We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience. We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments. Confronting this complex network of issues, we're challenged to fashion both our message and the audience's perceptions ethically. Finally, today's corporate environment is being shaped by technology and the global nature of business. Technical and professional communicators can play a role in capturing and managing knowledge, in using technology effectively in the virtual workplace, and in understanding how language shapes organizational culture.

The #1 New York Times bestselling series continues to delight and astound with an all-new collection of surprisingly unnecessary facts and figures. Would it surprise you to learn... •it takes a sloth about a month to digest a meal? •more tourists visit France than any other nation in the world? •the United States still has debt from the Revolutionary War? Do you think you ever need to know... •what type of trees are most frequently struck by lightning? •how much a clerk was paid for penning the U.S. Constitution? •which celebrity uses the pseudonym Slappy White?

In modern politics as well as in historical times, character attacks abound. Words and images, like symbolic and psychological weapons, have sullied or destroyed numerous reputations. People mobilize significant material and psychological resources to defend themselves against such attacks. How does character assassination "work," and when does it not? Why do many targets fall so easily when they are under character attack? How can one prevent attacks and defend against them? The Routledge Handbook of Character Assassination and Reputation Management offers the first comprehensive examination of character assassination. Moving beyond studying corporate reputation management and how public figures enact and maintain their reputation, this lively volume offers a framework and cases to help understand, critically analyze, and effectively defend against such attacks. Written by an international and interdisciplinary team of experts, the book begins with a theoretical introduction and extensive description of the "five pillars" of character assassination: (1) the attacker, (2) the target, (3) the media, (4) the public, and (5) the context. The remaining chapters present engaging case studies suitable for class discussion. These include: Roman emperors; Reformation propaganda; the Founding Fathers; defamation in US politics; women politicians; autocratic regimes; European leaders; celebrities; nations; Internet campaigns. This handbook will prove invaluable to undergraduate and postgraduate students in communication, political science, history, sociology, and psychology departments. It will also help researchers become independent, critical, and informed thinkers capable of avoiding the pressure and manipulations of the media.

A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines "declines," "reversals," and "revivals" of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine "Glorigate" scandal), the ringtone's narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone's relation to pop music (including possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as "mobile music" and the emergence of cloud computing.

As twentieth-century city planners invested in new transportation systems to deal with urban growth, they ensured that the automobile rather than mass transit would dominate transportation. Combining an exploration of planning documents, sociological studies, and popular culture, Paul Fotsch shows how our urban infrastructure developed and how it has shaped American culture ever since. *Watching the Traffic Go By* emphasizes the narratives underlying our perceptions of innovations in transportation by looking at the stories we have built around these innovations. Fotsch finds such stories in the General Motors "Futurama" exhibit at the 1939 World's Fair, debates in *Munsey's* magazine, films such as *Double Indemnity*, and even in footage of the O. J. Simpson chase along Los Angeles freeways. Juxtaposed with contemporaneous critiques by Lewis Mumford, Theodor Adorno, and Max Horkheimer, Fotsch argues that these narratives celebrated new technologies that fostered stability for business and the white middle class. At the same time, transportation became another system of excluding women and the poor, especially African Americans, by isolating them in homes and urban ghettos. A timely, interdisciplinary analysis, *Watching the Traffic Go By* exposes the ugly side of transportation politics through the seldom-used lens of popular culture.
