Shocking, banned and the subject of obscenity trials, Henry Miller's first novel *Tropic of Cancer* is one of the most scandalous and influential books of the twentieth century. *Tropic of Cancer* redefined the novel. Set in Paris in the 1930s, it features a starving American writer who lives a bohemian life among prostitutes, pimps, and artists. Banned in the US and the UK for more than thirty years because it was considered pornographic, *Tropic of Cancer* continued to be distributed in France and smuggled into other countries. When it was first published in the US in 1961, it led to more than 60 obscenity trials until a historic ruling by the Supreme Court defined it as a work of literature. Long hailed as a truly liberating book, daring and uncompromising, *Tropic of Cancer* is a cornerstone of modern literature that asks us to reconsider everything we know about art, freedom, and morality. 'At last an unprintable book that is fit to read' Ezra Pound 'A momentous event in the history of modern writing' Samuel Beckett 'The book that forever changed the way American literature would be written' Erica Jong Henry Miller (1891-1980) is one of the most important American writers of the 20th century. His best-known novels include *Tropic of Cancer* (1934), *Tropic of Capricorn* (1939), and the *Rosy Crucifixion* trilogy (*Sexus*, 1949, *Plexus*, 1953, and *Nexus*, 1959), all published in France and banned in the US and the UK until 1964. He is widely recognised as an irreverent, risk-taking writer who redefined the novel and made the link between the European avant-garde and the American Beat generation.

"Perfect for readers who love a touch of the fantastic and the impossible." —Booklist A hopeful and heroic girl befriends a small, lost whale during World War II and together they embark on a journey to liberate France and find their families in this charming debut novel. Ever since the Germans became the unwelcome "guests" of Paris in the early days of World War II, Papa and Chantal have gone out in the evenings to fish in the Seine. Tonight Chantal is hoping for a salmon, but instead she spies something much more special: a whale! Though small (for a whale) and lost, he seems friendly. Chantal soon opens her heart to the loveable creature and names him Franklin, after the American president who must surely be sending troops to rescue her country. Yet Franklin is in danger: The Parisians are starving and would love to eat him, and the Nazis want to capture him as a gift to Hitler. In a desperate bid to liberate themselves and their city, Chantal and Franklin embark on a dangerous voyage. But can one small girl manage to return a whale to the ocean and reunite him with his parents? And will she ever see her own family again?

For two months, journalist Heller was aboard the pirate ship the "Farley Mowat" as it stalked its prey--a Japanese whaling fleet. Now, Heller chronicles this hair-raising journey, whose mission was to stop illegal whaling in the stormy, remote seas off Antarctica. 288.

Winner of the 2021 Andrew Carnegie Medal for Excellence in Nonfiction * Finalist for the 2020 Kirkus Prize for Nonfiction * Finalist for the PEN/E.O. Wilson Literary Science Writing Award A "delving, haunted, and poetic debut" (The New York Times Book Review) about the awe-inspiring lives of whales, revealing what they can teach us about ourselves, our planet, and our relationship with other species. When writer Rebecca Giggs encountered a humpback whale stranded on her local beachfront in Australia, she began to wonder how the lives of whales reflect the condition of our oceans. *Fathoms: The World in the Whale* is "a work of bright and careful genius" (Robert Moor, New York Times bestselling author of *On Trails*), one that blends natural history, philosophy, and science to explore: How do whales experience ecological change? How has whale culture been both understood and changed by human technology? What can observing whales teach us about the complexity, splendor, and fragility of life on earth? In *Fathoms*, we learn about whales so rare they have never been named, whale songs that sweep across hemispheres in annual waves of popularity, and whales that have modified the chemical composition of our planet's atmosphere. We travel to Japan to board the ships that hunt whales and delve into the deepest seas to discover how plastic pollution pervades our earth's undersea environment. With the immediacy of Rachel Carson and the lush prose of Annie Dillard, Giggs gives us a "masterly" (The New Yorker) exploration of the natural world even as she addresses what it means to write about nature at a time of environmental crisis. With depth and clarity, she outlines the challenges we face as we attempt to understand the perspectives of other living beings, and our own place on an evolving planet. Evocative and inspiring, *Fathoms* "immediately earns its place in the pantheon of classics of the new golden age of environmental writing" (Literary Hub).

Called dumb and stupid by family and others because of his severe impediment of speech, 14 year old Jeremy Fisher of Chestnut Grove becomes a run-away, vowing never to return. Hearing the message of JONAH AND THE WHALE, Jeremy is haunted by a voice. Learning about Un-forgiveness and Forgiveness, he realizes he must return home, but surprising things happen. Well kept secrets are revealed. Framed by his brother, and arrested, Jeremy spends time in jail before agreeing with the haunting voice that he really is in a whales belly! Jonah prayed his way out of his whales belly. It takes Forgiveness, and Prayer to lead Jeremy out of his whales belly.

A compendium of straightforward techniques on how to accentuate the positive and redirect the negative, increasing productivity at work and at home. What do your people at work and your spouse and kids at home have in common with a five-ton killer whale? Probably a whole lot more than you think, according to top business consultant and mega-bestselling author Ken Blanchard and his coauthors from SeaWorld. In this moving and inspirational new book, Blanchard explains that both whales and people perform better when you accentuate the positive. He shows how using the techniques of animal trainers -- specifically those responsible for the killer whales of SeaWorld -- can supercharge your effectiveness at work and at home. When gruff business manager and family man Wes Kingsley visited SeaWorld, he marveled at the ability of the trainers to get these huge killer whales, among the most feared predators in the ocean, to perform amazing acrobatic leaps and dives. Later, talking to the chief trainer, he learned their techniques of building trust, accentuating the positive, and redirecting negative behavior -- all of which make these extraordinary performances possible. Kingsley took a hard look at his own often accusatory management style and recognized how some of his shortcomings as a manager, spouse, and father actually diminish trust and damage relationships. He began to see the difference between "GOTcha" (catching people doing things wrong) and "Whale Done!" (catching people doing things right). In *Whale Done!*, Ken Blanchard shows how to make accentuating the positive and redirecting the negative the best tools to increase productivity, instead of creating situations that demoralize people. These techniques are remarkably easy to master and can be applied equally well at home, allowing readers to become better parents and more committed spouses in their happier and more successful personal lives.

"A voice for which one should feel not only affection but admiration." --The New York Times *The Whale Caller*, Zakes Mda's fifth novel, is his most enchanting and accessible book yet--a romantic comedy of sorts in which the changing face of post-apartheid South Africa is revealed through prodigious, lyrical storytelling. As the novel opens, the seaside village of Hermanus, on the country's west coast, is overrun with whale watchers--foreign tourists wearing floral shirts and toting expensive binoculars, determined to see whales in their natural habitat. But when the tourists have gone home, the *Whale Caller* lingers at the shoreline, wooing a whale he calls Sharisha with cries from a kelp horn. When Sharisha fails to appear for weeks on end, the *Whale Caller* frets like a jealous lover--oblivious to the fact that the town drunk, Saluni, a woman who wears a silk dress and red stiletto heels, is infatuated with him. After much ado--which Mda relates with great relish--the two misfits fall in love. But each of them is ill equipped for romance, and their on-again, off-again relationship suggests something of the fitful nature of change in post-apartheid South Africa, where just living from one day to the next can be challenge enough. Mda has spoken of the end of apartheid as a lifting of the South African novelist's burden to write on political subjects. With *The Whale Caller*, he has written a tender, charming novel--the work of a virtuoso among international writers.

A NEW YORK TIMES NOTABLE BOOK OF 2020 "In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different."—The Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth's remaining wild places. It shows how if you're a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, "How do we live here?" It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

A young boy discovers a whale in his pool and tries everything he can think of to get it out.

Striking and eloquent stories that tell of the absurd violence of war, and tenderly depict the animals and children caught in its vortex A whale falls in love with a military submarine, and dies courting her; a mother caught in a fire following a bombing gives all her body's water to save her son, and her desiccated form turns into a kite; a wolf rescues a sick child abandoned by her parents, only to die himself at the hand of men. However, bunkers can also become real homes, a small Japanese girl and an American POW briefly understand each other and a miraculous tree feeds starving children... This is war, no doubt, but told by someone who understands how children truly experience war and its aftermath - the bombings and parents' deaths, the life of orphans who roam the streets, the starvation and blind violence in a society beyond destruction. Akiyuki Nosaka remembers what it was like to be a child caught in war-torn Japan in 1945, and he retells his experiences in this collection of powerful and beautifully expressive stories for children. Akiyuki Nosaka lost his mother at birth and was immediately entrusted into care by his father - a fact which he discovered only when his adoptive parents were killed in the American bombing of Kobe. At the age of fourteen, orphaned and alone in war-ravaged Japan, he saw his younger sister starve to death. He was sent to prison for stealing and involvement in the black market, but, after the reappearance of his biological father, managed to go to university. However, he soon dropped out and made a living doing odd jobs, including dog-washing and selling his own blood. He went on to become a lyricist, screenwriter, journalist, singer, novelist, fashion model and rugby club manager. He even joined the High Chamber of the Japanese Diet in 1983. *The Pornographers*, Nosaka's first novella, was published in 1963 and gained the admiration of Yukio Mishima. *Graves of the Fireflies* and *Seaweeds of America* - both largely autobiographical - were awarded the Naoki Literary prize in 1967. Nosaka has written nearly 100 books, both fiction and non-fiction; his work is violent, both tragic and comical. *War Stories for Children* and *Graves of the Fireflies* were both inspired by his own childhood, and very movingly depict the effect of war on Japanese - and any - society. Nosaka is extremely well known in Japan today, not just as a writer, but also as a TV personality, scriptwriter, songwriter, comedian, singer and even politician. He suffered a stroke in 2003 but still writes for newspapers and radio.

On a cool December morning near San Francisco, a distress call was radioed to shore by a local fisherman. He had discovered a humpback whale tangled in hundreds of yards of crab-trap lines, struggling to stay at the surface to breathe. A team of volunteers answered the call, and four divers risked their lives to rescue the enormous animal. What followed was a rare and remarkable demonstration of animal behavior. This celebrated story, beautifully depicted in Jennifer O'Connell's mesmerizing paintings, will make you wonder about animal emotions and the unique connections we can have with animals--even whales.

Reveals the hidden wonders of the animal kingdom, from the architecture of a snail's shell and the sting of a honeybee to the sound-radar system used by bats and the egg-laying apparatus of a chicken.

An inspiring middle-grade chapter book that introduces young readers to the environmental challenges facing the planet through the eyes of Coast Salish characters and authors. "You have family on land as you do in the sea. . . being a caretaker of the earth begins with taking care of the water that all life depends on." Shiny is a whale child. One day his mother teaches him about the harm facing the world's oceans because of human carelessness. Shiny agrees to be turned into a boy by the ocean's water spirit so he can visit the land and alert people to these dangers. He meets Alex, a young Coast Salish girl who learns from Shiny that the living spirit of water exists in everything--glaciers, rivers, oceans, rain, plants, and all living creatures. Together the two travel the earth, confronting the realities of a planet threatened by an uncertain future. Inspired by Shiny's hope, humor, and wisdom, Alex makes the promise to become a teacher for future generations. She realizes that the timeless Indigenous value of environmental stewardship is needed now more than ever and that we must all stand up on behalf of Mother Earth. Written and illustrated by Indigenous authors Keith Egawa and Chenoa Egawa, *The Whale Child* introduces children ages 7 to 12 to existing environmental issues with a message of hope, education, sharing, and action. Ideal for middle-grade readers who are beginning to read chapter books on their own, this book also includes resources for students and teachers to facilitate learning about Pacific Northwest Indigenous cultures and the environment.

Once hunted by whalers and now the darling of ecotourists, the gray whale has become part of the culture, history, politics, and geography of Mexico's most isolated region. After the harvesting of gray whales was banned by international law in 1946, their populations rebounded; but while they are no longer hunted for their oil, these creatures are now chased up and down the lagoons of southern Baja California by whalewatchers. This book uses the biology and politics associated with gray whales in Mexican waters to present an unusual case study in conservation and politics. It provides an inside look at how gray whale conservation decisions are made in Mexico City and examines how those policies and programs are carried out in the calving grounds of San Ignacio Lagoon and Magdalena Bay, where catering to ecotourists is now an integral part of the local economy. More than a study of conservation politics, Dedina's book puts a human face on wildlife conservation. The author lived for two years with residents of Baja communities to understand their attitudes about wildlife conservation and Mexican politics, and he accompanied many in daily activities to show the extent to which the local economy depends on whalewatching. "It is ironic," observes Dedina, "that residents of some of the most isolated fishing villages in North America are helping to redefine our relationship with wild animals. Americans and Europeans brought the gray whale population to the brink of extinction. The inhabitants of San Ignacio Lagoon and Magdalena Bay are helping us to celebrate the whales' survival." By showing us how these animals have helped shape the lifeways of the people with whom they share the lagoons, *Saving the Gray Whale* demonstrates that gray whales represent both a

destructive past and a future with hope.

Named a Best Book of 2018 by the Financial Times and Fortune, this "thrilling" (Bill Gates) New York Times bestseller exposes how a "modern Gatsby" swindled over \$5 billion with the aid of Goldman Sachs in "the heist of the century" (Axios). Now a #1 international bestseller, BILLION DOLLAR WHALE is "an epic tale of white-collar crime on a global scale" (Publishers Weekly, starred review), revealing how a young social climber from Malaysia pulled off one of the biggest heists in history. In 2009, a chubby, mild-mannered graduate of the University of Pennsylvania's Wharton School of Business named Jho Low set in motion a fraud of unprecedented gall and magnitude--one that would come to symbolize the next great threat to the global financial system. Over a decade, Low, with the aid of Goldman Sachs and others, siphoned billions of dollars from an investment fund--right under the nose of global financial industry watchdogs. Low used the money to finance elections, purchase luxury real estate, throw champagne-drenched parties, and even to finance Hollywood films like The Wolf of Wall Street. By early 2019, with his yacht and private jet reportedly seized by authorities and facing criminal charges in Malaysia and in the United States, Low had become an international fugitive, even as the U.S. Department of Justice continued its investigation. BILLION DOLLAR WHALE has joined the ranks of Liar's Poker, Den of Thieves, and Bad Blood as a classic harrowing parable of hubris and greed in the financial world.

"If you liked American Gods by Neil Gaiman or Circe by Madeline Miller, be sure to pick this one up."--Timeworn A sweeping tale of forbidden love and warring gods, where a young Inuit shaman and a Viking warrior become unwilling allies in a war that will determine the fate of the new world. There is a very old story, rarely told, of a wolf that runs into the ocean and becomes a whale... Born with the soul of a hunter and the spirit of the Wolf, Omat is destined to follow in her grandfather's footsteps-invoking the spirits of the land, sea, and sky to protect her people. But the gods have stopped listening and Omat's family is starving. Desperate to save them, Omat journeys across the icy wastes, fighting for survival with every step. When she encounters Brandr, a wounded Viking warrior, they set in motion a conflict that could shatter her world...or save it. Also by Jordanna Max Brodsky:The Olympus Bound seriesThe ImmortalsWinter of the GodsOlympus Bound Twenty-third century Earth, ravaged by climate change, looks backwards to the holy ideal of a pre-industrial Eden. Political power has been grabbed by a few powerful families and their green saints. Millions of people are imprisoned in teeming cities; millions more labour on Pharaonic projects to rebuild ruined ecosystems. On the moons of Jupiter and Saturn, the Outers, descendants of refugees from Earth's repressive regimes, have constructed a wild variety of self-sufficient cities and settlements: scientific utopias crammed with exuberant creations of the genetic arts; the last outposts of every kind of democratic tradition. The fragile detente between the Outer cities and the dynasties of Earth is threatened by the ambitions of the rising generation of Outers, who want to break free of their cosy, inward-looking pocket paradises, colonise the rest of the Solar System, and drive human evolution in a hundred new directions. On Earth, many demand pre-emptive action against the Outers before it's too late; others want to exploit the talents of their scientists and gene wizards. Amid campaigns for peace and reconciliation, political machinations, crude displays of military might, and espionage by cunningly wrought agents, the two branches of humanity edge towards war...

From the author of The Hidden Lives of Owls, an exploration of the elusive lives of whales in the Pacific Ocean, home to orcas, humpbacks, sperm, blue, and gray whales. Leigh Calvez has spent a dozen years researching, observing, and probing the lives of the giants of the deep. Here, she relates the stories of nature's most remarkable creatures, including the familial orcas in the waters of Washington State and British Columbia; the migratory humpbacks; the ancient, deep-diving blue whales, the largest animals on the planet. The lives of these whales are conveyed through the work of dedicated researchers who have spent decades tracking them along their secretive routes that extend for thousands of miles, gleaning their habits and sounds and distinguishing peculiarities. The author invites the reader onto a small research catamaran maneuvering among 100-foot long blue whales off the coast of California; or to join the task of monitoring patterns of humpback whale movements at the ocean surface: tail throw, flipper slap, fluke up, or blow. To experience whales is breathtaking. To understand their lives deepens our connection with the natural world.

Despite declining stocks and health risks, island communities in the Caribbean and North Atlantic still use traditional methods to hunt whales and dolphins for food. Russell Fielding presents the art, history, and purpose of whaling in these different cultures and describes what their future might look like as modern realities take hold.

The legend of the Great Spotted Whale has never been proven until two whale watchers set out on a journey fifty years later to find the mythical animal. When they finally see it, they discover another surprise even bigger than they imagined. From his childhood fascination with the gigantic Natural History Museum model of a blue whale, to his abiding love of Moby-Dick, to his adult encounters with the living animals in the Atlantic Ocean, the acclaimed writer Philip Hoare has been obsessed with whales. The Whale is his unforgettable and moving attempt to explain why these strange and beautiful animals exert such a powerful hold on our imagination.

A rich and captivating novel set amid the witty, high-spirited literary society of 1850s New England, offering a new window on Herman Melville's emotionally charged relationship with Nathaniel Hawthorne and how it transformed his

masterpiece, *Moby-Dick* In the summer of 1850, Herman Melville finds himself hounded by creditors and afraid his writing career might be coming to an end—his last three novels have been commercial failures and the critics have turned against him. In despair, Melville takes his family for a vacation to his cousin's farm in the Berkshires, where he meets Nathaniel Hawthorne at a picnic—and his life turns upside down. *The Whale* chronicles the fervent love affair that grows out of that serendipitous afternoon. Already in debt, Melville recklessly borrows money to purchase a local farm in order to remain near Hawthorne, his newfound muse. The two develop a deep connection marked by tensions and estrangements, and feelings both shared and suppressed. Melville dedicated *Moby-Dick* to Hawthorne, and Mark Beauregard's novel fills in the story behind that dedication with historical accuracy and exquisite emotional precision, reflecting his nuanced reading of the real letters and journals of Melville, Hawthorne, Oliver Wendell Holmes, and others. An exuberant tale of longing and passion, *The Whale* captures not only a transformative relationship—long the subject of speculation—between two of our most enduring authors, but also their exhilarating moment in history, when a community of high-spirited and ambitious writers was creating truly American literature for the first time.

From beloved, award-winning poet Aimee Nezhukumatathil comes a debut work of nonfiction—a collection of essays about the natural world, and the way its inhabitants can teach, support, and inspire us. As a child, Nezhukumatathil called many places home: the grounds of a Kansas mental institution, where her Filipina mother was a doctor; the open skies and tall mountains of Arizona, where she hiked with her Indian father; and the chillier climes of western New York and Ohio. But no matter where she was transplanted—no matter how awkward the fit or forbidding the landscape—she was able to turn to our world's fierce and funny creatures for guidance. "What the peacock can do," she tells us, "is remind you of a home you will run away from and run back to all your life." The axolotl teaches us to smile, even in the face of unkindness; the touch-me-not plant shows us how to shake off unwanted advances; the narwhal demonstrates how to survive in hostile environments. Even in the strange and the unlovely, Nezhukumatathil finds beauty and kinship. For it is this way with wonder: it requires that we are curious enough to look past the distractions in order to fully appreciate the world's gifts. Warm, lyrical, and gorgeously illustrated by Fumi Nakamura, *World of Wonders* is a book of sustenance and joy.

"Readers new to the work of Christopher Moore will want to know two things immediately. First: Where has this guy been hiding? (Answer: In plain sight, since he has a cult following.)...[H]e writes laid back fables straight out of Margaritaville, on the cusp of humor and science fiction."—Janet Maslin, *New York Times* Whale researcher Nathan Quinn has a problem. It's not a new problem; in fact, it's been around for nearly 20 million years. And Nate's spent most of his adult life working to solve it. You see, although everybody (well, almost everybody) knows that humpback whales sing (outside of human composition, the most complex songs on the planet) no one knows why. Nate, a Ph.D. in behavior biology, intends to discover the answer to this burning question—and soon. Every winter he and Clay Demolocus, his partner in the Maui Whale Research Foundation, ply the warm waters between the islands of Maui and Lanai, recording the eerily beautiful songs of the humpbacks and returning to their lab for electronic analysis. The trouble is, Nate's beginning to wonder if he hasn't spent just a little too much time in the sun. Either that, or he's losing his mind. Because today, as he was shooting an I.D. photo of a humpback tail fluke, Nate could've sworn he saw the words "Bite Me" scrawled across the whale's tail. . .
