Growing worldwide populations increasingly require faster, safer, and more efficient transportation systems. These needs have led to a renewed interest in high-speed guided ground transportation technology, inspired considerable research, and instigated the development of better analytical and experimental tools. A very significant body of knowledge currently exists, but has primarily remained scattered throughout the literature. Vehicle Dynamics consolidates information from a wide spectrum of sources in the area of guided ground transportation. Each chapter provides a concise,

thorough statement of the fundamental theory, followed by illustrative worked examples and exercises. The author also includes a variety of unsolved problems designed to amplify and extend the theory and provide problem-solving experience. The subject of guided ground transportation is vast, but this book brings together the core topics, providing in-depth treatments of topics ranging from system classification, analysis, and response to lading dynamics and rail, air cushion, and maglev systems. In doing so, Vehicle Dynamics offers a singular opportunity for readers to build the solid background needed for solving practical vehicle dynamics problems or pursuing more advanced or specialized studies.

This book describes Italian mathematics in the period between the two World Wars. It analyzes the development by focusing on both the interior and the external influences. Italian mathematics in that period was shaped by a colorful array of strong personalities who concentrated their efforts on a select number of fields and won international

recognition and respect in an incredibly short time.

Consequently, Italy was considered a third mathematical power after France and Germany. With extraordinary skill, and using a clear and direct language, the author takes us on a journey through the ancient wisdom of Traditional Chinese Medicine. By ably mastering the subject, she provides the reader with a valuable tool that allows him to safely navigate through this vast topic. This compendium is clearly laid out and is not only extremely useful to experienced therapists, but, thanks to its ease of consultation and accessibility, it is an excellent source of information for those who are approaching the study of this ancient discipline for the first time. The basic principles of Traditional Chinese Medicine are explained by the author with great simplicity. She shows us with clarity and precision the interrelation between symptoms and imbalances, the mapping of points and meridians is easily readable, and even the Extraordinary Channels, which, unfortunately, are often overlooked by other TCM texts, are dealt with clearly and in detail. The author does not use complicated language but conveys everything the reader needs to know about Traditional Chinese Medicine in an easy to read style; this compendium is full of information like an encyclopedia and at the same time it is essential and synthetic like a notebook.

This 148-day journey began on Darcy Gaetcher's

35th birthday. The emotional waters that would fester and erupt on the ensuing journey was often more challenging to navigate than the mighty river itself. With blistering lips and irradiated fingernails, Darcy would tackle raging Class Five whitewater for twenty-five days straight, barely survived a dynamite-filled canyon being prepared for a new hydroelectric plan. She and her two companions would encounter illegal loggers, narco-traffickers, murderous Shining Path rebels, and ruthless poachers in the black market trade in endangered species. They would plead for mercy at the hands of the murderous Ashaninka people who were convinced that they had come to steal their children's organs. In a desperate attempt meant to give her some pretense of control, Darcy even cut off all her hair before entering Peru's notoriously dangerous "Red Zone" in hopes of passing for a boy and being seen as less of a target. At once a heart-pounding adventure and a celebration of pushing personal limits, Amazon Woman speaks to all of us feeling trapped by our desk-bound, online society. This a story of finding the courage and strength to challenge nature, cultures, social norms, and oneself. Gwyneth Shepherd's sophisticated, beautiful cousin Charlotte has been prepared her entire life for traveling through time. But unexpectedly, it is Gwyneth who in the middle of class takes a sudden spin to a different era! Gwyneth must now unearth

the mystery of why her mother would lie about her birth date to ward off suspicion about her ability, brush up on her history, and work with Gideon—the time traveler from a similarly gifted family that passes the gene through its male line, and whose presence becomes, in time, less insufferable and more essential. Together, Gwyneth and Gideon journey through time to discover who, in the 18th century and in contemporary London, they can trust. Kerstin Gier's *Ruby Red* is young adult novel full of fantasy and romance.

In this fascinating collection of essays, an international group of scholars explores the sonic consequences of transcultural contact in the early modern period. They examine how cultural configurations of sound impacted communication, comprehension, and the categorisation of people. Addressing questions of identity, difference, sound, and subjectivity in global early modernity, these authors share the conviction that the body itself is the most intimate of contact zones, and that the culturally contingent systems by which sounds made sense could be foreign to early modern listeners and to present day scholars. Drawing on a global range of archival evidence—from New France and New Spain, to the slave ships of the Middle Passage, to China, Europe, and the Mediterranean court environment—this collection challenges the privileged position of European acoustical practices within the discipline of global-historical musicology. The discussion of Black and non-European experiences demonstrates how the production of ‘the canon’ in the cosmopolitan centres of colonial empires was underpinned by processes of human exploitation and extraction of resources. As such, this text is a timely response to calls within the discipline to decolonise music history and to contextualise the canonical works of the European past. This volume is accessible to a wide and interdisciplinary audience, not only within musicology, but also to those interested in early modern global history, sound studies, race, and slavery. When Benito Mussolini proclaimed that "Cinema is the strongest weapon," he was telling only half the story. In reality, very few feature films during the Fascist period can be labeled as propaganda. Re-viewing Fascism considers the many films that failed as "weapons" in creating cultural consensus and instead came to reflect the complexities and contradictions of Fascist culture. The volume also examines the connection between

cinema of the Fascist period and neorealism—ties that many scholars previously had denied in an attempt to view Fascism as an unfortunate deviation in Italian history. The postwar directors Luchino Visconti, Roberto Rossellini, and Vittorio de Sica all had important roots in the Fascist era, as did the Venice Film Festival. While government censorship loomed over Italian filmmaking, it did not prevent frank depictions of sexuality and representations of men and women that challenged official gender policies. Re-viewing Fascism brings together scholars from different cultural and disciplinary backgrounds as it offers an engaging and innovative look into Italian cinema, Fascist culture, and society.

Reading, David Mikics says, should not be drudgery, and not mere information-gathering or escape either, but a way to live life at a higher pitch. *Slow Reading in a Hurried Age* is a practical guide for anyone who yearns for a more meaningful, satisfying reading experience, as well as sharper reading skills and improved concentration.

In this book Umberto Eco argues that translation is not about comparing two languages, but about the interpretation of a text in two different languages, thus involving a shift between cultures. An author whose works have appeared in many languages, Eco is also the translator of Gérard de Nerval's *Sylvie* and Raymond Queneau's *Exercices de style* from French into Italian. In *Experiences in Translation* he draws on

his substantial practical experience to identify and discuss some central problems of translation. As he convincingly demonstrates, a translation can express an evident deep sense of a text even when violating both lexical and referential faithfulness. Depicting translation as a semiotic task, he uses a wide range of source materials as illustration: the translations of his own and other novels, translations of the dialogue of American films into Italian, and various versions of the Bible. In the second part of his study he deals with translation theories proposed by Jakobson, Steiner, Peirce, and others. Overall, Eco identifies the different types of interpretive acts that count as translation. An enticing new typology emerges, based on his insistence on a common-sense approach and the necessity of taking a critical stance. Combines theme and genre analysis in a study of the Italian author, from her first literary writings in the 1930s to her novels in the 1990s.

“The first English translation of what has long been considered a classic in Europe...it is easy to see why

the work has been held in such esteem abroad.”—The New Yorker THE word ‘revolution’ may mean either the forcible overthrow of an established social or political order or any great change brought about in a pre-existing situation, even slowly and without violence. The word can be used in both senses for the upheaval that took place in France towards the end of the eighteenth century. In so far as it consisted in the violent destruction of the feudal and monarchical régime, the French Revolution may be said to have come to an end on September 21st, 1792, when the monarchy was formally abolished. But as the creation of a new social and political order it continued until the coup d’état of Brumaire, indeed, up to the time of the Consulate for Life, when nineteenth-century France appeared finally constituted. This book is concerned with the French Revolution as understood in the first sense. Its aim is to explain why and in what way the feudal monarchy was destroyed. In this endeavour it has been necessary to present the four revolutionary years in relation to a complex system of cause and effect the origins of which must be traced to former times, often centuries before the Revolution itself. A considerable part of the book, therefore, is devoted to social conditions, ideas and events chronologically remote from, but logically bound up with, the revolutionary period. The author’s aim has been, not to bring new facts to light, but simply to put before

his readers, in a rapid synthesis, the conclusions he has reached in the course of extensive study of the subject.

There's a kiss by a fireside that was a mistake, there's a man-hating aunt by the seaside, and a gunman in Texas wanting a fight. There's a white heron flying over a forest, and a messenger running between two benches in a park. And of course, there's a girl who meets a boy . . . These love stories are by US writers Kate Chopin, Stephen Crane, Sarah Orne Jewett, O. Henry, and Canadian writer Lucy Maud Montgomery (author of the famous *Anne of Green Gables*).

She possesses an amazing familiarity with the classics combined with the ease and lightness of those who surf the web." ?André Aciman, New York Times—bestselling author of Find Me "[Marcolongo's] declaration of love for Ancient Greek does more than celebrate the virtues of its grammar, it shows us modern fools how this language can help us understand ourselves better and live a better life." ?Le Monde (France)
