Institutional Work Thomas B. Lawrence,Roy Suddaby,Bernard Leca,2009-07-16 This book contains a series of essays and empirical case studies exploring the nature of institutional work.

Institutional Work Thomas B. Lawrence,Roy Suddaby,Bernard Leca,2009-07-16 The 'institutional' approach to organizational research has shown how enduring features of social life - such as marriage and bureaucracy - act as mechanisms of social control. Such approaches have traditionally focused attention on the relationships between organizations and the fields in which they operate, providing strong accounts of the processes through which institutions govern action. In contrast, the study of institutional work reorients these traditional concerns, shifting the focus to understanding how action affects institutions. This book sets a research agenda within the field of institutional work by analyzing the ways in which individuals, groups, and organizations work to create, maintain, and disrupt the institutions that structure their lives. Through a series of essays and case studies, it explores the conceptual core of institutional work, identifies institutional work strategies, provides exemplars for future empirical research, and embeds the concept within broader sociological debates and ideas.

Review of Institutional Work Frank Dobbin,2014 Institutions impose constraints on us all. In recent years the institution of the university press has constrained the publication of edited volumes, and the appearance of this particular volume might be seen as evidence against the notion that institutional constraints are real. But this is the exception that proves the rule that edited volumes cannot succeed. Lawrence, Suddaby, and Leca have brought together a set of pathbreaking essays that speak authoritatively to a single issue.

Institutions and Organizations Trish Reay, Tammar B. Zilber, Haridimos Tsoukas, Ann Langley, 2019-07-04 Institutions - the structures, practices, and meanings that define what people and organizations think, do, and aspire to - are created through process. They are 'work in progress' that involves continual efforts to maintain, modify, or disturb them. Institutional logics are also in motion, holding varying degrees of dominance that change over time. This volume brings together two streams of thought within organization theory - institutional theory and process perspective - to advocate for stronger process ontology that highlights institutions as emergent, generative, political, and social. A stronger process view allows us to challenge our understanding of central concepts within institutional theory, such as 'loose coupling', 'institutional work', the work of institutional logics on the ground, and institutionalization between diffusion and translation. Enriched with an emphasis on practice and widened by taking a broad view of institutions, this volume draws on the Ninth International Symposium on Process Organization Studies to offer key insights that will inform our thinking of institutions as processes.

The Academy of Management Annals James P. Walsh, Arthur P. Brief, 2007 The Academy of Management is proud to announce the inaugural volume of The Academy of Management Annals. This exciting new series follows one guiding principle: The advancement of knowledge is possible only by conducting a thorough examination of what is known and unknown in a given field. Such assessments can be accomplished through comprehensive, critical reviews of the literature--crafted by informed scholars who determine when a line of inquiry has gone astray, and how to steer the research back onto the proper path. The Academy of Management Annals provide just such essential reviews. Written by leading management scholars, the reviews are invaluable for ensuring the timeliness of advanced courses, for designing new investigative approaches, and for identifying faulty methodological or conceptual assumptions. The Annals strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the Annals explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see The Academy of Management Annals as a valuable resource to turn to for comprehensive, up-to-date information--published in a single volume every year by the preeminent association for management research.

The Institutional Logics Perspective Patricia H. Thornton, William Ocasio, Michael Lounsbury, 2012-02-16 How do institutions influence and shape cognition and action in individuals and organizations, and how are they in turn shaped by them? Various social science disciplines have offered a range of theories and perspectives to provide answers to this question. Within organization studies in recent years, several scholars have developed the institutional logics perspective. An institutional logic is the set of material practices and symbolic systems including assumptions, values, and beliefs by which individuals and organizations provide meaning to their daily activity, organize time and space, and reproduce their lives and experiences. This approach affords significant insights, methodologies, and research tools, to analyze the multiple combinations of factors that may determine cognition, behaviour, and rationalities. In tracing the development of the institutional logics perspective from earlier institutional theory, the book analyzes seminal research, illustrating how and why influential works on institutional theory motivated a distinct new approach to scholarship on institutional logics. The book shows how the institutional logics perspective transforms institutional theory. It presents novel theory, further elaborates the institutional logics perspective, and forges new linkages to key literatures on practice, identity, and social and cognitive psychology. It develops the microfoundations of institutional logics and institutional entrepreneurship, proposing a set of mechanisms that go beyond meta-theory, integrating this work with macro theory on institutional logics into a cross-levels model of cultural heterogeneity. By incorporating current psychological understanding of human behaviour and linking it to sociological perspectives, it aims to provide an encompassing framework for institutional analysis, and to be an essential and accessible reference for scholars and advanced students of organizational behaviour, organization and management theory, business strategy, and cultural sociology.

The SAGE Handbook of the Sociology of Work and Employment Stephen Edgell, Heidi Gottfried, Edward Granter, 2015-12-03 The SAGE Handbook of the Sociology of Work and Employment is a landmark collection of original contributions by leading specialists from around the world. The coverage is both comprehensive and comparative (in terms of time and space) and each 'state of the art' chapter provides a critical review of the literature combined with some thoughts on the direction of research. This authoritative text is structured around six core themes: Historical Context and Social Divisions The Experience of Work The Organization of Work Nonstandard Work and Employment Work and Life beyond Employment Globalization and the Future of Work. Globally, the contours of work and employment are changing dramatically. This handbook helps academics and practitioners make sense of the impact of these changes on individuals, groups, organizations and societies. Written in an accessible style with a helpful introduction, the retrospective and prospective nature of this volume will be an essential resource for students, teachers and policy-makers across a range of fields, from business and management, to sociology and organization studies.

Constructing Organizational Life Thomas B. Lawrence, Nelson Phillips, 2019 Across the social sciences, scholars are increasingly showing how people 'work' to construct organizational life, including the rules and routines that shape and enable organizational activity, the identities of people who occupy organizations, and the societal norms and assumptions that provide the context for organizational action. The idea of work emphasizes the ways in which people and groups engage in purposeful, reflexive efforts rooted in an awareness of organizational life as constructed in human interaction and changeable through human effort. Studies of these efforts have identified new forms of work including emotion work, identity work, boundary work, strategy work, institutional work, and a host of others. Missing in these conversations, however, is a recognition that these forms of work are all part of a broader phenomenon driven by historical shifts that began with modernity and dramatically accelerated through the twentieth century. This book introduces the social-symbolic work perspective, which addresses this broader phenomenon. The social-symbolic work perspective integrates diverse streams of research to examine how people purposefully and reflexively work to construct organizational life, including the identities, technologies, boundaries, and strategies that constitute their organizations. In this book, the authors define social-symbolic work and introduce three forms - self work, organization work, and institutional work. Social-symbolic work highlights people's efforts to construct the social world, and focuses attention on the motivations, practices, resources, and effects of those efforts. This book explores eight distinct streams of social-symbolic work research, drawing on a broad range of examples from the worlds of business, politics, sports, social movements, and many others. It provides researchers, students, and practitioners with an integrative theoretical framework useful in understanding social-symbolic work, a survey of the

main forms of social-symbolic work, a rich set of theoretical opportunities to inspire new studies, and practical methodological guidance for empirical research on social-symbolic work.

Institutional Logics in Action Michael Lounsbury, Eva Boxenbaum, 2013-07-09 The Institutional Logics Perspective is one of the fastest growing new theoretical areas in organization studies (Thornton, Ocasio & Lounsbury, 2012). Building on early efforts by Friedland & Alford (1991) to bring society back in to the study of organizational dynamics, this new scholarly domain has revived institutional analysis by embracing a

SAGE Directions in Organization Studies Stewart Clegg, 2010 SAGE has unparalleled depth in journal back lists in the field of organization studies, and publishes several of the top journals in the field, including *Organization*, *Human Relations* and *Organization Studies*. This four-volume set brings together over sixty of the key papers published in SAGE books and journals since the turn of the millennium, many of which are not easily available in traditional library holdings. Professor Stewart Clegg is widely recognised as a preeminent scholar of organization studies, and together with an international editorial board of ten renowned scholars in the field.

Organizations, Policy, and the Natural Environment Andrew J. Hoffman, Marc J. Ventresca, 2002 This book brings together emerging perspectives from organization theory and management, environmental sociology, international regime studies, and the social studies of science and technology to provide a starting point for discipline-based studies of environmental policy and corporate environmental behavior. Reflecting the book's theoretical and empirical focus, the audience is two-fold: organizational scholars working within the institutional tradition, and environmental scholars interested in management and policy. Together this mix forms a creative synthesis for both sets of readers, analyzing how environmental policy and organizational practices are shaped, spread and contested.
