Apply software-inspired management concepts to accelerate modern marketing In many ways, modern marketing has more in common with the software profession than it does with classic marketing management. As surprising as that may sound, it's the natural result of the world going digital. Marketing must move faster, adapt more quickly to market feedback, and manage an increasingly complex set of customer experience touchpoints. All of these challenges are shaped by the dynamics of software—from the growing number of technologies in our own organizations to the global forces of the Internet at large. But you can turn that to your advantage. And you don't need to be technical to do it. Hacking Marketing will show you how to conquer those challenges by adapting successful management frameworks from the software industry to the practice of marketing for any business in a digital world. You'll learn about agile and lean management methodologies, innovation techniques used by high-growth technology companies that any organization can apply, pragmatic approaches for scaling up marketing in a fragmented and constantly shifting environment, and strategies to unleash the full potential of talent in a digital age. Marketing responsibilities and tactics have changed dramatically over the past decade. This book now updates marketing management to better serve this rapidly evolving discipline. Increase the tempo of marketing's responsiveness without chaos or burnout Design "continuous" marketing programs and campaigns that constantly evolve Drive growth with more marketing experiments while actually reducing risk Architect marketing capabilities in layers to better scale and adapt to change Balance strategic focus with the ability to harness emergent opportunities As a marketer and a manager, Hacking Marketing will expand your mental models for how to lead marketing in a digital world where everything—including marketing—flows with the speed and adaptability of software.

In the increasingly competitive global market, successful and meaningful intercultural advertising plays a key role in reaching out to consumers from diverse language and cultural backgrounds. Therefore, it is crucial for individuals and businesses to be able to navigate the field of marketing communications to cut through the noise in a consumerist society to persuade their target audience. The Role of Language and Symbols in Promotional Strategies and Marketing Schemes provides emerging research exploring the theoretical and practical aspects of the power of words and symbols used in promotional strategies and marketing schemes. Featuring coverage on a broad range of topics such as shock advertising, branding, and celebrity endorsement, this book is ideally designed for marketers, managers, business professionals, academicians, researchers, and graduate-level students seeking current research on the use of language and symbols in marketing tactics.

Using a hands-on approach, this text shows students how to develop a complete integrated marketing communications programme.

"A readable and absorbing account of what advertising people try to achieve (whether or not they know quite how or why), grounded in Chris Hackley's real and recent acquaintance with the practicalities of advertising, as well as its principles.... He minimises the inevitable jargon of linguistics and communication theory. His own language is always accurate and clear, and often engaging. The well managed flow from chapter to chapter sustains interest and enjoyment. I read the book from cover to cover in one sitting." - INTERNATIONAL JOURNAL OF ADVERTISING "Professor Hackley's book provides a timely reminder to student and practitioner alike that advertising continues to play a key role in the successful planning and implementation of marketing communications. Underpinned by a series of topical and often thought-provoking illustrations, this work not only explains how advertising is developed, but also presents the discipline in the wider context of socio-cultural and linguistic research. Working from a practical advertising management basis, the text raises some key issues for advertising as focus for academic and intellectual study." - Chris Blackburn, The Business School, Oxford Brookes University, formerly Account Director at Foote, Cone & Belding, Leagas Delaney and Boase Massimi Pollitt "Dr Hackley has an uncommon approach to advertising. His book combines the abstract theory of advertising and its effects with a hard-nosed practical approach. It is a guide to understanding and appreciating advertising and a way to understand how and why advertising works or why it does not. I think that this book is a fine text for students. Even more, it deserves to be read by advertising practitioners." - Arthur J. Kover, former editor of the Journal of Advertising Research, Management Fellow at the Yale School of Management Advertising and Promotion is not only a detailed and insightful account of how advertising is created; the book also explains how advertising comes to cast its all-enveloping shadow over contemporary consumer culture. Many case examples drawn from major international campaigns are used to illustrate the power of advertising to portray brand 'personalities' in terms that resonate with consumers across many cultures. It contains detailed coverage of the major areas of advertising and marketing communications but it is not a simplistic treatment. Advertising and Promotion takes a novel intellectual approach and draws on concepts from the wider humanities and social sciences to cast fresh light on an over-familiar subject matter. It uniquely combines detailed case information, current research and lively topical issues to offer an authoritative and comprehensive account of advertising's pre-eminent role in contemporary

marketing communications. It is an advanced student text, a reflective practitioner's handbook and an insightful account for the general reader.

"This book educates readers on how to meet online advertising and Internet marketing challenges for both present and future tactics"--Provided by publisher.
