The international community is confronted with a new set of challenges, the scale and complexity of which is virtually unprecedented. In this connection, there are heightened demands for international business research to provide guidance for decision-makers on how to solve actual problems. Impact of International Business addresses current challenges and issues, and provides fresh insights that are pertinent for policy and practice. The book examines various contemporary international business issues from various viewpoints, draws on research conducted in different countries, examines IB issues in both developed and emerging country contexts, offers various theoretical perspectives and different methodologies. It provides both rigorous empirical and conceptual advances and insights that are useful and relevant for managers and policy makers in their search for solutions in face of current challenges posed by the international environment.

This book addresses major issues related to international enterprises and the world in which they operate from a socio-political perspective. Throughout the work, the author builds a coherent picture of the 'life' of an international, multinational firm from its birth through to its later 'personal' characteristics. Drawing on the author's own research and work in this field, in addition to work of other scholars, the book spans a number of countries in Asia, Europe and North America. Divided into three parts, the author examines the internationalisation of firms in all its guises and explores the implications of socio-political forces for the management of an international firm.

This report presents the findings of a review undertaken to provide advice on the mandates and future role of the Canadian Broadcasting Corporation, the National Film Board, and Telefilm Canada. The review committee examined these cultural institutions with regard to their past accomplishments, their present performance, and the changing world in which they will operate

over the next decade, while taking into account current budgetary constraints. The institutions apprised the committee of the measures they envisage to make themselves more effective, efficient, and productive, and the committee examined a number of solutions for reducing the cost of providing their services. In addition, the committee considered whether all those services continue to be essential, whether the institutions themselves are still indispensable, and whether and how they need to change. Finally, the committee proposes a set of policies and a redefined role for those institutions for the next decade.

Proper planning in the design of new school facilities saves time, money, and resources. The importance of planning increases when funds are scarce, as limited dollars must be put to their best use. A dialogue should be generated in the community and among members of the school planning committee regarding how schools should look. Many questions that must be considered in the construction of new schools and building remodeling are addressed as well as issues and alternatives each district can take into account with its own resources, situation, and philosophy. The first section looks at a hypothetical school containing design elements that are described and discussed in section 2. Section 3 outlines planning steps, specification determination, and planning for quality. Design examples of nine schools, a master plan checklist, and a listing of resources in providing planning assistance are included. (EJS)

This dynamic full-colour text actively engages students in their exploration of Canadian law and its social, political, and global ramifications. Canadian and International Law connects the historical roots of law to issues in contemporary society. Developed and tested by highly experienced teachers, subject specialists, and students for maximum classroom applicability. This text is sufficiently rigorous for university prep, yet has been designed to meet the language and interests of grade 12 students.

The inspiration for the film that won the 2004 Sundance Film Festival Audience Award for Best Documentary, *The Corporation* contends that the corporation is created by law to function much like a psychopathic personality, whose destructive behavior, if unchecked, leads to scandal and ruin. Over the last 150 years the corporation has risen from relative obscurity to become the world's dominant economic institution.

Eminent Canadian law professor and legal theorist Joel Bakan contends that today's corporation is a pathological institution, a dangerous possessor of the great power it wields over people and societies. In this revolutionary assessment of the history, character, and globalization of the modern business corporation, Bakan backs his premise with the following observations: -The corporation's legally defined mandate is to pursue relentlessly and without exception its own economic self-interest, regardless of the harmful consequences it might cause to others.

-The corporation's unbridled self-interest victimizes individuals, society, and, when it goes awry, even shareholders and can cause corporations to self-destruct, as recent Wall Street scandals reveal. -Governments have freed the corporation, despite its flawed character, from legal constraints through deregulation and granted it ever greater authority over society through privatization. But Bakan believes change is possible and he outlines a far-reaching program of achievable reforms through legal regulation and democratic control. Featuring in-depth interviews with such wide-ranging figures as Nobel Prize winner Milton Friedman, business guru Peter Drucker, and cultural critic Noam Chomsky, *The Corporation* is an extraordinary work that will educate and enlighten students, CEOs, whistle-blowers, power brokers, pawns, pundits, and politicians alike.

The true, declassified account of CIA operative Tony Mendez's daring rescue of American hostages from Iran that inspired the critically-acclaimed film directed by and starring Ben Affleck, and co-starring John Goodman, Alan Arkin, and Bryan Cranston. On November 4, 1979, Iranian militants stormed the American embassy in Tehran and captured dozens of American hostages, sparking a 444-day ordeal and a quake in global politics still reverberating today. But there is a little-known drama connected to the crisis: six Americans escaped. And a top-level CIA officer named Antonio Mendez devised an ingenious yet incredibly risky plan to rescue them before they were detected. Disguising himself as a Hollywood producer, and supported by a cast of expert forgers, deep cover CIA operatives, foreign agents, and Hollywood special effects artists, Mendez traveled to Tehran under the guise of scouting locations for a fake science fiction film called *Argo*. While pretending to find the perfect film backdrops, Mendez and a colleague succeeded in contacting the escapees, and smuggling them out of Iran. Antonio Mendez finally details the extraordinarily complex and dangerous operation he led more than three decades ago. A riveting story of secret identities and international intrigue, *Argo* is the gripping account of the history-making collusion between Hollywood and high-stakes espionage.

The #1 New York Times bestseller—Now a Major Motion Picture from Paramount Pictures From the author of *The Blind Side* and *Moneyball*,

The Big Short tells the story of four outsiders in the world of high-finance who predict the credit and housing bubble collapse before anyone else. The film adaptation by Adam McKay (Anchorman I and II, The Other Guys) features Academy Award® winners Christian Bale, Brad Pitt, Melissa Leo and Marisa Tomei; Academy Award® nominees Steve Carell and Ryan Gosling. When the crash of the U.S. stock market became public knowledge in the fall of 2008, it was already old news. The real crash, the silent crash, had taken place over the previous year, in bizarre feeder markets where the sun doesn't shine and the SEC doesn't dare, or bother, to tread. Who understood the risk inherent in the assumption of ever-rising real estate prices, a risk compounded daily by the creation of those arcane, artificial securities loosely based on piles of doubtful mortgages? In this fitting sequel to Liar's Poker, Michael Lewis answers that question in a narrative brimming with indignation and dark humor.
