"We have continued to evolve the structure and content of this textbook in step with the rapidly changing world of international business. This includes completely revising several key chapters, including Chapter 6, on International Trade. This is entirely updated and includes new case studies covering both the trade-war between the US and China and the complex Brexit process. These and other real-world developments have made a wide range of stakeholders much more aware of the significance of global trade interdependencies than in the past. Chapter 16 on the European Union is also entirely updated to take account of Brexit and a range of new socio-political and economic events in Europe. Chapter 11 ('MNEs as Responsible Stakeholders') has been removed, making this edition more consolidated, with 20 rather than 21 chapters. In place of Chapter 11 we have inserted new sections, frameworks and case studies on responsible business throughout the book as a fundamental dimension of international business theory and practice across all the other chapters. New case studies, such as 'Businesses and NGOs working together on climate change' in Chapter 4, provide additional material on this topic. Chapter 14, on 'Political risk and negotiation strategy' also features new case studies on the 'US-Venezuela oil dispute' and 'Huawei accused of spying'--

Traditionally, international business (IB) texts survey the field from a U.S. perspective, going on to compare the U.S. to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the U.S. angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective". In accomplishing the U.S. and the Reverse Perspective approaches, the authors interview business executives and politicians from a number of countries, i.e. the U.S., Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, Russia, etc. The interviews are incorporated at appropriate points in the text as first-hand information providing a multinational flavor to IB from each country's representatives. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics \* Covers international business issues from a multinational perspective. A focus on different groups of countries, i.e. developed, newly developed, developing, EU. \* Unique structure with multinational issues covered in the first four parts. Then specific countries of the world presented in the fifth part where multinational/IB issues from the first four parts become especially meaningful. \* Each chapter features the Reverse Perspective Case that provides material for discussion and/or case analysis from a global perspective not necessarily that of the U.S \* Website to support the text and lecturer

Business transactions and partnerships across borders have become easier than ever due to globalization and global digital connectivity. As part of this shift in the business sphere, managers, executives, and strategists across industries must acclimate themselves with the challenges and opportunities for conducting business globally. International Business: Concepts, Methodologies, Tools, and Applications presents the latest research innovations focusing on cross-cultural communications and training, international relations, multinational enterprises, outsourcing, international business strategies, and competitive advantage in the global marketplace. This publication is an exhaustive multi-volume work essential to academic and corporate libraries who serve researchers, scholars, business executives and professionals, and graduate-level business students. Globalization is changing the face of Higher Education across the world. Academics and students today are internationally mobiles and unprecedented numbers of international exchanges are cross-border education projects are being developed. The implications for individual universities are significant: international students can bring much needed revenues to boost university coffers and stimulate university classrooms but they also have high expectations and demands. This book discusses the implications for those involved in managing the organizational processes and those designing programmes and supporting the student experience. A key concern in the text is that of reciprocal internationalization - the importance for universities to develop within an internationally-integrated environment rather than as national universities which accommodate the needs of people from

other countries into their pre-existing practices. The emphasis throughout the discussion is therefore on the development of intercultural competences for university people supported by sustainable international management practices.

*Law, Business and Regulation: A Managerial Perspective* examines the intersection, and impact, of the changing nature of business, challenges presented by increasing globalization, and the expanding impact of technology with a renewed emphasis on ethical decision making. These areas of study include constitutional law, international perspectives, contracts, business associations (partnerships, corporations and limited liability companies), antitrust law, employment law and discrimination, and intellectual property (patents, copyrights, trademarks and trade secrets). The authors have purposefully emphasized aspects of the legal environment of business that are especially relevant for future business managers. *Law, Business and Regulation: A Managerial Perspective* provides managers with a framework in which they will identify, consider, and then solve practical problems in a business environment in which legal and regulatory issues have attained prominence. *Law, Business and Regulation: A Managerial Perspective* presents readings, materials, and case decisions that provide a basis for understanding the unique "legal vocabulary," and identifying and analyzing critical legal principles and concepts. The cases contained in this volume have been carefully selected and edited and contain questions designed to enable students to gain insights which reflect their importance in the development of the law as it relates to managerial functions. *Law, Business and Regulation: A Managerial Perspective* addresses selected traditional business law topics as well as those that are considered more broadly as the legal environment of business. In addition, topical ethical considerations related to the chapter materials are included. These considerations are designed to sharpen our students' appreciation for the role that ethics will play in the decision making process. For courses in international business. Corporate governance is not just about models of best practice organisation or prescriptions following laws or social conventions. Corporate governance is also about persons of power seeking performance, and they do so in ways that transcend structures and pre-conceived notions of the structural set-up of the business. This book emphasises the decision-making dimensions of corporate governance, placing it right in the messy middle of the ever-changing world of capitalism, focussing on the interplay between professional managers and shareholders. This book aims to bring together several fresh perspectives on the development of capitalism seen through the lens of corporate governance. It illustrates the role of intentionality and persons, both as a method with which to understand processes of change, but also as a principle with which to seek a deeper understanding of the corporate governance choices made. It will be of interest to researchers, academics and students in the fields of corporate governance and entrepreneurship, as well as practitioners and other audience interested in the evolution of capitalism and corporate culture.
