The dynamic, collaborative management model that saved a U.S. manufacturing city When car-making giant General Motors decided to close its plant in Lansing, Michigan, in 1996, one person—the city's newly elected mayor—stood up and said “no.” Initially, it was the cry of a man in the wilderness. Not once in its century-long history had GM reversed a decision to close a plant. But Mayor David Hollister quietly went to work building the Lansing Works! Keep GM! movement and succeeded in defying all the odds. Lansing remains GM's Oldsmobile headquarters. Hollister's collaborative problem-solving approach—the Second Shift model—succeeded in bringing together state and regional politicians, economic developers, private sector firms, labor unions, educators, and residents of the region. Powerful, persuasive, and well-organized, this coalition implemented a strategic, six-dimensional framework to achieve the seemingly impossible: • Identifying: Name the challenge and its impact • Partnering: Develop meaningful relationships • Building: Construct your strategy as you go • Solving: Engage in constant problem solving • Celebrating: Mark successful milestones • Persevering: Adapt and endure The Lansing Works! Keep GM! movement was a victory of people over bureaucracy, of a can-do attitude over cynicism—a story rarely told in today's complex, technological, and often dehumanizing world of large business and out-of-control government. And the best part was that, in the end, both sides came away winners. It's proof positive that when the public and private sectors work together as equal partners, amazing things can happen. One of the great business sagas of modern times, Second Shift provides a proven, practical design for problem solving that anyone can apply in any business, large or small.

International Business addresses the strategic, structural and functional implications of international business in firms around the world. This is exhibited through a critical, integrated flow from chapter to chapter.

With the help of industrialist Andrew Carnegie, the author of this remarkable book spent two decades interviewing hundreds of people renowned for their wealth and achievement. Napoleon Hill's all-time bestseller in the personal success field offers priceless advice on positive thinking and overcoming adversity by distilling the collective wisdom of Henry Ford, Thomas Edison, John D. Rockefeller, and other successful figures from the worlds of finance, industry, and the arts. Growing rich, Hill explains, is about far more than just making money. "Whatever the mind

can conceive and believe," he asserts, "it can achieve with positive mental attitude." Hill outlines 13 principles of success involving goal setting, developing entrepreneurial thinking, and exercising effective leadership. A must for any reader of *The Secret*, this guide will transform the way you think about time, money, and relationships, setting your feet on the path to financial freedom.

In an era of market triumphalism, this book probes the social and environmental consequences of market-linked nature conservation schemes. Rather than supporting a new anti-market orthodoxy, Charles Zerner and colleagues assert that there is no universal entity, "the market." Analysis and remedies must be based on broader considerations of history, culture, and geography in order to establish meaningful and lasting changes in policy and practice. Original case studies from Asia, Latin America, Africa, and the South Pacific focus on topics as diverse as ecotourism, bioprospecting, oil extraction, cyanide fishing, timber extraction, and property rights. The cases position concerns about biodiversity conservation and resource management within social justice and legal perspectives, providing new insights for students, scholars, policy professionals and donor/foundations engaged in international conservation and social justice. "International Business' addresses the strategic, structural and functional implications of international business in firms around the world."--Source inconnue.

3 things to know about the focus of *Dynamic Business Law, 2e: Emphasis on ETHICAL DECISION-MAKING*. In chapter 2, the authors introduce a framework for making ethical business decisions that students can use on a regular basis. Following each case there are questions designed to train students to apply this approach. Then repeatedly throughout the chapters, questions about business ethics are raised in the text. This framework is designed to help improve the learning process of students and to give a sense of relevancy to the ethical decision making process. **Emphasis on CRITICAL THINKING.** Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in *Dynamic Business Law* as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. **Emphasis on the BUSINESS in business law.** *Dynamic Business Law* emphasises the tie of legal issues back to the core business curriculum. This will help both students and faculty. Students need to understand how the concepts they learn in this course tie into their business careers. Instructors can easily show that the study of business law is best seen as a foundational component of the larger study of business administration. *Dynamic Business Law* now includes *Connect Business Law* as a packaging option. *Connect* includes Interactive Applications for each chapter of the textbook and helps students apply legal concepts to business, stimulates critical thinking, and reinforces key topics. **Overview:** *Dynamic Business Law, 2e* is appropriate for the two-term business law course. **Emphasis on the BUSINESS in business law.** *Dynamic Business Law* emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly "defending" the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. **Emphasis on TEACHING.** Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. *Dynamic Business Law* contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. **Emphasis on CRITICAL THINKING.** Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in *Dynamic Business Law* as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. **Instructor's Supplements:** The Online Learning Center contains the complete IM, Test Bank, PowerPoint, image library, and video clips. **Instructor's Manual:** The Instructor's Manual provides a clear outline of how to begin using this text and is especially helpful to adjuncts who teach Business Law. Sample syllabi are included, as well as detailed lecture outlines incorporating PowerPoints and other materials professors can bring into their lectures. Exciting and new examples from outside the text are also included, and can be discussed in class to help generate excitement and involvement in the course from students. **Test Bank:** The Test Bank, developed by Vonda Laughlin of Carson-Newman College, contains a variety of true/false, multiple choice, and essay questions - as well as "scenario-based" questions, which are application-based, and use a situation described in a narrative, with 3 - 5 multiple-choice test questions based on the situation described in the narrative. We've aligned our Test Bank with the new AACSB guidelines, tagging each question according to its knowledge and skills areas. Categories include Global, Ethics and Social Responsibility, legal and other External Environment, communication, Diversity, Group Dynamics, Individual Dynamics, Production and IT. Designations aligning questions with Learning Objectives, features, and case, exist as well. **PowerPoint Presentation slides:** Developed by Jeff Penley at Catawba Valley Community College, we offer two different sets of slides for professors. The "Basic" set consists of an outline of each chapter. The "Premium" set expands on this outline to include hypotheticals and ethical dilemmas, allowing the instructor to incorporate application into the lecture. **Instructor Video DVD (ISBN: 0077339118, 13-digit: 9780077339111):** The Instructor Video DVD contains video clips from CBS that highlight current legal issues. **Instructor Notes,** located on the OLC, give insight into how to incorporate segments into the classroom and offer questions to stimulate discussion. Most of these videos are also part of Premium content - a big plus for instructors teaching online/hybrid courses.

Charles Hill's *Global Business Today, 3e (GBT)* has become an established text in the International Business market for its excellent, but concise coverage of the key global issues including the cultural context for global business, cross-border trade and investment, the global monetary system and competition in the global environment. *GBT*'s concise chapters give a general introduction to international business - emphasizing the environmental factors, with less coverage of operations. "The international world of states and their modern system is a literary realm," writes Charles Hill in this powerful work on the practice of international relations. "It is where the greatest issues of the human condition are played out." A distinguished lifelong diplomat and educator, Hill aims to revive the ancient tradition of statecraft as practiced by humane and broadly educated men and women. Through lucid and compelling discussions of classic literary works from Homer to Rushdie, *Grand Strategies* represents a merger of literature and international relations, inspired by the conviction that "a grand strategist . . . needs to be immersed in classic texts from Sun Tzu to Thucydides to George Kennan, to gain real-world experience through internships in the realms of statecraft, and to bring this learning and experience to bear on contemporary issues." This fascinating and engaging introduction to the basic concepts of the international order not only defines what it is to build a civil society through diplomacy, justice, and lawful governance but also describes how these ideas emerge from and reflect human nature.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Course: Principles of Management is the introductory course taken by most undergraduate business majors. Almost every text/course is organized around the four functions of management: planning, leading, organizing, and controlling (PLOC). What makes the texts different are their approach to the subject (principles vs. OB focused) and their strengths of coverage (high/strategic vs. low level/applied/skills). The aim of this text is to show how the four functions interact.

SOME DISCLAIMERS It is somewhat unusual to begin a book by declaring what it is not, but the topic of police behavior is so complex that it requires the writer to state as early as possible the limits of what he has written here to describe and explain a police officer's experience. In order for the reader to get a clear idea of what areas of police behavior are to be described, it is necessary to delineate those aspects of police behavior that are beyond the scope of this book. First of all, this book is about the psychological effects of police work on policemen: male police officers. Nearly all of the police officers with whom I have worked have been men, so my impressions and opinions are based on the experiences of male police officers. Consequently, descriptions and explanations of the motivations, anxieties, psychological defenses, and resultant behavior of police officers must be limited to policemen. I believe that there are significant differences in the psychological effects of police work on men and women, but this book does not address this issue.
