The Sixth Edition of Transnational Business Problems combines the best aspects of a conceptual, systemic approach and a problems approach. It provides a sophisticated intellectual framework for understanding the most significant contractual and regulatory issues in international business. At fewer than 600 pages, this compact book is ideal for a one-semester course. One Volume. Transnational Business Problems presents the important practical and policy aspects of international transactions in one reasonably-sized volume. Covers Systemic Issues First. Transnational Business Problems considers systemic issues first. Four introductory chapters discuss the role of the international lawyer, the resolution of international disputes, the relationship between international and domestic law, the extraterritorial reach of domestic law, and corporate social responsibility. Problems Approach. The introductory chapters are followed by eight problems, each focused on a different kind of transaction: transnational sales, agency and distributorship agreements, licensing, foreign direct investment, mergers and acquisitions, joint ventures, concession agreements, and international debt instruments. Each problem covers both contractual and regulatory issues. Nearly all begin with a sample contract. Sophistication. The book uses primary source materials--draft contracts, statutes, regulations, treaties, cases, and arbitral awards--that allow students, with help from the text, to work through issues in a realistic way. The book goes beyond the nuts and bolts of transactions to encourage consideration of broader policy issues: from the liability of corporations for human rights violations to restrictions on foreign investment; from the compulsory licensing of HIV drugs to the restructuring of sovereign debt. Geographical Diversity. Transnational Business Problems reflects the geographical diversity of business today. The problems focus on China, the European Union, the Andean Community, Mexico, and Brazil. Materials from other parts of the world are included in the introductory chapters. Intellectual Heritage. Transnational Business Problems grows out of a rich intellectual heritage that began with Milton Katz and Kingman Brewster's International Transactions and evolved into Henry Steiner and Detlev Vagts's Transnational Legal Problems. The book views transnational business problems as a particular species of transnational legal problem that both generates and is influenced by transnational legal process. Fully Updated. The Sixth Edition of Transnational Business Problems is fully updated to account for developments through the start of 2019. The introductory chapters and many of the problems have been substantially revised. Every year between editions the authors provide an update in memo form that teachers can distribute as a supplement to their classes.

Business law is a core unit for all commerce students. Written for Australian commerce students studying law as a one-semester course for the first time - gives a solid introduction to business law within its social and business context.

Concise Australian Commercial Law, now in its fifth edition, has two basic objectives: to provide students with a general understanding of the legal environment of business and to expose them to the language and perspectives of legal professionals, regulators and other commercial actors; and to provide a reference point for non-law students studying key commercial law topics - the law of contract, torts, consumer protection, agency, business organisations and business ethics - in a way that is clear, accessible and challenging for a non-law student. The authors have selected cases that should be of interest to non-law students and every effort has been made to ensure that the case extracts contain sufficient information to enable students to discuss and debate the decisions that a court has reached and appreciate how the principles could be applied in a commercial environment. Similarly the relevant legislation is discussed in a way that is designed to promote understanding of the law and the policy considerations behind the legislation. The fifth edition been updated to incorporate the many legislative changes and case law developments since the last edition. These updates include: a revised introduction (including a guide on how to approach the study of commercial law); a number of new contract law cases and an expanded section on online contracting; amendments to the Australian Consumer Law as well as a number of interesting new cases concerning consumer protection; case law developments in relation to the standard of care and causation in negligence; the recent 'safe harbour' amendments to the Corporations Act and a number of new cases dealing with directors' duties; and revisions to the chapter on Business Ethics to include references to the Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry (the Banking Royal Commission). To ensure the text is a more complete teaching and learning package, there is a revised set of activities at the end of each chapter that have been written with the non-law student in mind and can readily be used in a student-centred group work environment.

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well – to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further. Blending theory with real-life applications, the 8th Edition of LAW AND ETHICS IN THE BUSINESS ENVIRONMENT presents up-to-the-minute issues in business ethics, along with the latest in case law for an exciting and thought-provoking text. Rather than shying away from controversial topics, the text encourages lively classroom debate on everything from privacy and workers' rights to diversity and stereotyping. Its insightful cases, end-of-chapter questions, historical quotes, and chapter projects sharpen your critical thinking skills, while a wealth of interactive assignments like role plays, mock trials, roundtables, and negotiations prepare you for the ethical and legal dilemmas of the business world. Educational Law provides a comprehensive survey of the legal problems and issues that confront school administrators and policymakers. If there is a greater likelihood of litigation or error in a particular area of professional practice, the discussion is more extensive. The book is organized in accordance with the author's belief that students need to read cases to understand the subtlety and richness of the law, but for legal neophytes, cases without discussion and interpretation are often difficult to comprehend. Thus the text both explains the important concepts and principles of education law and presents court decisions to illuminate them. By employing this structure, the book combines the strengths of the traditional casebook and those of the legal treatise. It also discusses the implications of the law for educational policy and practice. Key features include the following:

*Presentation--To aid comprehension, technical legal terms are carefully explained when first introduced and discussions of complex topics move logically from overview to elaboration of important details to summary of key topics and principles.

*Cases--By integrating carefully edited cases into the analysis of legal issues, the book exposes students with little or no background in law to the subtlety and richness of legal thinking. *New Material--The third edition incorporates extensive treatment of new cases and legislation of the last five years. Topics that have been added or significantly expanded include: the No Child Left Behind Act, students rights--especially in the areas of free speech and search and seizure, vouchers and government assistance to private and religious schools, employment discrimination, racial and sexual harassment of students and school employees, affirmative action and voluntary school integration, equity and adequacy in school finance, issues relating to use of the Internet, and the law relating to special student populations. The table of cases contains about 250 more entries than in the second edition.

Maintaining the systematic structure that makes it easy for users to zero in on any particular matter, the new edition incorporates the changes that have entered into force since the fifth edition and expertly examines their effects. The three major categories of copyright, patent, and trademark are covered in turn—along with a fourth section on chip protection—with detailed but concise examination and analysis of such issues and topics as the following and much more: • subject matter of protection; • conditions of protection; • registration procedures; • scope of exclusive rights; • transfer of interests; • fair use; • rights in unregistered marks; • protection of computer software, code, and databases; • remedies and defenses; and • procedural issues in infringement actions. European trade defence law has expanded sufficiently in the last few years to require a new edition of this definitive work, last revised in 2004. As trade law practitioners and scholars have come to expect from the Brussels law firm Van Bael & Bellis, the fifth edition provides comprehensive, up-to-date analysis and critical commentary on EU trade defence instruments dealing with anti-dumping measures, countervailing measures, and safeguard measures, as well as measures under the Trade Barriers Regulation. It gives detailed attention to all EU cases and other developments at WTO level that have occurred up to December 2010. The emphasis throughout is on practical application of the rules. The authors cover every issue likely to arise in any trade defence matter, including all of the following and more: determining the dumping and injury margins; determining the subsidy margin; determining the causal link between dumping or subsidy and injury; determining if 'Union interest' calls for intervention; differences

between anti-dumping and anti-subsidy legislation; procedural rules applicable to complaints, initiation of proceedings, investigations, protective measures, reviews, and refunds; conditions for accepting an undertaking; measures that may be taken to prevent 'circumvention' of anti-dumping measures; rules for the determination of permissible adjustments; rules governing the standing of various interested parties before the European Courts; rules and procedure applicable to non-market economy countries; special rules on products originating in a developing country; allocation and administration of quantitative quotas; surveillance measures; and whether and to what extent safeguard measures are subject to judicial review. For each of the four major categories of trade defence instruments, chapters deal with the substantive rules of the trade defence instruments concerned, the relief that may be ordered under these instruments, and the procedural provisions. The important changes in the EU decision-making process for trade defence cases to be introduced in March 2011 are taken fully into account. An extensive battery of tables and annexes leads the practitioner to all the essential primary source material in the field. As a detailed and practical commentary on the international trade legislation of the Union as actually applied by the Union Institutions, this is the preeminent work in the field. Lawyers and academics involved with trade contracts or disputes need have no doubt that it is still without peer as a guide to EU trade defence instruments.
