Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: "Why am I here?" and "Will I ever use this?" Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.

International Marketing Compact offers a new perspective in teaching international marketing. The authors address issues in a novel way by bringing in cases from advanced and emerging markets. In this connection they also discuss technological requirements of the 21st century and how these developments necessitate a change in looking at international marketing issues. The individual chapters follow the necessary steps to develop and implement projects successfully in the international market place. The knowledge, which is provided for both students and practitioners, is well balanced in terms of theoretical input and managerial application. This is the result of numerous examples presented in this book not only from Europe, but also from other markets throughout the world. The book is addressed to various student groups: those in a bachelor's program studying business, economics and international trade can well use the book to gain a broad and current perspective on trends in international marketing theory and practice. Those in a master's program for business, economics and international trade can use the book as a guide for building a theoretical background for their term projects and the case studies they analyze. Those at the PhD level in the same or similar disciplines can take a compact look at 21st century international marketing. It is also beneficial for international students, for example, for Erasmus students at European universities, who are building a common international marketing background and perspective that they can take back to their studies at their home universities.

"We have continued to evolve the structure and content of this textbook in step with the rapidly changing world of international business. This includes completely revising several key chapters, including Chapter 6, on International Trade. This is entirely updated and includes new case studies covering both the trade-war between the US and China and the complex Brexit process. These and other real-world developments have made a wide range of stakeholders much more aware of the significance of global trade interdependencies than in the past. Chapter 16 on the European Union is also entirely updated to take account of Brexit and a range of new socio-political and economic events in Europe. Chapter 11 ('MNEs as Responsible Stakeholders') has been removed, making this edition more consolidated, with 20 rather than 21 chapters. In place of Chapter 11 we have inserted new sections, frameworks and case studies on responsible business throughout the book as a fundamental dimension of international business theory and practice across all the other chapters. New case studies, such as 'Businesses and NGOs working together on climate change' in Chapter 4, provide additional material on this topic. Chapter 14, on 'Political risk and negotiation strategy' also features new case studies on the 'US-Venezuela oil dispute' and 'Huawei accused of spying'."

This book provides a new approach to management and strategy in the business environment by addressing the issues that arise when a firm is embedded in the nonmarket environment, or the legal, political, and social context in which the firm is embedded. Its approach is a managerial one, rather than a public policy or social responsibility perspective, and focuses on issues of importance to managers of firms, emphasizing analysis and reasoning as the foundations for forming effective and responsible business strategies. The book gives conceptual frameworks for analyzing the business environment. They are: 1) understanding issues and their development, 2) strategy formulation, 3) analyzing the news media, 4) political analysis, 5) market failures, 6) the economics and politics of government intervention, 7) the economics and politics of international trade, 8) country analysis, and 9) ethics analysis and decision-making. These frameworks are based in the disciplines of economics, political science, law, and ethics and are applied to the environment of business in the United States and other countries, including China, Japan, and the European Union. The book contains 73 case studies, including Microsoft, eBay, ScheringPlough, Citigroup, DoubleClick, and British Petroleum. For managers in firms in the United States and other countries, and government employees whose jobs deal with the policy-making and business.
