Multinational Financial Management Alan C. Shapiro, Paul Hanouna, 2019-12-12 The eleventh edition of Multinational Financial Management is a comprehensive survey of the essential areas of the international financial market environment, including foreign exchange and derivative markets, risk management, and international capital markets and portfolio

investment. Designed for upper-level undergraduate and masters-level courses in international finance and management, this textbook offers readers a conceptual framework for analyzing key financial decisions of multinational firms. The authors both explain and simplify multinational financial management by illustrating how its basic principles share the same foundation as domestic corporate finance. Assuming no prior knowledge of international economics or finance, this substantially revised new edition builds upon the fundamental principles of domestic financial management to examine the unique dimensions of international finance. Readers are presented with a solid theoretical knowledgebase for examining decision problems, as well as practical analytical techniques that clarify the often-ambiguous guidelines used by international financial executives. All the traditional areas of corporate finance are explored from the perspective of a multinational corporation, focusing on elements rarely encountered in domestic finance such as multiple currencies, segmented capital markets, and political risks of nationalization or expropriation.

Regional Security Rodrigo Tavares, 2009-12-16 Regional organizations are an inescapable feature of global politics. Virtually all countries in the world are members of at least one regional or other intergovernmental organization. The involvement of international organizations in the realm of regional peace and security, and their cooperation in this domain with the United Nations, has reached an unprecedented level. Regional organizations have traditionally been formed around economic, political, or environmental objectives, however, over the last decades these organizations have gradually penetrated into the security sphere and developed their capacities in conflict prevention, peacekeeping, or post-war reconstruction. In Europe, Africa, Asia, or the Americas, regional and other intergovernmental organizations have been concurrently empowered by the UN and their own member states to maintain peace and security. Despite suffering from important discrepancies in both their mandates and capacities, regional organizations have become indisputable actors that play a role from the outbreak of a crisis to the reconstruction efforts in the aftermath of a conflict Presenting the most up-to-date critical and comparative analysis of the major regional security institutions, assessing a wide range of regional organizations and providing an accessible and comprehensive guide to 11 key organizations, this book is the first systematic study of the capacities of the most recognized intergovernmental organizations with a security mandate. *Regional Security* is essential reading for all students of international organizations, peace and security studies and global governance.
