This volume contributes to a fresh perspective on the economic and finance research on international financial markets and also the commodity markets by examining various factors that affect information transmission and pricing relation in the spot and derivatives markets in the United States and internationally.

Globalization has been under extreme pressure in the wake of the financial crisis. Multinational firms are weighing the costs and benefits of international scale and scope, and are increasingly under pressure to hire local, to source local, and to pay taxes domestically. At the same time global competitive pressures have intensified. This book reviews international business practices from the multinational firm perspective, and provides pathways forward concerning competitiveness and sustainability in global markets. What sets this book apart from others is that the benefits and pitfalls of globalization are addressed. Chapter coverage focuses on the functional areas of the business and how they are impacted by international expansion. Practical case studies supplement chapter coverage and highlight both positive and negative developments in the global business arena. Readers should expect to be challenged on what will be the
