Human Resource Management for the Hospitality and Tourism Industries takes an integrated look at HRM policies and practices in the tourism and hospitality industries. Utilising existing human resource management (HRM) theory and practice, it contextualises it to the tourism and hospitality industries by looking at the specific employment practices of these industries, such as how to manage tour reps or working in the airline industry. It initially sets the scene with a broad review of the evidence of HRM practice within the tourism and hospitality industries. Having identified the broader picture, the text then begins to focus much more explicitly on a variety of HR policies and practices such as:

- recruitment and selection: the effects of ICT, skills required specific for the industry and the nature of advertising
- legislation and equal opportunities: illegal discrimination and managing diversity
- staff health and welfare: violence in the workplace, working time directives, smoking and alcohol and drug misuse
- remuneration strategies in the industry: the 'cafeteria award' approach, minimum wage and tipping

Human Resource Management for the Hospitality and Tourism Industries is illustrated throughout with both examples of best practice for prescriptive teaching and discussion, and international case studies to exercise problem solving techniques and contextualise learning. It incorporates a user friendly layout and includes pedagogic features such as: chapter outlines and objectives, HRM in practice – boxed examples, reflective review questions, web links' discussion questions and further reading. Accompanying the text are online supplementary lecturer materials including downloadable figures from the book, PowerPoint slides, further cases and extra exercises and points for discussion.

Conducting business across national borders is nothing new; the Knights Templar were banking internationally as long ago as 1135. But modern globalization processes raise different challenges, and as the world becomes smaller and labour movements more common, an international understanding of human resource management is essential. The second edition of International HRM provides a fully updated and revised analysis of this important area. Its

innovative, multi-disciplinary approach allows a holistic picture to emerge in which key issues are assessed from organizational, individual and societal perspectives. The collection is divided into three parts: the contemporary internationalization context the management of international employees strategic issues facing international HR managers. Supported by new research, and including work from eminent writers in the field, this book discusses issues as diverse as the relative absence of women in international work, the ethical merits of localization, and the context faced by organizations like the United Nations. It is a valuable tool for all students, researchers and practitioners working in international business and human resource management.

This case, based on a fictional U.K.-based organization, gives learners the opportunity to think about key decisions involved in international assignments and to transfer their knowledge of domestic HR issues to an international context. Students will learn about the main elements and issues related to international assignments; when it is appropriate to use expatriate workers; the skills and knowledge needed by expatriate workers; and how organizations can prepare expatriate managers to succeed in an international assignment.

Emerging multinational enterprises (or EMNEs) have made a huge impact on the international business stage by internationalising at a rapid rate. And they have performed remarkably well in both developing and developed countries. Accordingly, there is a growing strand of literature on how EMNEs manage their international human resource (IHRM) practices in different international contexts. However, the majority of the literature on IHRM practices of EMNEs is limited to explaining what international management practices EMNEs implement in their foreign subsidiaries and how they implement them. Too often, EMNEs struggle to transfer their

weak management practices across national borders as they have limited experience, resources and capabilities when compared to MNEs from developed countries. Developing a better understanding on the manner in which EMNEs adopt their international human resource management and development practices abroad is, therefore, paramount to fully understand their globalisation-related behaviours. This dedicated book will aim to provide a holistic picture and contemporary insights on IHRM in emerging multinational enterprises. It will be of interest to researchers, academics and students in the fields of business and management, especially those with a particular interest in human resource management, firm internationalisation and emerging markets.

In today's era of International business, International Human Resource Management (IHRM) is emerging as a crucial factor since organizations are run by people. What is interesting in this phenomenon is, not only that there are differences in people across the countries, but even within a country or regions within it. This complex socio-cultural and psychological fabric coupled with historical, geographic, economic and political factors, creates certain boundary conditions and makes IHRM a very complex process. The intention of this book is to portray the various factors that are connected with managing Human Resources in International Business. Since the two are inseparable, any organization aspiring to participate as a player in international business must develop the knowledge, skills and acumen to perceive the subtle nuances that govern the rules of game. IHRM as a discipline cuts across all other business operations in the international context and plays a vital role in the success or failure of a business venture since, businesses are essentially driven by people. In the light of the above, this book has sought to address some of the issues that relate to IHRM, which need to be

logically understood by any keen observer of international business, today. The approach of this book has been to detail IHRM both, in terms of a function, as well as a process and the factors or key elements that are attached to them. To make this book reader-friendly, chapter highlights have been added at the beginning of each chapter to facilitate the reader to identify the broader areas that may be learnt from a particular chapter. Each chapter also contains detailed references and key terms. Conceptual questions, multiple choices, web-based exercises are some of the additional features of the book. Relevant diagrammatic representation, relevant case study and list of web references have been also added in this book.

Managing people in a multinational context is the essence of international human resource management. This requires a broader perspective of what operating internationally involves, and a clear recognition of the range of issues pertaining to all categories of staff operating in different functional, task and managerial capacities. Books that are available on the subject are heavily loaded with cultural aspects rather than HRM processes. From teaching experience, it is noticed that students who are familiar with domestic HRM books find it difficult to comprehend the subject of international HRM. Therefore the topics are arranged in the traditional HRM style with international implications at each stage. A separate chapter is allocated for Expatriation

& Repatriation. Similarly Management of People in international context in sixteen countries is discussed in a separate chapter. The text aims to cover in terms of industries, to illustrate the activities and approaches of international organisations. Also, the coverage of different cultures is not intended to include all the different and diverse cultures of the world, simply to enable sufficient understanding of the cultural contexts from which many of the approaches are derived, and to provide background on the appropriateness of different aspects of managing people in international organisations. A detailed treatment to empirical researches on cross cultural issues and cross cultural, comparative management issues arising out of cross border mergers and acquisitions as well as human resource issues emerging out of global acquisitions of Arcelor and Corus by Indian companies and companies of Indian origin are also treated in the text. Organisation, grade: 1, University of Vienna, 10 entries in the bibliography, language: English, abstract: A rapidly changing economic environment, characterized by such phenomena as the globalization and deregulation of markets, changing customer and investor demands, and an increasing product-market competition, has become the norm for most organizations. To compete in this new environment, a continual performance improvement through reducing costs, innovating products and processes, and improving quality, productivity and speed to market is essential.¹ Concerning these required quality improvements, in recent years, a new approach to management, particularly coming from the Anglophone countries like the United States, in which organizations compete on quality rather than cost, and rely on human resource development to do so, could be detected. This new approach focuses on the involvement of employees in the decision making process and on using a certain combination or bundle of progressive management practices, which raise welfare to workers (for example training, appraisal, profit-sharing and high compensation systems). This approach has been conceptualised variously as “best practice” human resource management (HRM), “high performance work systems”, “high commitment” HRM or “high involvement” management. Whatever the terminology, the idea is that a particular set of HR practices has the potential to bring out improved organizational performance. In the following, I will explain more in detail the list of high commitment HR practices outlined by Pfeffer (1998) and at the same time apply those practices on a

real world situation. In order to provide a more realistic illustration of this new approach, I had the possibility to obtain information from and co-operate with the HR department of Oracle Austria, the Austrian subsidiary of the American database software corporation, which pursues the strategy of adding value through appreciation (“Wertschöpfung durch Wertschätzung”) and thus, represents a typical example of what the theory calls a “high performance work system”. Additionally, I will theoretically explain the connection between this new approach and the desired outcome, the improvement of the organization’s overall performance.

Across the world, companies are forming some of the most complex and exciting collaborations in the business world: cross-border alliances (CBAs). Yet while this offers multinational companies a way into the global marketplace, there is no guarantee of success. This book looks at the business and human resource issues arising in these complex collaborations, putting forward the case that the handling of these issues can determine the CBA's success. The book takes readers through the two main kinds of CBA - International Joint Ventures (IJV), and International Mergers and Acquisitions (IMA) - explaining how each type works and which human resource issues will arise. As well as analyzing these issues and explaining the relevant management, economics and sociological theories, this impressive text uses short end-of-chapter case studies and in depth end-of-text case studies to provide numerous practical examples. The first major textbook that seriously studies human resource
