International law was born from the impulse to 'civilize' late nineteenth-century attitudes towards race and society, argues Martti Koskenniemi in this extensive study of the rise and fall of modern international law. In a work of wide-ranging intellectual scope, now available for the first time in paperback, Koskenniemi traces the emergence of a liberal sensibility relating to international matters in the late nineteenth century, and its subsequent decline after the Second World War. He combines legal analysis, historical and political critique and semi-biographical studies of key figures (including Hans Kelsen, Hersch Lauterpacht, Carl Schmitt and Hans Morgenthau); he also considers the role of crucial institutions (the Institut de droit international, the League of Nations). His discussion of legal and political realism at American law schools ends in a critique of post-1960 'instrumentalism'. This book provides a unique reflection on the possibility of critical international law today.

The Politics of International Law offers an introduction to the role of law in contemporary international affairs. Through a case study-driven analysis of topics such as human rights, the use of force, international environmental law, international trade law, international criminal justice and the right to self-determination, the book explains the interaction between law and politics in the world today, demonstrating that one cannot be understood without the other. The book is divided into two parts. Part I introduces contemporary international law with a focus on constitutive legal principles such as sovereignty, territorial integrity and the legal equality of states. Through these introductory chapters, students are encouraged to take a holistic view of the processes and actors that drive international affairs, and explore the fascinating paradox that while international law is largely created through political processes, it also constitutes the environment in which international politics is practiced. Part II builds on the foundations laid in Part I to analyze contemporary controversies in international law and politics. Chapters focus on a number of substantive issue areas, including international environmental law, international economic law, human rights law, self-determination and secession, the law governing the use of force, and international criminal justice. This book is written to impart on readers a deepened understanding of both the possibilities and limits of international law as a tool for structuring relations in the world.

In a world full of armed conflict and human misery, global justice remains one of the most compelling missions of our time. Understanding the promises and limitations of global justice demands a careful appreciation of international law, the web of binding norms and institutions that help govern the behaviour of states and other global actors. This book provides a new interdisciplinary approach to global justice, one that integrates the work and insights of international law and contemporary ethics. It asks whether the core norms of international law are just, appraising them according to a standard of global justice derived from the fundamental values of peace and the protection of human rights. Through a combination of a careful explanation of the legal norms and philosophical argument, Ratner concludes that many international law norms meet such a standard of justice, even as distinct areas of injustice remain within the law and the verdict is still out on others. Among the subjects covered in the book are the rules on the use of force, self-determination, sovereign equality, the decision making procedures of key international organizations, the territorial scope of human rights obligations (including humanitarian intervention), and key areas of international economic law. Ultimately, the book shows how an understanding of international law's moral foundations will enrich the global justice debate, while exposing the ethical consequences of different rules.
