Founders like Steve Wozniak (Apple), Caterina Fake (Flickr), Mitch Kapor (Lotus), Max Levchin (PayPal), and Sabeer Bhatia (Hotmail) tell you in their own words about their surprising and often very funny discoveries as they learned how to build a company. Where did they get the ideas that made them rich? How did they convince investors to back them? What went wrong, and how did they recover? Nearly all technical people have thought of one day starting or working for a startup. For them, this book is the closest you can come to being a fly on the wall at a successful startup, to learn how it's done. The hope and hype about African digital entrepreneurship, contrasted with the reality on the ground in local ecosystems. In recent years, Africa has seen a digital entrepreneurship boom, with hundreds of millions of dollars poured into tech cities, entrepreneurship trainings, coworking spaces, innovation prizes, and investment funds. Politicians and technologists have offered Silicon Valley-influenced narratives of boundless opportunity and exponential growth, in which internet-enabled entrepreneurship allows Africa to "leapfrog" developmental stages to take a leading role in the digital revolution. This book contrasts these aspirations with empirical research about what is actually happening on the ground. The authors find that although the digital revolution has empowered local entrepreneurs, it does not untether local economies from the continent's

The #1 New York Times and Wall Street Journal bestseller from Steve Case—the co-founder of AOL—presents “a compelling roadmap for the future...that can help us make sense of the technological changes reshaping our economy and the world. A fascinating read” (Sheryl Sandberg, Facebook COO and founder of LeanIn.org). Steve Case—a pioneer who made the Internet part of everyday life—was on the leading edge of a revolution in 1985 when he co-founded AOL, the first Internet company to go public and the most successful business of the 1990s. Back then Case was an entrepreneur in an industry that hadn't really been invented yet, but he had a sense how dramatically the Internet would transform business and society. In The Third Wave, he uses his insights garnered from nearly four decades of working as an innovator, investor, and businessman to argue the importance of entrepreneurship and to chart a path for future innovators. We are entering, as Case explains, the “Third Wave” of the Internet. The first wave saw AOL and other companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat

and Instagram leveraged the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major "real world" sectors such as health, education, transportation, energy, and food—and in the process change the way we live our daily lives. Part memoir, part manifesto, and part playbook for the future, *The Third Wave* explains the ways in which newly emerging technology companies will have to rethink their relationships with customers, with competitors, and with governments; and offers advice for how entrepreneurs can make winning business decisions and strategies—and how all of us can make sense of this ever-changing digital age.
