The importance of higher education has never been clearer. Educational attainment—the number of years a person spends in school—strongly predicts adult earnings, as well as health and civic engagement. Yet relative to other developed nations, educational attainment in the United States is lagging, with young Americans who heretofore led the world in completing postsecondary degrees now falling behind their global peers. As part of a broader national college completion agenda aimed at increasing college graduation rates, higher education researchers and policy makers are exploring the role of intrapersonal and interpersonal competencies in supporting student success. Supporting Students' College Success: The Role of Assessment of Intrapersonal and Interpersonal Competencies identifies 8 intrapersonal competencies (competencies involving self-management and positive self-evaluation) that can be developed through interventions and appear to be related to persistence and success in undergraduate education. The report calls for further research on the importance of these competencies for college success, reviews current assessments of them and establishes priorities for the use of current assessments, and outlines promising new approaches for improved assessments.

Talent is one of the most important strategic resources in the modern economy: it is the resource that creates economic growth through exceptional innovation, service, and performance. But talent is scarce, and finding the right talent, in the right place, and at the right time, is challenging. Talent is not distributed evenly within and across borders. Hence, generating a competitive advantage in the modern economy is dependent on identifying, attracting, hiring, and retaining the talent needed to implement a firm's strategy. Talent Without Borders shows how to generate a competitive advantage through the effective use of global recruitment and staffing. Based on a century of science, Talent Without Borders offers a practical approach to help managers think about acquiring talent globally. With explicit consideration of real-world issues that influence the implementation

of global staffing solutions, the book shows managers how to use analytics and data to enable evidence-based decisions. Emphasizing national culture, strategy, and competitive advantage, it considers the entire talent life cycle, from attraction through retention. Together, the three authors represent a unique blend of expertise in HR executive leadership and consulting with deep technical expertise in the science of recruitment, selection, and assessment. Their collective experience yields numerous practical insights woven throughout the book. Ultimately, they skillfully link staffing to organizational strategy, financial performance, and competitive advantage.

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Providing a thorough review and synthesis of work on communication skills and

skill enhancement, this Handbook serves as a comprehensive and contemporary survey of theory and research on social interaction skills. Editors John O. Greene and Brant R. Burleson have brought together preeminent researchers and writers to contribute to this volume, establishing a foundation on which future study and research will build. The handbook chapters are organized into five major units: general theoretical and methodological issues (models of skill acquisition, methods of skill assessment); fundamental interaction skills (both transfunctional and transcontextual); function-focused skills (informing, persuading, supporting); skills used in management of diverse personal relationships (friendships, romances, marriages); and skills used in varied venues of public and professional life (managing leading, teaching). Distinctive features of this handbook include: * broad, comprehensive treatment of work on social interaction skills and skill acquisition; * up-to-date reviews of research in each area; and * emphasis on empirically supported strategies for developing and enhancing specific skills. Researchers in communication studies, psychology, family studies, business management, and related areas will find this volume a comprehensive, authoritative source on communications skills and their enhancement, and it will be essential reading for scholars and students across the spectrum of disciplines studying social interaction.

No topic is more central to innovation and current practice in testing and assessment today than computers and the Internet. This timely publication highlights four main themes that define current issues, technical advances and applications of computer-based testing: Advances in computer-based testing -- new test designs, item selection algorithms, exposure control issues and methods, and new tests that capitalize on the power of computer technology. Operational issues -- systems design, test security, and legal and ethical matters. New and improved uses -- for tests in employment and credentialing. The future of computer-based testing -- identifying potential issues, developments, major advances and problems to overcome. Written by internationally recognized contributors, each chapter focuses on issues of control, quality, security and technology. These issues provide the basic structure for the International Test Commission's new Guidelines on Computer-Based Testing and Testing on the Internet. The contributions to this book have played a key role in the development of these guidelines. Computer-Based Testing and the Internet is a comprehensive guide for all professionals, academics and practitioners working in the fields of education, credentialing, personnel testing and organizational assessment. It will also be of value to students developing expertise in these areas.

"Enhancing Competency of Teachers" is a fundamental teaching-and-learning guide. Its main goal is to learn and develop an enhanced value system (EVS) and practice it in everyday life. Filipinos are known worldwide for being friendly and hospitable. However, without limitations, these traits become the "roots of corruption" in all sectors of Philippine life. This book outlines the sequence of logical modules in teaching-and-learning enhancement programs (TLEP) in the school settings. It is designed for learners in all educational levels, to enhance competencies and effectiveness in human resource development and training. It contains concepts, principles, and strategies for effective teaching and learning. The "Ethico-Moral Theory in Learning" provides five sets of significant rules in learning ethicomoral values to become genuine professionals. Verily, the skill, method, and social competencies of a person are not enough. They must be supported by a quality EVS that will guide the person to think, feel, and act-with strict reverence to the will of God. Many books contained different insights, theories, philosophies, principles, and concepts in teaching and learning that sometimes confused readers in understanding how to learn or teach productively. In contrast, this text is presented in a very simple and logical manner. It advocates for the need of educational change, using EVS as the "key." It presents simple approach in designing, implementing, and managing TLEP in school settings. It covers elementary modules-i.e., Learning Process;

Teaching Methods/Techniques/Strategies; Preparing Daily Lesson; Sequence of Instruction; Selection of Teaching Aids; Speech Techniques; Questioning Techniques; Learning Distractions; Evaluation Techniques, Review/Summary/Reinforcement. Verily, a high school graduate can become a very productive professional through reading this book seriously. Today, the main cause of poverty is "corruption." Poverty creates hunger. Hunger results to crimes. Criminal acts are indicators of degraded ethicomoral values. To have "More Fun in the Philippines," EVS is a must amongst Filipino people!

In the world of high-octane curriculum, assessment, and accountability, educators too often neglect educational realities. This book examines the current status of public education in America, the associated political landscape, and the latest philosophies aimed at improving test scores, and offers straightforward advice for parents and educators.

This book provides teachers with the practical information they need to better develop socially and emotionally engaged, career-equipped, lifelong learners. Your Graduate Training in Psychology takes current and upcoming graduate students beyond the typical concerns of enrolling into graduate school and guides them on how to complete graduate school successfully. Unlike other books that focus on how to get into graduate school, this book directly addresses the major issues that students confront during their graduate training in psychology. A carefully selected cadre of expert authors in their respective areas illuminate the broad range of processes, practices, and procedural issues that face graduate students in both masters and doctoral programs. Ordered chronologically, from the first year of graduate school (Settling In) to what students need to know as they finish (Winding Down and Gearing Up), students will learn the key skills needed to succeed in all aspects of their academic and professional careers while in school and after beginning a professional career. Bridging the gap between the entertainment-focused “pop psychology” on television and the dry academic research that is published in journals, The Handy Psychology Answer Book helps answer why humans do what we do through accurate scientific data presented in a lively, accessible, and engaging way. It covers the fundamentals and explains the psychology behind how people deal with money, sex, morality, family, children, aging, addiction, work, and other everyday issues. Fully revised to reflect the latest scientific research—such as the current DSM-5 (Diagnostic and Statistical Manual of Mental Disorders, published by the American Psychiatric Association); the latest neurobiological theories; and the changing face of marriage—this timely reference has expanded to include information sections on the biology and evolution of emotions; technology and adolescence; bisexuality; optimism; autism; as well as a full section on the law, eyewitness testimony and police shootings. Featuring more than 1,500 answers to questions concerning how the human mind and the science of psychology really work such as: How have other cultures addressed psychological issues? Why was Freud so focused on sex? How can I maintain a healthy brain? Is it normal to argue during marriage? Does religion make people happier? How do we reduce social prejudice?
