new novel about twin sisters, inseparable as children, who ultimately choose to live in two very different worlds, one black and one white. The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Many years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen to the next generation, when their own daughters' storylines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing. Looking well beyond issues of race, *The Vanishing Half* considers the lasting influence of the past as it shapes a person's decisions, desires, and expectations, and explores some of the multiple reasons and realms in which people sometimes feel pulled to live as something other than their origins. As with her New York Times-bestselling debut *The Mothers*, Brit

Heritage, Tourism, and Race views heritage and leisure tourism in the Americas through the lens of race, and is especially concerned with redressing gaps in recognizing and critically accounting for African Americans as an underrepresented community in leisure. Fostering critical public discussions about heritage, travel, tourism, leisure, and race, Jackson addresses the underrepresentation of African American leisure experiences and links Black experiences in this area to discussions of race, place, spatial imaginaries, and issues of segregation and social control explored in the fields of geography, architecture, and the law. Most importantly, the book emphasizes the importance of shifting public dialogue from a singular focus on those groups who are disadvantaged within a system of racial hierarchy, to those actors and institutions exerting power over racialized others through practices of exclusion. Heritage, Tourism, and Race will be invaluable reading for academics and students engaged in the study of museums, as well as architecture, anthropology, public history, and a range of other disciplines. It will also be of interest to museum and heritage professionals and those studying the construction and control of space and how this affects and reveals the narratives of

From nineteenth-century public baths to today's private backyard havens, swimming pools have long been a provocative symbol of American life. In this social and cultural history of swimming pools in the United States, Jeff Wiltse relates how, over the years, pools have served as asylums for the urban poor, leisure resorts for the masses, and private clubs for middle-class suburbanites. As sites of race riots, shrinking swimsuits, and conspicuous leisure, swimming pools reflect many of the tensions and transformations that have given rise to modern America.

“Fascinating. Doidge’s book is a remarkable and hopeful portrait of the endless adaptability of the human brain.”—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge’s inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they’ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition – these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book's European and American contributors – in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.

Adam Cohen tells the story in *Imbeciles* of one of the darkest moments in the American legal tradition: the Supreme Court's decision to champion eugenic sterilization for the greater good of the country. In 1927, when the nation was caught up in eugenic fervor, the justices allowed Virginia to sterilize Carrie Buck, a perfectly normal young woman, for being an "imbecile." It is a story with many villains, from the superintendent of the Dickensian Virginia Colony for Epileptics and Feebleminded who chose Carrie for sterilization to the former Missouri agriculture professor and Nazi sympathizer who was the nation's leading advocate for eugenic sterilization. But the most troubling actors of all were the eight Supreme Court justices who were in the majority - including William Howard Taft, the former president; Louis Brandeis, the legendary progressive; and Oliver Wendell Holmes, Jr., America's most esteemed justice, who wrote the decision urging the nation to embark on a program of mass eugenic sterilization. Exposing this tremendous injustice--which led to the sterilization of 70,000 Americans--*Imbeciles* overturns cherished myths and reappraises heroic figures in its relentless pursuit of the truth. With the precision of a legal brief and the passion of a front-page exposé, Cohen's *Imbeciles* is an unquestionable triumph of American legal and social history, an ardent accusation against these acclaimed men and our own optimistic faith in progress.

Rather than endure the conflict of racial realities, many people choose instead to avoid the topic altogether, or remain silent when it is raised. *Race Talk and the Conspiracy of Silence: Understanding and Facilitating Difficult Dialogues on Race* puts an end to that dynamic by sharing strategies for smoothing conversations about race in a productive manner. A guide for facilitating and participating in difficult dialogues about race, author Derald Wing Sue – an internationally recognized expert on multiculturalism, diversity, and microaggressions – explores the characteristics, dynamics, and meaning behind discussions about race as well as the hidden "ground rules" that inhibit honest and productive dialogue. Through emotional and visceral examples, this book explains why conversations revolving around racial issues are so difficult, and provides guidelines, techniques, and advice for navigating and leading honest and forthright discussions. This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the

In words and photographs, *Power to the People* is the story of the controversial Black Panther Party, founded 50 years ago in 1966 by Bobby Seale and Huey P. Newton. The words are Seale's, with contributions by other former party members; the photographs, including many icons of the 1960s, are by Stephen Shames, who also interviewed many other members of the party—including Kathleen Cleaver, Elbert “Big Man” Howard, Ericka Huggins, Emory Douglas, and William “Billy X” Jennings—and supplements his own photography with Panther ephemera and graphic art. Shames, a student at the University of California, Berkeley, first encountered and photographed Seale in April 1967 at an anti-Vietnam War rally. Seale became a mentor to Shames, and Shames, in turn, the most trusted photographer to the party, remained by Seale's side through his campaign for mayor of Oakland in 1973. *Power to the People* is a testament to their warm association: At its heart are Shames's memorable images, accompanied by Seale's colorful in-depth commentary culled from many hours of conversation. Admired, reviled, emulated, misunderstood, the Black Panther Party was one of the most creative and influential responses to racism and inequality in American history. They advocated armed self-defense to

Herbert Asbury presents here a vivid and startling account of New York gangdom from its beginning in Revolutionary times to comparatively recent days. Here are the stories of the great gangs which terrorized the city and at times menaced its very existence—from the Bowery Boys and the Dead Rabbits to the Gophers and the Eastmans. Kid Dropper, Dopey Benny, Gyp the Blood and Owney Madden are a few of the gangster luminaries described, not to mention such female evildoers as Gallus Mag and Sadie the Goat. Nor have the underworld's lesser lights been overlooked; for these pages are crowded with a host of gang warriors, pickpockets, tong leaders, murderers, politicians, gamblers, prostitutes, dive-keepers and a few would-be reformers. Mr. Asbury has created such a rich, factual background for this chronicle of crime and gangsterism that the book gains considerable stature as a revealing picture of New York City's history through a century of frenzied growth and expansion. Whether you read it as such or merely for amusement, it is a swift, exciting experience.

Association Finalist, 2019 C. Wright Mills Award, given by the Society for the Study of Social Problems Riveting stories of how affluent, white children learn about race American kids are living in a world of ongoing public debates about race, daily displays of racial injustice, and for some, an increased awareness surrounding diversity and inclusion. In this heated context, sociologist Margaret A. Hagerman zeroes in on affluent, white kids to observe how they make sense of privilege, unequal educational opportunities, and police violence. In fascinating detail, Hagerman considers the role that they and their families play in the reproduction of racism and racial inequality in America. *White Kids*, based on two years of research involving in-depth interviews with white kids and their families, is a clear-eyed and sometimes shocking account of how white kids learn about race. In doing so, this book explores questions such as, “How do white kids learn about race when they grow up in families that do not talk openly about race or acknowledge its impact?” and “What about children growing up in families with parents who consider themselves to be ‘anti-racist’?” Featuring the actual voices of young, affluent white kids and what they think about race, racism, inequality, and privilege, *White Kids* illuminates how white racial socialization is much more dynamic, complex, and varied than previously recognized. It is a process that stretches beyond white parents’ explicit conversations with their white children and includes not only the choices parents make about neighborhoods, schools, peer groups, extracurricular activities, and media, but also the choices made by the kids

themselves. By interviewing kids who are growing up in different racial contexts—from racially segregated to meaningfully integrated and from politically progressive to conservative—this important book documents key differences in the outcomes of white racial socialization across families. And by observing families in their everyday lives, this book explores the extent to which white families, even those with anti-racist intentions, reproduce and reinforce the forms of inequality they say they reject.

In the United States, politics has become tribal and personalized. The influence of partisan divisions has extended beyond the political realm into everyday life, affecting relationships and workplaces as well as the ballot box. To help explain this trend, we examine the stereotypes Americans have of ordinary Democrats and Republicans. Using data from surveys, experiments, and Americans' own words, we explore the content of partisan stereotypes and find that they come in three main flavors-parties as their own tribes, coalitions of other tribes, or vehicles for political issues. These different stereotypes influence partisan conflict: people who hold trait-based stereotypes tend to display the highest levels of polarization, while holding issue-based stereotypes decreases polarization. This finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity-a turn to what we call responsible partisanship.

The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

White Kids Growing Up with Privilege in a Racially Divided America NYU Press

Why is it that successful black men--black men who are "at the top of their game" in the arts, entertainment, politics and athletics--are four times as apt to be married to or dating a woman who is not an African American than they were only thirty years ago? And why are twice as many black men involved in interracial relationships as black women? In addition to their celebrity status, which includes widespread popularity and wealth, black men from Charles Barkley to James Earl Jones to Russell Simmons to Bryant Gumbel share something else in common; something that also characterizes the experiences of more than 250,000 less well-known black men in the United States. They happen to be involved in interracial intimate relationships. Less than fifty years ago such relationships were next to impossible, leading to severe social sanctions. The fact that this is no longer the case is concrete evidence of changes in the quality and character of contemporary race relations. Drawing on her own observations, and her examination of the responses of a small, diverse group of black men who date (in some cases exclusively), have sexual relations with, and marry women who are not of African descent, the book provides insight into

the continuing ways that race and ethnic status affect the choices people make in their lives. Until this book, though, these types of relationships have received scant serious attention. Craig-Henderson forthrightly addresses the taboo, interspersing analysis with verbatim accounts from black men involved in such relationships. Grounded in serious research, interviews, and analysis of census data, *Black Men in Interracial Relationships* examines why such relationships appear to be so popular among black male elites. In the process, the author unravels the mystery behind the apparent absence of black women in black men's lives. It will be of interest to specialists in race, gender, family, and sexual issues, and appropriate for courses in these areas. It is also highly readable and thought-provoking for the general public, who will find its observations and findings fascinating.
