An Introduction to Human Services Cengage Learning

In recent years, the safety management field has placed leadership and commitment at the center of effective workplace health and safety programs. At the same time, personal liability for workplace health and safety has increased, resulting in poor outcomes for individual managers. Discussing the minimum expectations that courts and tribunals have of managers, Management Obligations for Health and Safety examines the relationship between those expectations and effective safety performance. The book looks at safety management from the perspective of management obligations. What expectations are placed on managers at all levels of an organization to ensure that the workplace and systems of work are safe, and how are these expectations considered and analyzed by courts and public inquiries? As importantly, the book explores how management actions in relation to these obligations and expectations influence, positively or negatively, the safety performance of an organization. With examples drawn from legal and quasi-legal processes, one of the more enlightening and thought-provoking features of this book is the extensive use of cross examination taken from various proceedings. No one person reacts the same to finding him- or herself responsible for managing the aftermath of a death at work, or having to deal with the immediate pressure of being subject to interviews and investigation by safety regulators (much less the drawn-out experience of the legal process), but one of the most constant reactions is "Why didn't anybody tell me about this?" Stressing the importance of safety culture, this book details the true nature of the expectations that are placed on managers by virtue of their obligation to provide a safe workplace.

A profound portrait of family dynamics in the rural South and “an essential novel” (*The New Yorker*) “As close to flawless as any reader could ask for . . . The living language [Allison] has created is as exact and innovative as the language of *To Kill a Mockingbird* and *The Catcher in the Rye*.” —*The New York Times Book Review* The publication of Dorothy Allison’s *Bastard Out of Carolina* was a landmark event that won the author a National Book Award nomination and launched her into the literary spotlight. Critics have likened Allison to Harper Lee, naming her the first writer of her generation to dramatize the lives and language of poor whites in the South. Since its appearance, the novel has inspired an award-winning film and has been banned from libraries and classrooms, championed by fans, and defended by critics.

Greenville County, South Carolina, is a wild, lush place that is home to the Boatwright family—a tight-knit clan of rough-hewn, hard-drinking men who shoot up each other’s trucks, and indomitable women who get married young and age too quickly. At the heart of this story is Ruth Anne Boatwright, known simply as Bone, a bastard child who observes the world around her with a mercilessly keen perspective. When her stepfather Daddy Glen, “cold as death, mean as a snake,” becomes increasingly more vicious toward her, Bone finds herself caught in a family triangle that tests the loyalty of her mother, Anney—and leads to a final, harrowing encounter from which there can be no turning back. Raised by her Irish immigrant parents in a 1940s Queens apartment where alcohol and company combine in mercurial ways, Eileen marries an unambitious scientist with whom she endures an increasingly psychologically dark family life. A first novel.

This book covers theory and practice of competency and incompetency training. 'Incompetency training' includes formal and informal instruction that consciously (purposively) or unconsciously imparts knowledge, attitudes, beliefs, and behavior (including procedures) that are useless, inaccurate, misleading, and/or will lower performance outcomes of the trainee versus no training or training using alternative training methods. This book offers an early workbench model of incompetency training theory which proposes that executives and associates in firms, academia, and government organizations consciously as well as unknowingly offer incompetency training in many contexts. The evidence so far has shown that increasing trainees' vigilance and ability to recognize exposure to incompetency-training may help trainees to decrease the effectiveness (impact) of exposures to incompetency training—advancing incompetency training theory and knowledge of incompetency training practice may be necessary conditions for remedying negative outcomes that follow from trainees receiving such training. The book uses a series of laboratory experiments to elicit on tools advocated in the literature as aids in increasing incompetency and/or competency, and provides a comprehensive review of the literature on (in)competency training.

Using realistic cases about the profession of human services, this insightful work-text equips you with a true practitioner perspective. Each chapter begins with a focus issue, followed by case and summary sections, case questions, self-assessments, and case comments.

In North-West Australia, between 2009 and 2013, a major Indigenous-environmentalist alliance waged a successful campaign to stop a huge industrial development, a \$45 billion liquefied gas plant proposed by Woodside and its partners. The Western Australian government and key Indigenous institutions also pushed hard for this, making the custodians of the Country, the Goolarabooloo, an embattled minority. This experimental ethnography documents the Goolarabooloo's knowledge of Country, their long history of struggle for survival, and the alliances that formed to support them. Written in a fictocritical style, it introduces a new 'multirealist' kind of analysis that focuses on institutions (Indigenous or European), their spheres of influence, and how they organised to stay alive as alliances shifted and changed.

This hands-on work-text equips students with a practitioner perspective through realistic cases about the profession of human services. Students study and apply concepts using cases, quizzes, and questions that encourage them to reflect upon their own understandings of the concepts. Each chapter begins with a focus issue, followed by case and summary sections, case questions, self-assessments, and case comments.

For law students and lawyers to successfully understand and practice law in the U.S., recognition of the wider context and culture which informs the law is essential. Simply learning the legal rules and procedures in isolation is not enough without an appreciation of the culture that produced them. This book provides the reader with an understandable introduction to the ways in which U.S. law reflects its culture and each chapter begins with questions to guide the reader, and concludes with questions for review, challenge and further understanding. Kirk W. Junker explores cultural differences, employing history, social theory, philosophy, and language as "reference frames," which are then applied to the rules and procedures of the U.S. legal system in the book's final chapter.
