This updated edition of *Teaching Students with Severe Disabilities*, is written in a way that makes the most complex findings of research understandable and usable in the real educational world. Drawing on their own experiences, the authors bring a level of currency and reality to the book that is unparalleled. This book offers comprehensive coverage of all of the issues that are pertinent to teaching students with severe disabilities. The authors clearly and completely address both methodology and curriculum, presenting topics in the order in which a teacher would approach them: prior considerations, planning and assessment, general instructional procedures, and, finally, procedures targeted to learners with specific disabling conditions. In addition, they pay thoughtful attention to assessment, the role of paraprofessionals, and multicultural concerns.

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

In this revitalized, redesigned, and thoroughly updated Ninth Edition of his best-selling text, Dennis Coon presents psychology in a way readers will find fascinating, relevant, and above all, accessible. Built into every chapter are a number of features-originated by Coon-that help readers grasp major concepts, develop a broad understanding of psychology's diversity, and see for themselves how psychology relates to the challenges of everyday life. Dennis Coon's delight in the subject matter of psychology and in the readers' curiosity, insights, imagination, and interest is apparent on every page. In a course where professors are frequently confronted by students who haven't actually read their textbooks, Coon's text offers a solution. Coon effectively presents the latest research, the latest controversies, and the key scientific content in an involving way that gets students "hooked" on psychology and eager to read on. Because readers become actively involved with the material, they develop a basic understanding of psychology that they take with them into their future courses and careers. Coon was the first textbook author to make effective use of cognitive principles to teach psychology by building each chapter around the SQ3R study-reading formula: survey, question, read, recite, and review. In the Ninth Edition, Coon has added a fourth "R"-Relate-to create an SQ4R structure, designed to help students better retain the material by encouraging them to relate it directly to their own lives. A new subtitle-*Gateways to Mind and Behavior*-highlights the relevance of psychology to everyday life. There are certain takeaway concepts (or "Gateways") within each area of introductory psychology (and infused within each chapter) that, once mastered, will provide students with the ability to unlock a deeper understanding of themselves and the world around them, throughout the course and beyond.

What is the point of faith, and, in particular, of the Catholic Faith? Written in a welcoming style, this straightforward book provides a clear, compelling answer to that question. As such, it's meant for non-Catholics who are curious about the Catholic Faith, for cradle Catholics who may never have really understood the Faith, and for longtime Catholics who've begun to question the Faith and may even be thinking of leaving it. Here, free of controversies and polemics, you'll encounter the principal beliefs that form the framework of Christianity, and, in particular, a thorough explanation of what the Church teaches about Jesus. To accomplish this faithfully, author Michel Therrien relies on just two sources—the Bible and the Catechism of the Catholic Church—to provide an authoritative overview of what the Faith teaches about God and why believing in Him is important. In twenty short, easy-to-digest chapters, Therrien presents you with Christianity as the Catholic Church understands it. Among scores of other fundamentals of the Faith, this book will teach you: -How we come to know God -How God reveals Himself to us -Who God is, as Scripture reveals Him -Jesus Christ's loving plan for humanity -How to live as a disciple of Jesus Christ -How Catholicism will bring you happiness -And much more!

Through four successful editions, this briefer book uses an approach which promotes learning as an "activity" of the reader - it shows how "active learning" can motivate and excite readers to a deeper understanding of introductory psychology. With balanced and modern treatment of gender and culture, this book encourages readers to develop "critical thinking" skills. It is organized around the SQ4R (survey, question, read, recite, review) method of learning.
