**A Song for Europe** Robert Deam Tobin, 2017-07-05 The world's largest and longest-running song competition, the Eurovision Song Contest is a significant and extremely popular media event throughout the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies, explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is sometimes regarded as a low-brow camp spectacle of little aesthetic or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.

The Lyric Myth of Voice Jessica Gabriel Peritz, 2022-11-15 How did voice become a metaphor for selfhood in the Western imagination? The Lyric Myth of Voice situates the emergence of an ideological connection between voice and subjectivity in

late eighteenth-century Italy, where long-standing political anxieties and new notions of cultural enlightenment collided in the mythical figure of the lyric poet-singer. Ultimately, music and literature together shaped the singing voice into a tool for civilizing modern Italian subjects. Drawing on a range of approaches and frameworks from historical musicology to gender studies, disability studies, anthropology, and literary theory, Jessica Gabriel Peritz shows how this ancient yet modern myth of voice attained interpretable form, flesh, and sound. The publisher gratefully acknowledges the generous support of the AMS 75 PAYS Fund of the American Musicological Society, supported in part by the National Endowment for the Humanities and the Andrew W. Mellon Foundation.
