Never Too Late To Be Great is about the power of thinking long. Drawing on wide research into 'lead time' and the 'ten-year rule', bestselling personal development author Tom Butler-Bowdon shows that, contrary to popular belief, people, companies, products and ideas invariably need time to realise their potential. At the age you are now, many famous and remarkable people were only just getting into their stride - and it's likely that you have more time than you think to achieve your goals. It's never too late to begin the journey of being or doing something remarkable. This book will show you how.

In *It's Too Late Now: The Autobiography of a Writer*, A. A. Milne, with his characteristic self-deprecating humour, recalls a blissfully happy childhood in the company of his brothers and writes with touching affection about his father whom he adored. From Westminster School he won a scholarship to Cambridge University where he edited the university magazine, *Granta*. He then went out into the world, determined to be a writer. He was assistant editor at *Punch Magazine* and enjoyed great success with his novels, plays and stories. And of course he is best remembered for his children's novels and verses featuring Winnie the Pooh and Christopher Robin. This is both an account of how a writer was formed and a charming period piece on literary life – Milne met countless famous authors including H. G. Wells, J.M Barrie of *Peter Pan* fame and Rudyard Kipling.

For fans of *Girl in Pieces*, *All the Bright Places*, and *Girl, Interrupted* comes a haunting and breathtaking YA contemporary debut novel that packs a powerful message: hope can be found in the darkness. "Raw, heartbreaking, and poignant." —New York Times bestselling author Kathleen Glasgow

Seventeen-year-old Ellie had no hope left. Yet the day after she dies by suicide, she finds herself in the midst of an out-of-body experience. She is a spectator, swaying between past and present, retracing the events that unfolded prior to her death. But there are gaps in her memory, fractured pieces Ellie is desperate to re-assemble. There's her mother, a songbird who wanted to break free from her oppressive cage. The boy made of brushstrokes and goofy smiles who brought color into a gray world. Her brooding father, with his sad puppy eyes and clenched fists. And Ellie's determined to find out why a piece of her was left behind. Told in epistolary-like style, Rocky Callen's deeply moving *A Breath Too Late* sensitively examines the beautiful and terrible moments that make up a life and the possibilities that live in even the darkest of places. Perfect for fans of the critically-acclaimed *Speak*, *I'll Give You the Sun*, and *If I Stay*. What we can learn from the aftermath of cybersecurity breaches and how we can do a better job protecting online data. Cybersecurity incidents make the news with startling regularity. Each breach—the theft of 145.5 million Americans' information from Equifax, for example, or the Russian government's theft of National Security Agency documents, or the Sony Pictures data dump—makes headlines, inspires panic, instigates lawsuits, and is then forgotten. The cycle of alarm and amnesia continues with the next attack, and the one after that. In this book, cybersecurity expert Josephine Wolff argues that we shouldn't forget about these incidents, we should investigate their trajectory, from technology flaws to reparations for harm done to their impact on future security measures. We can learn valuable lessons in the aftermath of cybersecurity breaches. Wolff describes a series of significant cybersecurity incidents between 2005 and 2015, mapping the entire life cycle of each breach in order to identify opportunities for defensive intervention. She outlines three types of motives underlying these attacks—financial gain, espionage, and public humiliation of the victims—that have remained consistent through a decade of cyberattacks, offers examples of each, and analyzes the emergence of different attack patterns. The enormous TJX breach in 2006, for instance, set the pattern for a series of payment card fraud incidents that led to identity fraud and extortion; the Chinese army conducted cyberespionage campaigns directed at U.S.-based companies from 2006 to 2014, sparking debate about the distinction between economic and political espionage; and the 2014 breach of the Ashley Madison website was aimed at reputations rather than bank accounts. Read the series that's sold more than 2 million copies--if you dare! Warning: this description has not been authorized by Pseudonymous Bosch. As much as he'd love to sing the praises of his book (he is very vain), he wouldn't want you to hear about his brave 11-year old heroes, Cass and Max-Ernest. Or about how a mysterious box of vials, the Symphony of Smells, sends them on the trail of a magician who has vanished under strange (and stinky) circumstances. And he certainly wouldn't want you to know about the hair-raising adventures that follow and the nefarious villains they face. You see, not only is the name of this book secret, the story inside is, too. For it concerns a secret. A Big Secret.

To tell is to perceive. To tell is to inform. When it's Too Late to Tell features four characters, Mark, Craig, Jade and Berta, all holding issues from the past that suffocate every lasting relationship they have. Mark, an elementary school teacher, and his wife Jade, a pharmacy technician, hold deep secrets from each other; secrets that cause a rift in their marriage. Mark's best friend Craig lives his days as a financial planner, struggling with the idea of God, questioning His existence each day. Indeed, Craig once believed and held strong to his faith, formerly being a youth minister for a well-known church, but some strenuous events turned his life upside down. If it weren't for a helping hand, his life would have ceased to exist. Berta, Craig's assistant, stands to be the most faithful, although the horrors that happened to her in her past would allow anything but. One part to her past in particular binds her, forcing her to believe that her entire existence boils down to a single man's dying wish. In this mesmeric story of relationships, each of the four must realize what issues truly hold them back and what issues to reveal before it is too late.

The beloved bestselling collection of common sense wisdom from a celebrated psychologist and military veteran who proves it's never too late to move beyond the deepest of personal losses After service in Vietnam, as a surgeon for the 11th Armored Cavalry Regiment in 1968-69, at the height of the war, Dr. Gordon Livingston returned to the U.S. and began work as a psychiatrist. In that capacity, he has listened to people talk about their lives--what works, what doesn't, and the limitless ways (many of them self-inflicted) that people find to be unhappy. He is also a parent twice bereaved; in one thirteen-month period he lost his eldest son to suicide, his youngest to leukemia. Out of a lifetime of experience, Gordon Livingston has extracted thirty bedrock truths, including: We are what we do. Any relationship is under the control of the person who cares the least. The perfect is the enemy of the good. Only bad things happen quickly. Forgiveness is a form of letting go, but they are not the same thing. The statute of limitations has expired on most of our childhood traumas. Livingston illuminates these and twenty-four other truths in a series of carefully hewn, perfectly calibrated essays, many of which focus on our closest relationships and the things that we do to impede or, less frequently, enhance them. Again and again, these essays underscore that "we are what we do," and that while there may be no escaping who we are, we have the capacity to face loss, misfortune, and regret and to move beyond them--that it is not too late. Full of things we may know but have not articulated to ourselves, Too Soon Old, Too Late Smart offers solace, guidance, and hope to everyone ready to become the person they'd most like to be.

We all know we should save for retirement, right? But we don't. We're just not sure where to start, or when. Experts conjure magic numbers and use complicated terminology. Do we really need a million dollars? And if we don't have a snowball's chance in hell of saving that much, should we even bother? Gail's answers are no and yes—there is no magic number that fits everyone, and yes, you must bother! The hardest part of retirement planning is getting started, so Gail walks you through the steps to put momentum on your side—even if it's with as little as a dollar a day. She'll help you figure out where you are now, where you want to be and how to get there. No expert, Gail included, should offer a one-size-fits-all solution, which is why Never Too Late has concrete steps for developing a plan that is right for you. Never Too Late is about cutting through the crap, taking charge and taking action to create the future you want.

From the author of Cry, The Beloved Country comes a powerful novel of terror and remorse "written in exquisitely balanced prose" (Chicago Sun-Times) about a white policeman who has an affair with a native girl in South Africa. After violating his country's ironclad law governing relationships between the races, a young white South African police lieutenant must struggle alone against the censure of an inflexible society, his family, and himself.

"I had a real romance with this book." —Miranda July A highly anticipated collection, from the writer Maggie Nelson has called, "bracingly good...refreshing and welcome," that explores the myriad ways in which desire and commodification intersect. From graffiti gangs and Grand Theft Auto to sugar daddies, Schopenhauer, and a deadly game of Russian roulette, in these essays, Chelsea Hodson probes her own desires to examine where the physical and the proprietary collide. She asks what our privacy, our intimacy, and our own bodies are worth in the increasingly digital world of liking, linking, and sharing. Starting with Hodson's own work experience, which ranges from the mundane to the bizarre—including modeling and working on a NASA Mars mission—Hodson expands outward, looking at the ways in which the human will submits, whether in the marketplace or in a relationship. Both tender and jarring, this collection is relevant to anyone who's ever searched for what the self is worth. Hodson's accumulation within each piece is purposeful, and her prose vivid, clear, and sometimes even shocking, as she explores the wonderful and strange forms of desire. Tonight I'm Someone Else is a fresh, poetic debut from an exciting emerging voice, in which Hodson asks, "How much can a body endure?" And the resounding answer: "Almost everything."

Beware! Dangerous secrets lie between the pages of this book. OK, I warned you. But if you think I'll give anything away, or tell you that this is the sequel to my first literary endeavor, The Name of This Book is Secret, you're wrong. I'm not going to remind you of how we last left our heroes, Cass and Max-Ernest, as they awaited initiation into the mysterious Terces Society, or the ongoing fight against the evil Dr. L

and Ms. Mauvais. I certainly won't be telling you about how the kids stumble upon the Museum of Magic, where they finally meet the amazing Pietro! Oh, blast! I've done it again. Well, at least I didn't tell you about the missing Sound Prism, the nefarious Lord Pharaoh, or the mysterious creature born in a bottle over 500 years ago, the key to the biggest secret of all. I really can't help myself, now can I? Let's face it - if you're reading this, it's too late.

Falling in love can happen in the blink of an eye. I fell for Jay the moment I laid eyes on him. Was drawn to him in a way I'd never been drawn to a man before. He was everything I wanted. The man I dreamed about at night and looked for everywhere I turned just for a glimpse of his perfection. But I couldn't have him. It was against the rules. Forbidden. He was my best friend's boyfriend. I would never do that to her. Then she died. Looking at him became painful, bringing back memories of the reason we couldn't be together. The reason I never pursued him. I had to move on and vowed never to look back in an attempt to escape him and the devastation in my heart. Yet here I stand, five years later, staring into the eyes of the man I still want. In the place I swore I'd never return to. With memories assaulting me from every angle. He's still the picture of perfection in my eyes, making our attraction even more dangerous than it once was. The only difference... No one is standing in our way this time.

Paul McCarahan has killed twice. The first time it was in Germany, his Afro-German mother's country. The second time the theater was Pittsburgh, his hometown. The latter killing made him something of a hero to the local African American community, from which he nonetheless has drifted away. However, it is the violent struggle in the Rhineland when he was nineteen years old that has marked him, apparently for life. This "victory" remains his dark secret. He muses that it might be his guiding light. Paul and his younger brother lost their mother, when Paul was four years old. She returned to Germany due to the psychological abuse meted out by Paul's father and, fearing her husband's threats, did not return to retrieve her children. Paul was conceived in the immediate aftermath of World War II in Germany, but born in the United States. Fifty-eight years later, he is a mathematician struggling to find life's formula. He is at a loss wherever he wanders, be it Germany, Yale College, or the Piedmont region of Virginia and North Carolina, where his paternal ancestors labored in bondage for two centuries. He eventually gives himself up to the possibility of redemption, when fate presents itself in the guise of a manifestly long-shot relationship.

Hard-hitting divorce lawyer James Sexton shares his insights and wisdom from the front lines of divorce to keep you out of his office and improve your relationship. *If You're in My Office, It's Already Too Late*. James Sexton knows this. After dealing with more than a thousand clients whose marriages have dissolved over everything from an ill-advised threesome with the nanny to the uneven division of carpool duties, he also knows all of the what-not-to-dos for couples who want to build—and consistently work to preserve—a lasting, fulfilling relationship. Described by former clients as a “courtroom gunslinger” and “the sociopath you want on your side,” Sexton tells the unvarnished truth about relationships, diving straight into the most common marital problems. These usually derive from dishonest—or nonexistent—communication. Even when the alleged reason for separation is one spouse’s new “personal trainer,” there’s likely a communication problem that predates the fitness kick. Symptom and root cause get confused all the time. Sexton has spent his career working with spouses-to-be-no-longer. Reverse engineering a relationship can help to identify and fix what does not work. Ever feel like you’re holding back criticism of your spouse because you just can’t have that fight right now? Sexton will tell you to “Hit Send Now.” Maybe you aren’t as adventurous as you used to be, or need some “you time,” but for some reason it seems weird or exhausting to change up the routine now. Sexton knows where that mentality leads and offers viable alternative paths to take. Though he deals constantly with the heartbreak of others, he still believes in romance and the transformative power of love. This book is his opportunity to use what he has learned to help couples that aren’t so far gone get back on track.

A groundbreaking exploration of what it means to be a late bloomer in a culture obsessed with SAT scores and early success, and how finding one's way later in life can be an advantage to long-term achievement and happiness. We live in a society where kids and parents are obsessed with early achievement, from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing job at Google or Facebook--or even better, creating a startup with the potential to be the next Google or Facebook or Uber. We see software coders becoming millionaires or even billionaires before age 30 and feel we are failing if we are not one of them. But there is good news. A lot of us--most of us--do not explode out of the gates in life. That was true for author Rich Karlgaard, who had a mediocre academic career at Stanford (which he got into by a fluke), and after graduating, worked as a dishwasher, nightwatchman, and typing temp before finally finding the inner motivation and drive that ultimately led him to start up a high-tech magazine in Silicon Valley, and eventually to become the publisher of Forbes magazine. There is a scientific explanation for why so many of us bloom later in life. The executive function of our brains doesn't mature until age 25--and later for some. In fact our brain's capabilities peak at different ages. We actually enjoy multiple periods of blooming in our lives. Based on several years of research, personal experience, and interviews with neuroscientists and psychologists, and countless people at different stages of their careers, Bloom reveals how and when we achieve full potential--and why an algorithmic acuity in math is such an anomaly in terms of career success.
