'Optimization Day' (OD) has been a series of annual mini-conferences in Australia since 1994. The purpose of this series of events is to gather researchers in optimization and its related areas from Australia and their collaborators, in order to exchange new developments of optimization theories, methods and their applications. The first four OD mini-conferences were held in The University of Ballarat (1994), The University of New South Wales (1995), The University of Melbourne (1996) and Royal Melbourne Institute of Technology (1997), respectively. They were all on the eastern coast of Australia. The fifth mini-conference Optimization Days was held at the Centre for Applied Dynamics and Optimization (CADO), Department of Mathematics and Statistics, The University of Western Australia, Perth, from 29 to 30 June 1998. This is the first time the OD mini-conference has been held at the western coast of Australia. This fifth OD preceded the International Conference on Optimization: Techniques and Applications (ICOTA) held at Curtin University of Technology. Many participants attended both events. There were 28 participants in this year's mini-conference and 22 presentations in the mini conference. The presentations in this volume are refereed contributions based on papers presented at the fifth Optimization Days mini-conference. The volume is divided into the following parts: Global Optimization, Nonsmooth Optimization, Optimization Methods and Applications.

Across a range of industries, once-leading companies are in trouble: Walmart, IBM, Pfizer, HP, and The Gap to name a few. But others are thriving. The difference is how the company's leaders view their supply chain: Is it just about cutting cost or do they see its hidden tools for outperforming the competition? Steve Jobs, upon returning to Apple in 1997, focused on transforming the supply chain. He hired Tim Cook--and the company sped up the development of new products, getting them into consumers' hands faster. The rest is history. While competitors were shutting stores, Zara's highly responsive supply chain made it the most valued company in the retail space and its founder, the richest man in Europe. Showcasing real solutions learned from true success stories like these and many others, *The Supply Chain Revolution* provides for business leaders the secrets to succeeding in a disruptive world. They will learn to:

- Make alliances more successful
- Simplify and debottleneck the supply chain
- Boost retail success by managing store investment
- Improve customer satisfaction and increase revenue
- And more!

Every year, more businesses fail because of their old-school views toward cutting costs, and they usually begin with the supply chain. Don't go down with that ship! Discover how the right supply chain can actually help you thrive.
