A journey to the green inferno of the African jungle brings one man face to face with his macabre past. Every year the storks would set off on their astounding 12,000-mile migration from Northern Europe to the remote Central African Republic. One year, inexplicably, puzzling numbers of them fail to return. At the invitation of a Swiss ornithologist, Louis Antioch agrees to investigate the mystery of the birds' disappearance. Before he can set off on his quest, however, his patron is found dead in bizarre circumstances. Jean-Christophe Grang-'s uncompromising narrative develops at a nightmare pace from a Bulgarian gypsy encampment to a kibbutz in the Occupied Territories, to the African jungle, to Calcutta, where an appalling and gruesome truth emerges: the end of a mission that began with the Flight of the Storks-

From the expert team behind *IT'S PERFECTLY NORMAL* and *IT'S SO AMAZING!* comes a book for younger children about their bodies — a resource that parents, teachers, librarians, health care providers, and clergy can use with ease and confidence. Young children are curious about almost everything, especially their bodies. And young children are not afraid to ask questions. What makes me a girl? What makes me a boy? Why are some parts of girls' and boys' bodies the same and why are some parts different? How was I made? Where do babies come from? Is it true that a stork brings babies to mommies and daddies? *IT'S NOT THE STORK!* helps answer these endless and perfectly normal questions that preschool, kindergarten, and early elementary school children ask about how they began. Through lively, comfortable language and sensitive, engaging artwork, Robie H. Harris and Michael Emberley address readers in a reassuring way, mindful of a child's healthy desire for straightforward information. Two irresistible cartoon characters, a curious bird and a squeamish bee, provide comic relief and give voice to the full range of emotions and reactions children may experience while learning about their amazing bodies. Vetted and approved by science, health, and child development experts, the information is up-to-date, age-appropriate, and scientifically accurate, and always aimed at helping kids feel proud, knowledgeable, and comfortable about their own bodies, about how they were born, and about the family they are part of.

Our understanding of what makes a family has undergone a revolution in the last few decades, from same-sex parenthood to surrogacy, donor conception, and IVF. But what has the impact been on children? In *We Are Family*, Professor Susan Golombok visits lesbian mothers, gay fathers, single parents, donor conception parents, co-parents, trans parents, surrogates, and donors, and, more importantly, their children, to find out if they are as well-adjusted, happy, and emotionally stable as children from traditional nuclear families. And she discovers that the answer is yes — and sometimes even more so. Susan's work at the Centre for Family Research at Cambridge proves that any family set-up can provide a loving, secure home for a child — although, the children from these families will often face prejudiced attitudes from others. Since the 1970s, when she was first drawn to this area of research after reading about lesbian mothers whose children were being removed from their care, Susan has worked tirelessly

to challenge outdated attitudes and prevent families being split up for no good reason. This book tells the stories of those families — their struggles and their triumphs — while celebrating love and family in all its wonderful variations.

Nellie and her little brother Gus discuss all kinds of families during a day at the zoo and dinner at home with their relatives afterwards.

Written by a certified sexuality educator, Cory Silverberg, and illustrated by award-winning Canadian artist Fiona Smyth, *What Makes a Baby* is as fun to look at as it is useful to read.

A memoir of formative years spent on a series of communes: A "wonderful account of a frankly ghastly childhood . . . Hilarious and heartbreaking" (Daily Mail). At the age of six, Tim Guest was taken by his mother to a commune modeled on the teachings of the notorious Indian guru Bhagwan Shree Rajneesh. The Bhagwan preached an eclectic doctrine of Eastern mysticism, chaotic therapy, and sexual freedom, and enjoyed inhaling laughing gas, preaching from a dentist's chair, and collecting Rolls Royces. Tim and his mother were given Sanskrit names, dressed entirely in orange, and encouraged to surrender themselves into their new family. While his mother worked tirelessly for the cause, Tim—or Yogesh, as he was now called—lived a life of well-meaning but woefully misguided neglect in various communes in England, Oregon, India, and Germany. In 1985 the movement collapsed amid allegations of mass poisonings,

attempted murder, and tax evasion, and Yogesh was once again Tim. In this extraordinary memoir, Tim Guest chronicles the heartbreaking experience of being left alone on earth while his mother hunted heaven. "An intelligent, wry, openhearted memoir of surviving a childhood and a cultural phenomenon that were both extraordinary." —Booklist (starred review)

“A powerful model of how to understand the complex array of issues that will shape the political economy of population in the future.”—American Historical Review From the founders’ fears that crowded cities would produce corruption, luxury, and vice to the zero population growth movement of the late 1960s to today’s widespread fears of an aging crisis as the Baby Boomers retire, the American population debate has always concerned much more than racial composition or resource exhaustion, the aspects of the debate usually emphasized by historians. In *The State and the Stork*, Derek Hoff draws on his extraordinary knowledge of the intersections between population and economic debates throughout American history to explain the many surprising ways that population anxieties have provoked unexpected policies and political developments—including the recent conservative revival. At once a fascinating history and a revelatory look at the deep origins of a crucial national conversation, *The State and the Stork* could not be timelier. “Hoff has done a real service by bringing to the foreground the economic dimension of U.S. debates over population size and growth, a topic that has been relegated to the shadows for too long.”—Population and Development Review “After decades of failed efforts by the scientific community to alert the public to the environmental dangers of population growth and overpopulation, a first-rate historian has finally detailed both the arguments and their policy implications . . . Everyone interested in population should read *The State and the Stork*. This is an incredibly timely book.”—Paul R. Ehrlich, author of *The Population Bomb*

Stork Mountain tells the story of a young Bulgarian immigrant who, in an attempt to escape his mediocre life in America, returns to the country of his birth. Retracing the steps of his estranged grandfather, a man who suddenly and inexplicably cut all contact with the family three years prior, the boy finds himself on the border of Bulgaria and Turkey, a stone's throw away from Greece, high up in the Strandja Mountains. It is a place of pagan mysteries and black storks nesting in giant oaks; a place where every spring, possessed by Christian saints, men and women dance barefoot across live coals in search of rebirth. Here in the mountains, the boy reunites with his grandfather. Here in the mountain, he falls in love with an unobtainable Muslim girl. Old ghosts come back to life and forgotten conflicts, in the name of faith and doctrine, blaze anew. Stork Mountain is an enormously charming, slyly brilliant debut novel from an internationally celebrated

writer. It is a novel that will undoubtedly find a home in many readers' hearts.
