The essays in this volume consider issues at the intersection of freedom of expression and racial, cultural, and gender diversity. The claims of those whose cultures and beliefs differ from our own are no longer the exclusive province of diplomats, as the Danish newspaper that published cartoons ridiculing Mohammed quickly learned. Negotiating the claims of freedom of expression as they come into open conflict with a wide diversity of viewpoints, both domestically and internationally, has become an increasingly complex task. The present volume seeks both to provide fresh insight into the philosophical grounds for limiting government restriction of expression and to address current tensions between freedom of expression and pluralism. The suppression of ideas by government is no doubt as old as government itself. Ideas help to keep governments in power, and opposing ideas can help them to lose it. As well, through most of the history of the world, the belief that some know better than others what is true, what is right, and what is valuable has been sufficiently widespread to make it seem natural for those better to dictate for the rest what they should believe. Just as clerics did not hesitate to dictate to their congregations, Christians did not hesitate to impose their beliefs on non-Christians in order to save their souls.

The method and plan of this dictionary of Jamaican English are basically the same as those of the Oxford English Dictionary, but oral sources have been extensively tapped in addition to detailed coverage of literature published in or about Jamaica since 1655. It contains information about the Caribbean and its dialects, and about Creole languages and general linguistic processes. Entries give the pronunciation, part-of-speech and usage of labels, spelling variants, etymologies and dated citations, as well as definitions. Systematic indexing indicates the extent to which the lexis is shared with other Caribbean countries.

Beginning with a deceptively simple question—What do we mean when we designate behaviors, values, or forms of expression as “black”?—Evie Shockley’s *Renegade Poetics* separates what we think we know about black aesthetics from the more complex and nuanced possibilities the concept has long encompassed. The study reminds us, first, that even among the radicalized young poets and theorists who associated themselves with the Black Arts Movement that began in the mid-1960s, the contours of black aesthetics were deeply contested and, second, that debates about the relationship between aesthetics and politics for African American artists continue into the twenty-first century. Shockley argues that a rigid notion of black aesthetics commonly circulates that is little more than a caricature of the concept. She sees the Black Aesthetic as influencing not only African American poets and their poetic production, but also, through its shaping of criteria and values, the reception of their work. Taking as its starting point the young BAM artists’ and activists’ insistence upon the interconnectedness of culture and politics, this study delineates how African American poets—in particular, Gwendolyn Brooks, Sonia Sanchez, Harryette Mullen, Anne Spencer, Ed Roberson, and Will Alexander—generate formally innovative responses to their various historical and cultural contexts. Out of her readings, Shockley eloquently builds a case for redefining black aesthetics descriptively, to account for nearly a century of efforts by African American poets and critics to name and tackle issues of racial identity and self-determination. In the process, she resituates innovative poetry that has been dismissed, marginalized, or misread because its experiments were not “recognizably black”—or, in relation to the avant-garde tradition, because they were.

Originally published in 1954, this is the tragic story of an honest Rastafarian healer caught up in a web of intrigue and betrayal in Jamaica's tough West Kingston slums. It is a portrait of a ghetto saint - an ordinary man selected by the universe to bring enlightenment to poor belittled people.

Qasim Amin (1863-1908), an Egyptian lawyer, is best known for his advocacy of women's emancipation in Egypt, through a number of works including *The Liberation of Women* and *The New Woman*. In the first of these important books in 1899, he

started from the premise that the liberation of women was an essential prerequisite for the liberation of Egyptian society from foreign domination, and used arguments based on Islam to call for an improvement in the status of women. In doing so, he promoted the debate on women in Egypt from a side issue to a major national concern, but he also subjected himself to severe criticism from the khedival palace, as well as from religious leaders, journalists, and writers. In response he wrote *The New Woman*, published in 1900, in which he defended his position and took some of his ideas further. In *The New Woman*, Amin relies less on arguments based on the Quran and Sayings of the Prophet, and more openly espouses a Western model of development. Although published a century ago, these two books continue to be a source of controversy and debate in the Arab world and remain key works for understanding the Arab feminist movement. *The Liberation of Women* and *The New Woman* appear here in English translation for the first time in one volume.

This book is the first systematic cross-disciplinary survey on the use of Jamaican English in Ethiopia, describing the dynamics of language acquisition in a multi-lectal and multicultural context. It is the result of over eight years' worth of research conducted in both Jamaica and Africa, and is a recognition of the trans-cultural influence of the "Repatriation Movement" and other diasporic movements. The method and materials adopted in this book point to a constant spread and diffusion of Jamaican culture in Ethiopia. This is reinforced by the universalistic appeal of Rastafarianism and Reggae music and their ability to transcend borders. The data gathered here focus on how an Anglophone-based Creole has developed new speech-forms and has been hybridized and cross-fertilized in contact situations and by new media sources. The book focuses on the use of Jamaican English in four particular domains: namely, school, street, family, and the music studio. Its findings are drawn from an exceptional range of sources, such as field-work and video-recordings, interviews, web-mediated communication, artistic performance and relevant transcriptions. These sources highlight five topics of relevance—language acquisition and choice; English and Jamaican speech forms; hegemonic and minority groups, Rastafarian culture and Reggae music—which are explored in further detail throughout the book. These salient features, in turn, interface with the dynamics of influencing factors, reinforcing circumstances, significance and change. The book represents a journey to the "extreme-outer circle" of English language use, following a circular route away from Africa and back again, with all the languages used (and lost) along the slavery route and inside the plantation complex developing into creolized speech forms and Creoles. Such language use is now making its way back to Africa, with all the incendiary creativity of Reggae and resonant with Rastafarian language.

Global English Slang brings together nineteen key international experts and provides a timely and essential overview of English slang around the world today. The book illustrates the application of a range of different methodologies to the study of slang and demonstrates the interconnection between the different sub-fields of linguistics. A key argument throughout is that slang is a function played by specific words or phrases rather than a characteristic inherent in the words themselves- what is slang in one context is not slang in another. The volume also challenges received wisdom on the nature of slang: that it is short-lived and that slang is restricted to verbal language. With an introduction by editor Julie Coleman, the topics covered range from Inner City New York slang and Hip Hop Slang to UK student slang and slang in Scotland. Authors also explore slang in Jamaica, Australia, New Zealand, India and Hong Kong and the influence of English slang on Norwegian, Italian and Japanese. A final section looks at slang and new media including online slang usage, and the possibilities offered by the internet to document verbal and gestural slang. Global English Slang is an essential reference for advanced undergraduates, postgraduates and researchers working in the areas of lexicology, slang and World Englishes.

In the dark Winter that follows, the war between the two feuding gangs, Pier Mill Massive and the Grange Close crew steps up. Two Generals fighting for control of one army, for control of the streets, the clubs, and even the local black businesses, claiming a stake (taxing) of profits and of course vengeance. Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books - and the first in Art History - to juxtapose temperate and tropical slavery. Charmaine A. Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest. One could easily assume that nineteenth-century Montreal and Jamaica were worlds apart, but through her astute examination of marine landscape art, the author re-connects these two significant British island colonies, sites of colonial ports with profound economic and military value. Through an analysis of prints, illustrated travel books, and maps, the author exposes the fallacy of their disconnection, arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antiguan genre studies in depth, it also examines the Montreal landscapes of artists including Thomas Davies, Robert Sproule, George Heriot and James Duncan. Breaking new ground, Nelson reveals how gender and race mediated the aesthetic and scientific access of such - mainly white, male - artists. She analyzes this moment of deep political crisis for British slave owners (between the end of the slave trade in 1807 and complete abolition in 1833) who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority, which allowed colonizers to 'civilize' the terrains of the so-called New World, while belying the oppression of slavery and indigenous displacement.

"A powerful work of skillful research and personal insight."--Publishers Weekly Biblical womanhood--the belief that God designed women to be submissive wives, virtuous mothers, and joyful homemakers--pervades North American Christianity. From choices about careers to roles in local churches to relationship dynamics, this belief shapes the everyday lives of evangelical women. Yet biblical womanhood isn't biblical, says Baylor University historian Beth Allison Barr. It arose from a series of clearly definable historical moments. This book moves the conversation about biblical womanhood beyond Greek grammar and into the realm of church history--ancient, medieval, and modern--to show that this belief is not divinely ordained but a product of human civilization that continues to creep into the church. Barr's historical insights provide context for contemporary teachings about women's roles in the church and help move the conversation forward. Interweaving her story as a Baptist pastor's wife, Barr sheds light on the #ChurchToo movement and abuse scandals in Southern Baptist circles and the broader evangelical world, helping readers understand why biblical womanhood is more about human power structures than the message of Christ.

Philosophy is shaped by life and life is shaped by philosophy. This is reflected in *The Philosophical I*, a collection of 16 autobiographical essays by prominent philosophers. Candid and philosophically insightful, these personal narratives critically call into question the belief that philosophy should be kept separate from the personal experience of philosophers. Each contributor traces the fundamental influences—both philosophical and otherwise—that have shaped his or her identity. In this postmodern world, the self is often viewed as irreparably fragmented and fractured, but the reflections in this volume point to a self that is a continuous, though dynamic, storyline. What shines through in each of these essays is that philosophy is a profoundly personal adventure.

Self Expression is a collection of poetry accompanied by photographs depicting the authors' journey to self discovery. The author hopes that this book will take you on your own journey of self discovery and personal growth.

Humorous essays that dissect our cultural obsessions and calls out bad behavior in our increasingly digital, connected lives. This book discusses the prevalence of messianic I-locution found in the Rastafari movement and the Bible. Because the phenomenon is important in the canonical Testaments, this study investigates its significance in epistolary pieces (Romans 7:14-25 ; 15:14-33), the bio-Narratives and the Apocalypse in their historical and cultural milieu.

This edited volume aims to critically discuss in how far the national orientation of schools and teacher education is appropriate in light of increasing migration and transnationality. The contributions offer ideas from teacher education research and school pedagogical practice in different nation-state contexts such as Austria, Canada, Chile, Greece, Israel, Japan, Switzerland, Turkey, the UK, and the USA. They ask which empirical and theoretical approaches are suitable for describing the phenomena of pedagogical-professional dealings with migration-related and transnational demands on schools. In raising this question, they do not reduce the analytical focus on migrants, their migration paths, actions or attitudes. Instead, the authors analyse the global interconnectedness and entanglements – each embedded in their specific national and global societal power structures and

hierarchical relationships – and the country-specific and transnational structures and contextual conditions of schools and teacher education.

This book considers the ways in which Muslims view the way they are being viewed, not viewed, or incorrectly viewed, by the West. The book underscores a certain “will-to-visibility” whereby Muslims/ Arabs wish just to be “seen” and to be marked as fellow human beings. The author relates the failure to achieve this visibility to a state of desperation that inextricably and symmetrically ties visibility to violence. When Syrian and Palestinian refugees recently started refusing to be photographed, they clearly ushered the eventual but inevitable collapse of the image and its final futility. The photograph has been completely emptied of its last remaining possibility of signification. The book attempts to engage with questions about the ways in which images are perceived within cross cultural contexts. Why and how do people from different cultural backgrounds view the same image in opposing ways; why do cartoon, photographs, and videos become both the cause and target of bloody political violence – as witnessed recently by the deadly attacks against Charlie Hebdo in France and in the swift military response by the US, Jordan, France, and others to videotaped violence by ISIS.

Where did these ideas spring from? Who has been on the front lines in the language wars? *The Language Wars* examines grammar rules, regional accents, swearing, spelling, dictionaries, political correctness, and the role of electronic media in reshaping language. It also takes a look at
