The book examines whether the jurisdiction of coastal States under international law can be extended to include powers of intervention towards vessels posing a significant risk to their coastal and marine environment, but which have not yet been involved in any incident or accident. The books sets out how it is that coastal State jurisdiction can indeed be seen as including powers of intervention towards High Risks Vessels before an incident or accident happens, on the basis of the precautionary principle. The precautionary principle requires taking action when a risk of damage to the environment is suspected, but cannot be confirmed scientifically. The book thus considers the potential opportunities for the coastal state under international law to regulate international shipping where they consider vessels to an unacceptable risk to the environment, in order to prevent or minimise the risk of occurrence of the accident or incident leading to damage. The book acknowledges that this puts into question some very old and established principles of the law of the sea, most importantly the principle of freedom of navigation. But Bénédicte Sage-Fuller contends that this change would itself be a consequence of the evolution, since the end of WWII, of on the one hand international law of the sea itself, and of international environmental law on the other hand.

The editorial panel examines all aspects of the disorder, from pathophysiology to the latest treatments and clinical trials including MTOPS and PREDICT. They explore laser prostatectomy using the holmium laser and a host of other minimally invasive techniques that are seriously challenging standard transurethral resection (TUR) as the gold standard intervention for this disease. A younger sibling is one of the precious gifts one can have. However, sibling arrival can be a worrisome event for a kid, who might be fearful of sharing things along with sharing the love of parents. This anxiety, or anticipated sibling rivalry, can be eliminated with a lovely explanation, like the one given in this book. This book is written in the form of a frank conversation between a mother and her firstborn girl and shows how the mother calmed down the concerns of her child.

A riveting, panoramic look at “homegrown” Islamist terrorism from 9/11 to the present. Since 9/11, more than three hundred Americans—born and raised in Minnesota, Alabama, New Jersey, and elsewhere—have been indicted or convicted of terrorism charges. Some have taken the fight abroad: an American was among those who planned the attacks in Mumbai, and more than eighty U.S. citizens have been charged with ISIS-related crimes. Others have acted on American soil, as with the attacks at Fort Hood, the Boston Marathon, and in San Bernardino. What motivates them, how are they trained, and what do we sacrifice in our efforts to track them? Paced like a detective story, *United States of Jihad* tells the entwined stories of the key actors on the American front. Among the perpetrators are Anwar al-Awlaki, the New Mexico-born radical cleric who became the first American citizen killed by a CIA drone and who mentored the Charlie Hebdo shooters; Samir Khan, whose Inspire webzine has rallied terrorists around the world, including the Tsarnaev brothers; and Omar Hammami, an Alabama native and hip hop fan who became a fixture in al Shabaab’s propaganda videos until fatally displeasing his superiors. Drawing on his extensive network of intelligence contacts, from the National Counterterrorism Center and the FBI to the NYPD, Peter Bergen also offers an inside look at the controversial tactics of the agencies tracking potential terrorists—from infiltrating mosques to massive surveillance; at the bias experienced by innocent observant Muslims at the hands of law enforcement; at the critics and defenders of U.S. policies on terrorism; and at how social media has revolutionized terrorism. Lucid and rigorously researched, *United States of Jihad* is an essential new analysis of the Americans who have embraced militant Islam both here and abroad. — Washington Post, Notable Non-Fiction Books in 2016

David Herbert Lawrence (1885–1930) was an English writer and poet whose work famously examined the results of industrialisation on contemporary society. In his novels and poetry, Lawrence explored a variety of then-controversial issues including sexuality and emotional health, which led many to label his work pornography. Today, he is considered to be one of the most important and influential writers of his generation. Lawrence's 1928 novel "Lady Chatterley's Lover" is the story of the former Constance Reid (Lady Chatterley), a young woman married to an upper-class baronet who was left with lower body paralysis as a result of his participation in the Great War. Both physically and emotionally distant from her husband, Constance begins an extramarital affair with the gamekeeper. Following the Victory of the publisher Penguin Books in an obscenity trial in the United Kingdom, an uncensored version of the book was finally published and gained notoriety due to explicit descriptions of sex and its use of then-unprintable four-letter words. A revolutionary novel and a true classic of English literature, "Lady Chatterley's Lover" would make for a worthy addition to any bookshelf. Read & Co. Classics is proud to be republishing this seminal novel now in a brand new edition complete with a specially-commissioned new biography of the author.

Research on human beings saves countless lives, but has at times harmed the participants. To what degree then should government regulate science, and how? The horrors of Nazi concentration camp experiments and the egregious Tuskegee syphilis study led the US government, in 1974, to establish Research Ethics Committees, known as Institutional Review Boards (IRBs) to oversee research on humans. The US now has over 4,000 IRBs, which examine yearly tens of billions of dollars of research -- all studies on people involving diseases, from cancer to autism, and behavior. Yet ethical violations persist. At the same time, critics have increasingly attacked these committees for delaying or blocking important studies. Partly, science is changing, and the current system has not kept up. Since the regulations were first conceived 40 years ago, research has burgeoned 30-fold. Studies often now include not a single university, but multiple institutions, and 40 separate IRBs thus need to approve a single project. One committee might approve a study quickly, while others require major changes, altering the scientific design, and making the comparison of data between sites difficult. Crucial dilemmas thus emerge of whether the current system should be changed, and if so, how.

Yet we must first understand the status quo to know how to improve it. Unfortunately, these committees operate behind closed doors, and have received relatively little in-depth investigation. Robert Klitzman thus interviewed 45 IRB leaders and members about how they make decisions. What he heard consistently surprised him. This book reveals what Klitzman learned, providing rare glimpses into the conflicts and complexities these individuals face, defining science, assessing possible future risks and benefits of studies, and deciding how much to trust researchers -- illuminating, more broadly, how we view and interpret ethics in our lives today, and perceive and use power. These committees reflect many of the most vital tensions of our time - concerning science and human values, individual freedom, government control, and industry greed. Ultimately, as patients, scientists, or subjects, the decisions of these men and women affect us all.

"It's Moosewood's world. We're just eating in it."

—Christine Muhlke, *The New York Times*

The creators of America's beloved natural foods restaurant, Moosewood, are back with *The Moosewood Restaurant Table*, their new book with over 250 brand new, never-before-published recipes. With the restaurant now in its fifth decade, the Moosewood chefs continue to remain faithful to the farm-to-table philosophy that has governed the restaurant since its founding, while also keeping an eye on today's gastro-trends. As they say "We've gotten to know our customers and readers pretty well... their curiosity and culinary IQ have grown exponentially... We've been on some adventures developing this book..." Indeed, they have, working with some less common fruits and vegetables that you might find in your CSA, like Romanesco broccoli and watermelon radishes. They've begun cooking with a wider variety of grains like freekeh and millet. All this experimentation has led them to some great new recipes: Two Potato Tomato Curry Cashew-Crusted Chickpea Burgers Cuban Picadillo with Tofu

Pot Pies for Autumn Winter and Spring Butternut Latkes Jamaican Jerk Tempeh Patties and plenty more. Of course, a Moosewood cookbook wouldn't be complete without desserts like Turkish Coffee Brownies, Orange Pistachio Cornmeal Cake or Cherry Tomato Upside Down Cake to mention just a few. Including a healthy number of both vegan and gluten-free recipes, *The Moosewood Restaurant Table* is the next classic from the restaurant that revolutionized natural eating in the US.

NAMED A MOST-ANTICIPATED BOOK OF THE YEAR BY MS. MAGAZINE AND CRIMEREADS Parasite meets The Good Son in this piercing psychological portrait of three women haunted by a brutal, unsolved crime. In the summer of 2002, when Korea is abuzz over hosting the FIFA World Cup, eighteen-year-old Kim Hae-on is killed in what becomes known as the High School Beauty Murder. Two suspects quickly emerge: rich kid Shin Jeongjun, whose car Hae-on was last seen in, and delivery boy Han Manu, who witnessed her there just a few hours before her death. But when Jeongjun's alibi checks out, and no evidence can be pinned on Manu, the case goes cold. Seventeen years pass without any resolution for those close to Hae-on, and the grief and uncertainty take a cruel toll on her younger sister, Da-on, in particular. Unable to move on with her life, Da-on tries in her own twisted way to recover some of what she's lost, ultimately setting out to find the truth of what

happened. Shifting between the perspectives of Da-on and two of Hae-on's classmates struck in different ways by her otherworldly beauty, Lemon ostensibly takes the shape of a crime novel. But identifying the perpetrator is not the main objective here: Kwon Yeo-sun uses this well-worn form to craft a searing, timely exploration of privilege, jealousy, trauma, and how we live with the wrongs we have endured and inflicted in turn.
