Many inheritable changes in gene function are not explained by changes in the DNA sequence. Such epigenetic mechanisms are known to influence gene function in most complex organisms and include effects such as transposon function, chromosome imprinting,

yeast mating type switching and telomeric silencing. In recent years, epigenetic effects have become a major focus of research activity. This monograph, edited by three well-known biologists from different specialties, is the first to review and synthesize what is known about these effects across all species, particularly from a molecular perspective, and will be of interest to everyone in the fields of molecular biology and genetics.

The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually, collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights

from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the ‘war to end all wars’.

Scholarly study of Samuel continues to wrestle with how we interpret this pivotal text. Even such basic matters as the question of what kind of literature it is remain unresolved while older questions such as the nature of its text and sources are debated anew in the light of material from Qumran and of current approaches to Hebrew narrative. Recognizing the importance of questions such as these, David Firth explores and introduces fresh ways of reading Samuel as a unified and yet complex text, which displays high levels both of literary artistry and of theological commitment. Although some stories in the books of Samuel are well known, and in the case of David and Goliath even proverbial, much of the content of these books is strange to modern readers. It is a story about a woman wanting a child, for example, that relates the beginnings of monarchy within Israel. Even the question of the monarchy is problematic, for we are introduced to not one royal family but two—those of Saul and David. David is ultimately shown to be the king chosen by God, yet by the end of the book he is only just managing to hold on to the kingdom as it is

nearly torn from him by rivalries within his family. These arresting stories are perplexing, for Samuel's writers seldom tell us how to read and interpret them. Firth presents these complex and fascinating stories as part of a bigger picture, enabling students to chart their way through the literary and historical issues of the Samuel narrative. Firth addresses issues of historicity, sources, date and authorship, as well as -- crucially -- appreciating the text as a literary whole.

Although it is well known by Italians, it is less so among foreign visitors. Bologna is the capital and largest city of Emilia-Romagna (a region in northern Italy). Bologna is famed for the oldest university in the Western world, lively student population, exquisite food, typical brick terracotta-roofed architecture and porticos, theatre and nightlife. It is considered second only to Venice in beauty by many Italians and certainly has one of the largest and best preserved historic centers among Italian cities. Its architecture is noted for its palette of terracotta reds, burnt oranges, and warm yellows, hence the name of Bologna la rossa (Bologna the red). God created animals with everything they needed. To be content and succeed, He designed homes perfectly suited to each one. However, the animals were unhappy with the places that God had made for them and eventually gave into the insecurities and fears they all felt. Owl was frightened of the dark, Mountain Goat became faint-hearted as he looked down from the narrow mountain ledge. Duck panicked every time she neared the water. Camel detested the hot, dry wind and Penguin hated the icy cold. Through whimsical illustrations and creative prose, "God Gave Me Everything I Need To Be Me!" encourages self acceptance, individuality and appreciation as the animals finally realize God had given them exactly what each one required to make them complete.

How can a nation create the conditions for economic growth and prosperity, improving people's lives on both the individual and national levels? And what, once these conditions are achieved, can it do to sustain this progress? Do any of the many "isms" under which we organize our economic philosophies hold the answer? While an insightful understanding of different economic approaches has always been essential for policymakers, it is equally important for those of us who might not steer the economy but must still live and function within it. Such an understanding is the key to making sense of not only economic events but of "noneconomic" news as well, allowing us to anticipate the economic consequences that can impact both the nation's economy and one's personal economy. And, of course, it sharpens the judgment you already bring to your own discussions of the issues. In the 24 lectures of *Why Economies Rise or Fall*, Professor Peter Rodriguez of the University of Virginia guides you through a stimulating and, above all, accessible examination of what economists know and don't know about this elusive search for economic prosperity.

*International Law Reports* is the only publication in the world wholly devoted to the regular and systematic reporting in English of courts and arbitrators, as well as judgements of national courts.
