In Teach Like Nobody's Watching: The essential guide to effective and efficient teaching, Mark Enser sets out a time-efficient approach to teaching that will reduce teachers' workload and enhance their pupils' levels of engagement and attainment. At a time when schools are crying out for more autonomy and trust, teacher and bestselling author Mark Enser asks educators the critical question How would you teach if nobody were watching? and empowers them with the tools and confidence to do just that. Mark argues that a quality education is rooted in simplicity. In this book he convincingly strips away the layers of contradictory pedagogical advice that teachers have received over the years and lends weight to the three key pillars that underpin effective, efficient teaching: the lesson, the curriculum and the school's support structure. Teach Like Nobody's Watching explores these three core elements in detail, and presents teachers with a range of practical, time-efficient approaches to help them reclaim their professional agency and ensure that their pupils get the excellent education they deserve. Part I considers the individual lesson and explores how lessons can be built around four simple elements: recap, input, application and feedback. Each chapter considers one aspect of the lesson in turn and discusses its importance with a particular focus on how educational research can be applied to it in the classroom, how it might look in different subjects, and the potential pitfalls to avoid. Part II recognises that lessons don't happen in isolation but as part of a wider curriculum. This section tackles: the creation of a programme of study that takes pupils on a journey through your subject; the super-curriculum of what happens outside the classroom; the principles of assessment design; and how time in departments can be used to reduce workload and support a culture of excellence. Finally, Part III looks at the role of the wider school in supporting teachers to teach like nobody's watching and how leaders can help to set them free from some of the more burdensome pressures. In this section, Mark draws on the experience of school leaders in a range of different contexts to illustrate what they have done to support effective and efficient teaching in their schools. Suitable for all teachers in both primary and secondary schools.

Starters and plenaries are now an essential part of all lessons and this highly practical, bestselling book provides busy secondary teachers with 50 creative activities to use in the classroom. The tasks will help ensure the first five minutes of any lesson are a time for motivation, energy and forward thinking and will help students to reflect on, and embed their learning at the end. From game show inspired quizzes to bingo and dominoes, Kate Brown's wealth of original ideas have been tried and tested by secondary teachers and can be adapted to use in any subject. Concise explanations and cross-curricular examples make this book an accessible and time saving resource for all secondary teachers looking to inject some new life and enthusiasm into their lessons.

Some people worry about participating in social settings because they lack confidence in their conversation skills. They may dread an evening at the pub or even just a chat with one friend, for fear of saying the wrong thing, not being able to think of anything to talk about, or whether they will find themselves feeling generally embarrassed about their conversational technique. This book offers a structure to help with the skills needed for initiating, maintaining, and ending conversations. It looks at casual chat and formal talk with one person face-to-face and on the phone, as well as how to converse in a group. There are over 30 chapters, each dealing with an aspect of conversation such as Greetings How to remember names Being topical, Using humour Reminiscing Repairing conversational gaffs, Escaping! The Conversational Menu Each topic is considered and discussed; exercises are suggested; "homework" is given on credit-card-sized cards, and then the Checklist is filled in, so that learning is secure. This is a complete course on conversation skills. designed for people over 16, either to work with the Speech and Language Therapist, or for some, to work on their own. Alison Roberts is a Speech and Language Therapist whose work has chiefly focused for the last 20 years on the communication needs of 11-25 year-olds with a wide variety of intriguing differences in ability. She works with several brilliant therapists who together form a team called Good Communication. Alison lectures to SLT students and to Careers Advisers and has written several sets of cards and books which have been published by Speechmark Publishing. She is also an enthusiastic craftswoman with an endless need and desire to devise her own SLT games, which gave rise to the original series of articles in the Speech and Language Therapy in Practice magazine.

This imaginative and practical book contains a collection of ideas and games that should provide you with lots of new resources without spending a fortune. Some of the games and activities address particular communication themes, such as: listening techniques; speech sounds; vocabulary building; and friendship skills, while others cover several areas simultaneously. The book is organised into chapters according to the major skill area being addressed, with suggestion for linked items in other chapters. To add to well-established and structured programmes of therapy that SLTs use, there are two principles that can make for better therapeutic outcomes, and on which the book is based: clients often respond more effectively if they feel that they "own" their therapy by being involved in making the materials that they will use; and therapy is improved when it is good fun, and preferably humorous. You don't need to be a great artist or craftsman to create these games and activities, or huge quantities of spare time to make most of the items, especially if you can get organised with equipment all in one go. There is a basic shopping list to help you get started. It is a must have for all Speech and Language Therapists. It is presented in A4 wire-o-bound.

Tips and techniques to build interactive learning into lecture classes
Have you ever looked out across your students only to find them staring at their computers or smartphones rather than listening attentively to you? Have you ever wondered what you could do to encourage students to resist distractions and focus on the information you are presenting? Have you ever wished you could help students become active learners as they listen to you lecture? Interactive Lecturing is designed to help faculty members more effectively lecture. This practical resource addresses such pertinent questions as, "How can lecture presentations be more engaging?" "How can we help students learn actively during lecture instead of just sitting and passively

listening the entire time?” Renowned authors Elizabeth F. Barkley and Claire H. Major provide practical tips on creating and delivering engaging lectures as well as concrete techniques to help teachers ensure students are active and fully engaged participants in the learning process before, during, and after lecture presentations. Research shows that most college faculty still rely predominantly on traditional lectures as their preferred teaching technique. However, research also underscores the fact that more students fail lecture-based courses than classes with active learning components. Interactive Lecturing combines engaging presentation tips with active learning techniques specifically chosen to help students learn as they listen to a lecture. It is a proven teaching and learning strategy that can be readily incorporated into every teacher’s methods. In addition to providing a synthesis of relevant, contemporary research and theory on lecturing as it relates to teaching and learning, this book features 53 tips on how to deliver engaging presentations and 32 techniques you can assign students to do to support their learning during your lecture. The tips and techniques can be used across instructional methods and academic disciplines both onsite (including small lectures and large lecture halls) as well as in online courses. This book is a focused, up-to-date resource that draws on collective wisdom from scholarship and practice. It will become a well-used and welcome addition for everyone dedicated to effective teaching in higher education.
