What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit—rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board member, and enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end, *Trains, Buses, People* shows that it is possible with the right tools to build good transit.

Amazing Stories, the home of Jules Verne and H. G. Wells, publisher of the first stories of Ursula K. Leguin and Isaac Asimov, is back in print after an absence of more than a decade! Dachshunds have a knack for helping out any way they can. In their desire to please, they are ready, willing and able to perform a myriad of tasks useful to their owners. Whether you need a door stop, seat warmer, personal trainer, Miracle Grow, wash cloth or home security system, look no further than a dachshund! *101 Uses for a Dachshund* depicts doxies performing chores evoking why the breed is adored by owners worldwide.

Based on the web phenomenon Dogshaming and containing photos that are all-new and exclusive to the book, this hilarious album showcases adorable snapshots of shamed pups confessing their biggest - and grossest - sins.

Celebrated pet photographer Serena Hodson's silly, drooly, whimsical, and fun *Upside-Down Dogs* is sure to bring a smile to every dog lover's face. Her unique perspective brings these sweet, full color photos to life on the page. Hodson takes beautiful color photographs of man's best friend...but her furry subjects are always upside down. The results are stunning, charming, and laugh out loud adorable. No matter the breed, no matter the background, Hodson is able to capture the sweet personality of each dog she works with. There's no better book to help someone turn their frown upside down.

The "natural order of the state" was an early modern mania for the Ottoman Empire. In a time

of profound and pervasive imperial transformation, the ideals of stability, proper order, and social harmony were integral to the legitimization of Ottoman power. And as Ottoman territory grew, so too did its network of written texts: a web of sultanic edicts, aimed at defining and supplementing imperial authority in the empire's disparate provinces. With this book, Heather L. Ferguson studies how this textual empire created a unique vision of Ottoman legal and social order, and how the Ottoman ruling elite, via sword and pen, articulated a claim to universal sovereignty that subverted internal challengers and external rivals. *The Proper Order of Things* offers the story of an empire, at once familiar and strange, told through the shifting written vocabularies of power deployed by the Ottomans in their quest to thrive within a competitive early modern environment. Ferguson transcends the question of what these documents said, revealing instead how their formulation of the "proper order of things" configured the state itself. Through this textual authority, she argues, Ottoman writers ensured the durability of their empire, creating the principles of organization on which Ottoman statecraft and authority came to rest.

Virtual, hands-on learning labs allow you to apply your technical skills using live hardware and software hosted in the cloud. College is easy for missionary kid Kennedy Stern. It's staying alive that's a lot more difficult. Kennedy could thrive in Harvard's pre-med program ... if only there weren't so many people who wanted her dead. Engrossing, thought-provoking, and never preachy, the Kennedy Stern Christian suspense series follows Kennedy as an undergrad who gets kidnapped while volunteering at a crisis pregnancy center, experiences police brutality firsthand, finds herself on a hijacked airplane, and much more. "Alana Terry is one of the few authors that doesn't create a bad book. Her stories are crafted with a lot of insight and tackle issues most authors wouldn't dream of touching." ~ Sheila McIntyre, book reviewer Find out why the Kennedy Stern novels are being called "the most relevant Christian series of the decade." Buy the complete nine-book library today, but be prepared to stay up late.

A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, Infinite Jest explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people;

and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, *Infinite Jest* bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do. "The next step in fiction...Edgy, accurate, and darkly witty...Think Beckett, think Pynchon, think Gaddis. Think." --Sven Birkerts, *The Atlantic*

That's the promise, and peril, of the third digital revolution, where anyone will be able to make (almost) anything. Two digital revolutions -- computing and communication -- have radically transformed our economy and lives. A third digital revolution is here: fabrication. Today's 3D printers are only the start of a trend, accelerating exponentially, to turn data into objects: Neil Gershenfeld and his collaborators ultimately aim to create a universal replicator straight out of *Star Trek*. While digital fabrication promises us self-sufficient cities and the ability to make (almost) anything, it could also lead to massive inequality. The first two digital revolutions caught most of the world flat-footed, thanks to *Designing Reality* that won't be true this time.

A "beautifully written" (Kirkus Reviews, starred review) memoir-manifesto from the first female director of the National Science Foundation about the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. If you think sexism thrives only on Wall Street or Hollywood, you haven't visited a lab, a science department, a research foundation, or a biotech firm. Rita Colwell is one of the top scientists in America: the groundbreaking microbiologist who discovered how cholera survives between epidemics and the former head of the National Science Foundation. But when she first applied for a graduate fellowship in bacteriology, she was told, "We don't waste fellowships on women." A lack of support from some male superiors would lead her to change her area of study six times before completing her PhD. *A Lab of One's Own* is an "engaging" (Booklist) book that documents all Colwell has seen and heard over her six decades in science, from sexual harassment in the lab to obscure systems blocking women from leading professional organizations or publishing their work. Along the way, she encounters other women pushing back against the status quo, including a group at MIT who revolt when they discover their labs are a fraction of the size of their male colleagues. Resistance gave female scientists special gifts: forced to change specialties so many times, they came to see things in a more interdisciplinary way, which turned out to be key to making new discoveries in the 20th and 21st centuries. Colwell would also witness the advances that could be made when men and women worked together—often under her direction, such as when she headed a team that helped to uncover the source of anthrax used in the 2001 letter attacks. *A Lab of One's Own* is "an inspiring read for women embarking on a career or experiencing career challenges" (Library Journal, starred review) that shares the sheer joy a scientist feels when moving toward a breakthrough, and the thrill of uncovering a whole new generation of female pioneers. It is the science book for the #MeToo era, offering an astute diagnosis of how to fix the problem of sexism in science—and a celebration of women pushing back.

Afrofuturism, a movement that began in the Black community during the early 20th Century as an escape from racial hostility, economic turmoil, and aggressive policing, is enjoying a renaissance witnessed by the record-breaking success of creative projects, including the Oscar-winning Marvel Studios film, *Black Panther*; Regina King's Emmy-winning HBO superhero tale, *Watchmen*; Janelle Monae's hit album, *Dirty Computer*; Jordan Peele's provocative feature *Get Out*; Octavia Butler's famed science fiction novel, *Kindred*; and Beyonce's visual album *Black Is King*. Now comes Afrofuturist Tim Fielder's beautifully written and rendered *INFINITUM*. In *INFINITUM*, King Aja ?ba and Queen Lewa are revered across the African continent for their impressive political and military skills. Yet the future of their kingdom is in jeopardy, for the royal couple do not have an heir of their own. When the King kidnaps his son born to a concubine, Obinrin, she curses ?ba with the “gift” of immortality. After enjoying long, wonderful lives both, Queen Lewa and the crown prince die naturally, leaving the ageless bereaved King ?ba heartbroken and alone. Taking advantage of ?ba's vulnerability, enemy nations rise to power and kill the king – or so they think. King Aja ?ba survives the fatal attack, finally realizing the bitter fruit of Obinrin's curse. For millennia, the immortal ?ba wanders the earth, mourning his lost subjects and searching for a new kingdom. His journey leads him across time, allowing him to witness the trans-Atlantic slave trade, the New World, and the American Civil Rights Movement. The expansion of global technology brings about intergalactic travel, first contact with an alien species, and conflicts within and ultimately outside the known universe. Thrust into these seminal events, ?ba, now known by many as “John,” faces harrowing decisions that will determine mankind's physical and spiritual trajectory. In 280 plus stunningly emotional and evocative full-color images, *INFINITUM* presents a unique cosmic experience, addressing issues of racism, classism, gender inequity, the encroachment of technology and the spiritual cost of war, while exposing the history behind ancient mysteries.

In a world where tech companies are still male-dominated and women are often dissuaded from STEM careers, *Broad Band* shines a much-needed light on the bright minds history forgot, from pioneering database poets, data wranglers, and hypertext dreamers to glass ceiling-shattering dot com-era entrepreneurs. This electrifying corrective to tech history

introduces us all to our long-overlooked tech mothers and grandmothers - showing us that if there's a 'boy's club' that dominates Silicon Valley today, it's an anachronism.

"Bonny Boston Terriers" is the eleventh adult colouring book from the series "Paws for Thought". It contains 24 hand drawn, single sided illustrations featuring Boston Terrier dogs in various settings. Each illustration is included in two sizes: one per page and two per page. The smaller size is ideal for testing out your colour schemes or to cut out and frame. There are lots of opportunities to practice your techniques colouring cute little dog and puppy faces. Also nicknamed the "American Gentleman", this small dog breed is affectionate, comical and very loyal. These illustrations are designed to challenge even the most experienced colourists, but there are some simpler illustrations for some light relief! Single sided designs printed on medium weight white paper - perfect for pastels or coloured pencils, this book would make a lovely gift. If you prefer to work directly inside the book using gel pens/markers, it is advisable to place a sheet of plain paper between the pages to prevent bleed through. Or, you are free to photocopy these designs on your favourite paper or card for your own use.

In the 1950s, East Central Florida underwent a vast transformation with the creation of the American space program. The sleepy fishing communities stretching from Titusville to Melbourne became home to an army of engineers, rocket scientists, and technicians who would soon take Florida and the nation into the missile age. With no opportunities for advanced study nearby, a handful of determined men and women launched Brevard Engineering College in 1958. In 1966, Florida's secretary of state approved the college's petition to change its name to Florida Institute of Technology. In its short history, Florida Tech has overcome formidable hurdles and succeeded in winning a place in the top ranks of scientific and technological universities. A college on the rise, Florida Tech has not only a bright future, but a rich and colorful history that has been captured in striking photographs. The exciting story of "Countdown College"-from the lift-off of Bumper 8 in 1950, which launched the space program in Florida, to the most recent high-tech additions to campus facilities-is the subject of this captivating new pictorial history.

What Your Lab Is Thinking Willow Creek Press

New York Times bestselling author Dan Lyons exposes how the "new oligarchs" of Silicon Valley have turned technology into a tool for oppressing workers in this "passionate" (Kirkus) and "darkly funny" (Publishers Weekly) examination of workplace culture. A Guardian Best Book of 2019 An Inc. Magazine Best Business Book of 2018 At a time of soaring corporate profits and plenty of HR lip service about "wellness," millions of workers--in virtually every industry--are deeply unhappy. Why did work become so miserable? Who is responsible? And does any company have a model for doing it right? For two years, Lyons ventured in search of answers. From the innovation-crazed headquarters of the Ford Motor Company in Detroit, to a cult-like "Holocracy"

workshop in San Francisco, and to corporate trainers who specialize in ... Legos, Lyons immersed himself in the often half-baked and frequently lucrative world of what passes for management science today. He shows how new tools, workplace practices, and business models championed by tech's empathy-impaired power brokers have shattered the social contract that once existed between companies and their employees. These dystopian beliefs--often masked by pithy slogans like "We're a Team, Not a Family"--have dire consequences: millions of workers who are subject to constant change, dehumanizing technologies--even health risks. A few companies, however, get it right. With *Lab Rats*, Lyons makes a passionate plea for business leaders to understand this dangerous transformation, showing how profit and happy employees can indeed coexist.

Three full-length suspense novels from multi-award winning Christian novelist Alana Terry. A three-in-one bundle of suspense and page-turning excitement as missionary kid Kennedy Stern faces more danger, mystery, and controversy than she knows how to handle. Confronted with questions of underage abortion, plagued by a stalker and paralyzing PTSD flashbacks, and eventually caught in the center of a police brutality scandal, Kennedy discovers that her first year at Harvard University involves a lot more than passing a few lab classes and fulfilling her premed requirements. With her parents serving North Korean refugees overseas, Kennedy befriends a loving and highly opinionated pastor, his hospitable and encouraging wife, an eccentric but respectful roommate whose worldview is drastically different from Kennedy's, and a foreign lab partner who's harboring a grave secret he'd do just about anything to keep from being exposed. The Kennedy Stern Christian suspense series tackles controversial issues facing the church today and brings them to light in a way that encourages questions and fosters discussions without ever turning preachy or heavy-handed. Find out why readers from all faiths and denominations, all walks of life, and all sides of the political spectrum are devouring this thought-provoking series from edgy Christian fiction author Alana Terry, who has won awards from Women of Faith, Grace Awards, The Book Club Network, Readers' Favorite, and many others.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"-- Thousands of books and articles examine nearly every aspect of the Civil War, but the important retreat of the armies from the Gettysburg battlefield to the Potomac River has been but little covered. Until now, no one had produced a critical analysis of the command decisions made during that fateful time based upon available intelligence. "Lee is Trapped and Must be Taken": Eleven Fateful Days after Gettysburg, July 4 to July 14, 1863, by Thomas J. Ryan and Richard R. Schaus, now available in paperback, rectifies this oversight. This comprehensive day-by-day account, which begins after the end of the Gettysburg battle, examines how Maj. Gen. George G. Meade organized and motivated his Army of the Potomac in response to President Abraham Lincoln's mandate to bring about the "literal or substantial destruction" of Gen. Robert E. Lee's defeated and retreating Army of Northern Virginia. As far as Lincoln was concerned, if Meade aggressively pursued and confronted Lee before he could escape across the flooded Potomac River, "the rebellion would be over." The long and bloody three-day battle exhausted both armies. Both commanders faced the difficult tasks of rallying their troops for more marching and fighting. Lee had to keep his army organized and motivated enough to conduct an orderly withdrawal into Virginia. Meade faced the same organizational and

motivational challenges with the added expectation of catching and defeating a still-dangerous enemy. Central to their decision-making was the information they received from their intelligence gathering resources about the movements, intentions, and capability of the enemy. The eleven-day period after Gettysburg was a battle of wits to determine which commander better understood the information he received and directed his army accordingly. Prepare for some surprising revelations. Ryan and Schaus rely on a host of primary sources to craft their study, including letters, memoirs, diaries, official reports, newspapers, and telegrams. The threading of these intelligence gems creates a gripping narrative with a significant amount of new information—which the authors use to offer their own direct and often damning conclusions. “Lee is Trapped and Must be Taken” is a sequel to Thomas Ryan’s *Spies, Scouts, and Secrets in the Gettysburg Campaign* (Savas Beatie, 2015), the recipient of the Bachelard-Coddington Literary Award and Gettysburg Civil War Round Table Distinguished Book Award.

What?! You've never heard of Crusoe the celebrity dachshund?! You must be living under a rock! ... Or at least that's what Crusoe thinks. He's the self-proclaimed "wiener dog who thinks he's more of a celebrity than he really is" (until now!). Crusoe is the star of his wildly popular blog of the same name, winner of the 2013 AND 2014 Best Pet Blog Award. That's right... two years in a row! Because Crusoe is a talented and ridiculously photogenic miniature dachshund with a big personality, stunning fashion sense, and an insatiable penchant for whimsy. Perhaps you know him better by his infamous alter ego, BATDOG? We thought so. This is Crusoe's New York Times bestselling book debut and he's so excited to share it with all of his adoring fans. Now everyone can stare lovingly into his big brown eyes and admire his wit and many costumes any time they choose. Crusoe is certain that his book will make the perfect gift for dog-lovers of all ages. He wants to be accessible to his fans so you can really get to know the mutt behind the mask, the pooch behind that signature sexy pout; the pup with a heart of gold. Can't miss Crusoe Features in the Book: The adventures of BATDOG and Robin Cooking with Crusoe Dr. Crusoe, the Dentist, and Malpractice International travels with the worldliest of adventure dogs Partners in crime with Crusoe and twin brother Oakley

Why would someone break into a zoo, break into the Lion enclosure and punch the King of the Jungle on the nose? What happens next? Read this book to find out. Written as part of Nanowrimo 2017. Unedited before publication.

BUSINESS COMMUNICATION: PROCESS AND PRODUCT, 9E prepares readers for success in today's digital workplace. This book introduces the basics of communicating effectively in the workplace, using social media in a professional environment, working in teams, becoming a good listener, and developing individual and team presentations. Authors Mary Ellen Guffey and Dana Loewy also offer a wealth of ideas for writing resumes and cover letters, participating in interviews, and completing follow-up activities. Optional grammar coverage in each chapter, including a comprehensive grammar guide in the end-of-book appendix, helps readers improve critical English language skills. Have you encountered a Gypsy Vanner horse? If you can answer yes to that question, whether you are a horse person or not, you have, if for only a moment, been captivated. The out-of-the-box beauty of these horses has been turning heads since the late 1990s when they were first introduced as a breed. The horse is a lifetime achievement of the Gypsy culture in Ireland and England. However, given the nature of this culture, the world of the internet and the horse industrys driving force, horse trading, confusion rather than understanding has appeared in the form of multiple breed names, multiple registries, and variety rather than consistency in breeding. *Stealing Gypsy Treasure* offers food for thought and clarity for those who have been drawn to these mysteriously magical and enchanting animals. If you are new to these horses,

this will be a welcome introduction to the Gypsy people and how nature chose this intriguing culture to create one of its most remarkable works of art.

Kids are on a mission to save the Earth! Recycle and Remake is the hands-on, practical guide you need to get started. This gentle, but empowering book is full of creative making activities, information, and ideas that give young eco-warriors (like you!) the know-how to really help the environment. With Recycle and Remake, you will soon be saving trees by making your own seeded recycled paper from junk mail, cleaning up the oceans by turning old carrier bags into kites, friendship bracelets, and colorful weaved baskets and repurposing a cardboard box into a periscope. You'll also learn about sustainable energies by creating a simple solar oven, cutting down on cling-film by making a food wrap from scrap cotton and beeswax, and turning an old t-shirt into a reusable tote bag so you never need to buy a plastic carrier bag again. You can even grow new plants to clean the air in your own upcycled milk bottle planters and using homemade compost. Each of the activities directly relates to an environmental hot topic, such as plastic pollution, food waste, or deforestation. Budding environmentalists all over the world are feeling inspired to do their bit for our unique planet.

Labs are known for their furry snuggles, playful romping and soulful eyes; just think if they're tongues were wagging instead of their tails!
